10. And whereas, the CPCB vide letter dated 12.03.2026 issued directions to the RSPCB under Section 18(1)(b) of the Air Act, 1981 to ensure compliance of provisions of ERP-III published by CPCB in air polluting industries in Delhi-NCR.
11. And whereas, your industry falls within the ambit of the aforesaid directions issued by CPCB.
12. And whereas the Board may, in exercise of the powers conferred upon it under the provisions of the section 33A of the Water Act and section 31A of the Air Act and in performance of its functions conferred under these Acts, issue directions in writing to any

Regional Office, Bhiwadi
Rajasthan State Pollution Control Board
Plot No. GO-1, Phase-II, RIICO Industrial Area, Bhiwadi-301019
e-mail: robhiwadi@gmail.com

person, officer or any authority and such person, officer or authority shall be bound to comply with such directions which includes the power direct: –

- a. The closure, prohibition or regulation of any industry, operation or process or
- b. Stoppage or regulation of the supply of electricity or water or any other service.

Therefore, in exercise of the powers conferred under Section 31A of the Air Act, 1981, and in discharge of the functions entrusted under the Water Act, 1974 and the Air Act, 1981, and to ensure compliance with the directions issued by the CPCB on 12.03.2026, you are hereby directed to ensure the following: –

1. To provide/ensure stack monitoring facilities in accordance with the Emission Regulation Part-III (ERP-III) latest by March 28,2026 for all the stacks attached to potential air polluting sources such as Boiler, Furnaces, Thermic Fluid Heaters, Kilns and Process Emissions.
2. To ensure that the position of port-hole should comply with Emission Regulation Part-III (ERP-III) published by CPCB. Special emphasis shall be given to the criteria of compliance of minimum 8D downstream from flow disturbance and minimum 2D from top of stack to ensure laminar flow at sampling point in the stack. For other details pertaining to location of port-hole para 2.5.0 at page 18 of ERP-III may be referred.
3. To provide a separate port hole of 0.1 m diameter for manual emission sampling. For port hole installation para 2.5.2 at page 19 of ERP-III may be referred.
4. In case, if the Online Continuous Emission Monitoring Systems (OCEMS) is mandated as per consent conditions, the plane of port hole for OCEMS should be 500 mm below (vertically) the plane of manual sampling port hole.
5. To ensure that the platform for monitoring should have capacity to bear 300–350 kg of weight, it should have a size of minimum 6 x 4 feet, 800–1000 mm of guard rail to ensure proper space for sampling team and equipment required for monitoring. For monitoring platform installation, para 2.5.3, 2.5.4 & 2.5.6 at page 19 & 20 of ERP-III may be referred.
6. To ensure that the port hole and ladder facility is safe to carry out monitoring. In place of monkey ladder, spiral type/scaffold ladder shall be provided to ensure safety of monitoring personnel.

Regional Office, Bhiwadi

10. And whereas, the CPCB vide letter dated 12.03.2026 issued directions to the RSPCB under Section 18(1)(b) of the Air Act, 1981 to ensure compliance of provisions of ERP-III published by CPCB in air polluting industries in Delhi-NCR.
11. And whereas, your industry falls within the ambit of the aforesaid directions issued by CPCB.
12. And whereas the Board may, in exercise of the powers conferred upon it under the provisions of the section 33A of the Water Act and section 31A of the Air Act and in

Regional Office, Bhiwadi
Rajasthan State Pollution Control Board
Plot No. GO-1, Phase-II, RIICO Industrial Area, Bhiwadi-301019
e-mail: robhiwadi@gmail.com

performance of its functions conferred under these Acts, issue directions in writing to any person, officer or any authority and such person, officer or authority shall be bound to comply with such directions which includes the power direct: -

- a. The closure, prohibition or regulation of any industry, operation or process or
- b. Stoppage or regulation of the supply of electricity or water or any other service.

Therefore, in exercise of the powers conferred under Section 31A of the Air Act, 1981, and in discharge of the functions entrusted under the Water Act, 1974 and the Air Act, 1981, and to ensure compliance with the directions issued by the CPCB on 12.03.2026, you are hereby directed to ensure the following: -

1. To provide/ensure stack monitoring facilities in accordance with the Emission Regulation Part-III (ERP-III) latest by March 28,2026 for all the stacks attached to potential air polluting sources such as Boiler, Furnaces, Thermic Fluid Heaters, Kilns and Process Emissions.
2. To ensure that the position of port-hole should comply with Emission Regulation Part-III (ERP-III) published by CPCB. Special emphasis shall be given to the criteria of compliance of minimum 8D downstream from flow disturbance and minimum 2D from top of stack to ensure laminar flow at sampling point in the stack. For other details pertaining to location of port-hole para 2.5.0 at page 18 of ERP-III may be referred.
3. To provide a separate port hole of 0.1 m diameter for manual emission sampling. For port hole installation para 2.5.2 at page 19 of ERP-III may be referred.
4. In case, if the Online Continuous Emission Monitoring Systems (OCEMS) is mandated as per consent conditions, the plane of port hole for OCEMS should be 500 mm below (vertically) the plane of manual sampling port hole.
5. To ensure that the platform for monitoring should have capacity to bear 300-350 kg of weight, it should have a size of minimum 6 x 4 feet, 800-1000 mm of guard rail to ensure proper space for sampling team and equipment required for monitoring. For monitoring platform installation, para 2.5.3, 2.5.4 & 2.5.6 at page 19 & 20 of ERP-III may be referred.

Regional Office, Bhiwadi
Rajasthan State Pollution Control Board
Plot No. GO-1, Phase-II, RIICO Industrial Area, Bhiwadi-301019
e-mail: robhiwadi@gmail.com

6. To ensure that the port hole and ladder facility is safe to carry out monitoring. In place of monkey ladder, spiral type/scaffold ladder shall be provided to ensure safety of monitoring personnel.

You are further directed to submit a compliance report to this office regarding the above directions by 28.03.2026.

In the event of failure to comply with the above directions within the stipulated time, the absence of proper stack monitoring facility as per ERP-III and as prescribed above shall be considered as violation and appropriate action shall be taken including closure of the industry, without any further notice in this matter. Further, any other action deemed appropriate under the provisions of the said Acts may also be initiated.

e-mail: robhiwadi@gmail.com

performance of its functions conferred under these Acts, issue directions in writing to any person, officer or any authority and such person, officer or authority shall be bound to comply with such directions which includes the power direct: -

- a. The closure, prohibition or regulation of any industry, operation or process or
- b. Stoppage or regulation of the supply of electricity or water or any other service.

Therefore, in exercise of the powers conferred under Section 31A of the Air Act, 1981, and in discharge of the functions entrusted under the Water Act, 1974 and the Air Act, 1981, and to ensure compliance with the directions issued by the CPCB on 12.03.2026, you are hereby directed to ensure the following: -

1. To provide/ensure stack monitoring facilities in accordance with the Emission Regulation Part-III (ERP-III) latest by March 28,2026 for all the stacks attached to potential air polluting sources such as Boiler, Furnaces, Thermic Fluid Heaters, Kilns and Process Emissions.
2. To ensure that the position of port-hole should comply with Emission Regulation Part-III (ERP-III) published by CPCB. Special emphasis shall be given to the criteria of compliance of minimum 8D downstream from flow disturbance and minimum 2D from top of stack to ensure laminar flow at sampling point in the stack. For other details pertaining to location of port-hole para 2.5.0 at page 18 of ERP-III may be referred.
3. To provide a separate port hole of 0.1 m diameter for manual emission sampling. For port hole installation para 2.5.2 at page 19 of ERP-III may be referred.
4. In case, if the Online Continuous Emission Monitoring Systems (OCEMS) is mandated as per consent conditions, the plane of port hole for OCEMS should be 500 mm below (vertically) the plane of manual sampling port hole.
5. To ensure that the platform for monitoring should have capacity to bear 300-350 kg of weight, it should have a size of minimum 6 x 4 feet, 800-1000 mm of guard rail to ensure proper space for sampling team and equipment required for monitoring. For monitoring platform installation, para 2.5.3, 2.5.4 & 2.5.6 at page 19 & 20 of ERP-III may be referred.

Regional Office, Bhiwadi
Rajasthan State Pollution Control Board
Plot No. GO-1, Phase-II, RIICO Industrial Area, Bhiwadi-301019
e-mail: robhiwadi@gmail.com

6. To ensure that the port hole and ladder facility is safe to carry out monitoring. In place of monkey ladder, spiral type/scaffold ladder shall be provided to ensure safety of monitoring personnel.

You are further directed to submit a compliance report to this office regarding the above directions by 28.03.2026.

In the event of failure to comply with the above directions within the stipulated time, the absence of proper stack monitoring facility as per ERP-III and as prescribed above shall be considered as violation and appropriate action shall be taken including closure of the industry, without any further notice in this matter. Further, any other action deemed appropriate under the provisions of the said Acts may also be initiated.

Sub: Directions under Section 31A of the Air (Prevention and Control of Pollution) Act, 1981 to provide and maintain stack emission monitoring facilities in accordance with Emission Regulation Part – III (ERP-III) published by CPCB in air polluting industry. regarding

Ref: Directions issued by Central Pollution Control Board (CPCB) under Section 18(1)(b) of the Air Act, 1981, to RSPCB vide letter dated 12.03.2026

Sir/Madam

1. Whereas, the Water (Prevention and Control of Pollution) Act, 1974 and the Air (Prevention and Control of Pollution) Act, 1981 (hereinafter collectively referred to as the "Acts") have come into force throughout the country with effect from 23.03.1974 and 16.05.1981, respectively.
2. And whereas, the said Acts have been enacted to provide for the prevention, control, and abatement of water and air pollution and for maintaining and restoring the wholesomeness of water and air, and the Rajasthan State Pollution Control Board (hereinafter referred to as the "Board") has been vested with the powers to take such steps as may be deemed necessary for enforcement of the provisions of the aforesaid Acts.
3. And whereas, under the provisions of Section 24 of the Water Act, no person shall knowingly cause or permit any poisonous, noxious, or polluting matter, determined in accordance with the standards laid down by the Board, to enter any stream, well, sewer, or land.

Regional Office, Bhiwadi
Rajasthan State Pollution Control Board
Plot No. GO-1, Phase-II, RIICO Industrial Area, Bhiwadi-301019
e-mail: robhiwadi@gmail.com

4. And whereas under the provisions of section 25/26 of the Act, no person shall without the previous consent of the Board establish or take any steps to establish, any industry, operation or process or any treatment and disposal system or any extension or addition thereto, which is likely to discharge sewage or trade effluent into a stream or well or sewer or on land or bring into use any new or altered outlet for the discharge or sewage or trade effluent or begin to make any new discharge of sewage or trade effluent.
5. And whereas under the provisions of section 21 of the Air Act, no person shall without the previous consent of the Board, establish or operate any industrial plant in an air pollution control area. Industrial plant, under the Air Act, has been defined to mean any plant used for any industrial or trade purposes and emitting any air pollutant into the atmosphere.
6. And whereas under the provisions of section 22 of the Air Act, no person operating any industrial plant, in any air pollution control area shall discharge or cause or permit to be discharged the emission of any air pollutant more than the prescribed standards.
7. And whereas, an industry has been established in the name & style of **M/s VMS Bathware Private Limited** at **F 1019&1020, RIA , Khushkhhera**
8. , **District Khairthal Tijara** (hereinafter referred to as 'the industry') and the process is such that it generates polluted trade/domestic effluent & air emission.
9. And whereas, the Central Pollution Control Board (CPCB), New Delhi, has published Emission Regulation Part-III (ERP-III) in December 1985, prescribing monitoring requirement for industries including provisions relating to stack monitoring facilities, equipment, and testing procedures for regulation of emissions from industrial sources.
10. And whereas, provision of proper stack monitoring facilities is essential for assessing compliance of industries with prescribed emission standards and for enabling regulatory authorities to undertake effective monitoring and enforcement actions.
11. And whereas, the CPCB vide letter dated 12.03.2026 issued directions to the RSPCB under Section 18(1)(b) of the Air Act, 1981 to ensure compliance of provisions of ERP-III published by CPCB in air polluting industries in Delhi-NCR.
12. And whereas, your industry falls within the ambit of the aforesaid directions issued by CPCB.

11. And whereas, your industry falls within the ambit of the aforesaid directions issued by CPCB.
12. And whereas the Board may, in exercise of the powers conferred upon it under the provisions of the section 33A of the Water Act and section 31A of the Air Act and in

Regional Office, Bhiwadi
Rajasthan State Pollution Control Board
Plot No. GO-1, Phase-II, RIICO Industrial Area, Bhiwadi-301019
e-mail: robhiwadi@gmail.com

performance of its functions conferred under these Acts, issue directions in writing to any person, officer or any authority and such person, officer or authority shall be bound to comply with such directions which includes the power direct: -

- a. The closure, prohibition or regulation of any industry, operation or process or
- b. Stoppage or regulation of the supply of electricity or water or any other service.

Therefore, in exercise of the powers conferred under Section 31A of the Air Act, 1981, and in discharge of the functions entrusted under the Water Act, 1974 and the Air Act, 1981, and to ensure compliance with the directions issued by the CPCB on 12.03.2026, you are hereby directed to ensure the following: -

1. To provide/ensure stack monitoring facilities in accordance with the Emission Regulation Part-III (ERP-III) latest by March 28,2026 for all the stacks attached to potential air polluting sources such as Boiler, Furnaces, Thermic Fluid Heaters, Kilns and Process Emissions.
2. To ensure that the position of port-hole should comply with Emission Regulation Part-III (ERP-III) published by CPCB. Special emphasis shall be given to the criteria of compliance of minimum 8D downstream from flow disturbance and minimum 2D from top of stack to ensure laminar flow at sampling point in the stack. For other details pertaining to location of port-hole para 2.5.0 at page 18 of ERP-III may be referred.
3. To provide a separate port hole of 0.1 m diameter for manual emission sampling. For port hole installation para 2.5.2 at page 19 of ERP-III may be referred.
4. In case, if the Online Continuous Emission Monitoring Systems (OCEMS) is mandated as per consent conditions, the plane of port hole for OCEMS should be 500 mm below (vertically) the plane of manual sampling port hole.
5. To ensure that the platform for monitoring should have capacity to bear 300-350 kg of weight, it should have a size of minimum 6 x 4 feet, 800-1000 mm of guard rail to ensure proper space for sampling team and equipment required for monitoring. For monitoring platform installation, para 2.5.3, 2.5.4 & 2.5.6 at page 19 & 20 of ERP-III may be referred.

Regional Office, Bhiwadi
Rajasthan State Pollution Control Board
Plot No. GO-1, Phase-II, RIICO Industrial Area, Bhiwadi-301019
e-mail: robhiwadi@gmail.com

6. To ensure that the port hole and ladder facility is safe to carry out monitoring. In place of monkey ladder, spiral type/scaffold ladder shall be provided to ensure safety of monitoring personnel.

You are further directed to submit a compliance report to this office regarding the above directions by 28.03.2026.

In the event of failure to comply with the above directions within the stipulated time, the absence of proper stack monitoring facility as per ERP-III and as prescribed above shall be considered as violation and appropriate action shall be taken including closure of the industry, without any further notice in this matter. Further, any other action deemed appropriate under the provisions of the said Acts may also be initiated.

Yours sincerely,

Plot No. GO-1, Phase-II, RIICO Industrial Area, Bhiwadi-301019
e-mail: robhiwadi@gmail.com

performance of its functions conferred under these Acts, issue directions in writing to any person, officer or any authority and such person, officer or authority shall be bound to comply with such directions which includes the power direct: -

- a. The closure, prohibition or regulation of any industry, operation or process or
- b. Stoppage or regulation of the supply of electricity or water or any other service.

Therefore, in exercise of the powers conferred under Section 31A of the Air Act, 1981, and in discharge of the functions entrusted under the Water Act, 1974 and the Air Act, 1981, and to ensure compliance with the directions issued by the CPCB on 12.03.2026, you are hereby directed to ensure the following: -

1. To provide/ensure stack monitoring facilities in accordance with the Emission Regulation Part-III (ERP-III) latest by March 28,2026 for all the stacks attached to potential air polluting sources such as Boiler, Furnaces, Thermic Fluid Heaters, Kilns and Process Emissions.
2. To ensure that the position of port-hole should comply with Emission Regulation Part-III (ERP-III) published by CPCB. Special emphasis shall be given to the criteria of compliance of minimum 8D downstream from flow disturbance and minimum 2D from top of stack to ensure laminar flow at sampling point in the stack. For other details pertaining to location of port-hole para 2.5.0 at page 18 of ERP-III may be referred.
3. To provide a separate port hole of 0.1 m diameter for manual emission sampling. For port hole installation para 2.5.2 at page 19 of ERP-III may be referred.
4. In case, if the Online Continuous Emission Monitoring Systems (OCEMS) is mandated as per consent conditions, the plane of port hole for OCEMS should be 500 mm below (vertically) the plane of manual sampling port hole.
5. To ensure that the platform for monitoring should have capacity to bear 300-350 kg of weight, it should have a size of minimum 6 x 4 feet, 800-1000 mm of guard rail to ensure proper space for sampling team and equipment required for monitoring. For monitoring platform installation, para 2.5.3, 2.5.4 & 2.5.6 at page 19 & 20 of ERP-III may be referred.

Regional Office, Bhiwadi
Rajasthan State Pollution Control Board
Plot No. GO-1, Phase-II, RIICO Industrial Area, Bhiwadi-301019
e-mail: robhiwadi@gmail.com

6. To ensure that the port hole and ladder facility is safe to carry out monitoring. In place of monkey ladder, spiral type/scaffold ladder shall be provided to ensure safety of monitoring personnel.

You are further directed to submit a compliance report to this office regarding the above directions by 28.03.2026.

In the event of failure to comply with the above directions within the stipulated time, the absence of proper stack monitoring facility as per ERP-III and as prescribed above shall be considered as violation and appropriate action shall be taken including closure of the industry, without any further notice in this matter. Further, any other action deemed appropriate under the provisions of the said Acts may also be initiated.

Yours sincerely,

Sub: Directions under Section 31A of the Air (Prevention and Control of Pollution) Act, 1981 to provide and maintain stack emission monitoring facilities in accordance with Emission Regulation Part – III (ERP-III) published by CPCB in air polluting industry: regarding
Ref: Directions issued by Central Pollution Control Board (CPCB) under Section 18(1)(b) of the Air Act, 1981, to RSPCB vide letter dated 12.03.2026

Sir/Madam

1. Whereas, the Water (Prevention and Control of Pollution) Act, 1974 and the Air (Prevention and Control of Pollution) Act, 1981 (hereinafter collectively referred to as the "Acts") have come into force throughout the country with effect from 23.03.1974 and 16.05.1981, respectively.
2. And whereas, the said Acts have been enacted to provide for the prevention, control, and abatement of water and air pollution and for maintaining and restoring the wholesomeness of water and air, and the Rajasthan State Pollution Control Board (hereinafter referred to as the "Board") has been vested with the powers to take such steps as may be deemed necessary for enforcement of the provisions of the aforesaid Acts.
3. And whereas, under the provisions of Section 24 of the Water Act, no person shall knowingly cause or permit any poisonous, noxious, or polluting matter, determined in accordance with the standards laid down by the Board, to enter any stream, well, sewer, or land.
4. And whereas under the provisions of section 25/26 of the Act, no person shall without the previous consent of the Board establish or take any steps to establish, any industry,

Regional Office, Bhiwadi
Rajasthan State Pollution Control Board

e-mail: robhiwadi@gmail.com

operation or process or any treatment and disposal system or any extension or addition thereto, which is likely to discharge sewage or trade effluent into a stream or well or sewer or on land or bring into use any new or altered outlet for the discharge or sewage or trade effluent or begin to make any new discharge of sewage or trade effluent.

5. And whereas under the provisions of section 21 of the Air Act, no person shall without the previous consent of the Board, establish or operate any industrial plant in an air pollution control area. Industrial plant, under the Air Act, has been defined to mean any plant used for any industrial or trade purposes and emitting any air pollutant into the atmosphere.
6. And whereas under the provisions of section 22 of the Air Act, no person operating any industrial plant, in any air pollution control area shall discharge or cause or permit to be discharged the emission of any air pollutant more than the prescribed standards.
7. And whereas, an industry has been established in the name & style of **M/s Chopra Enterprises**, at **H-1-1359, RIA, Rampura Mundana, Bhiwadi, District Khairthal Tijara** (hereinafter referred to as 'the industry') and the process is such that it generates polluted trade/domestic effluent & air emission.
8. And whereas, the Central Pollution Control Board (CPCB), New Delhi, has published Emission Regulation Part-III (ERP-III) in December 1985, prescribing monitoring requirement for industries including provisions relating to stack monitoring facilities, equipment, and testing procedures for regulation of emissions from industrial sources.
9. And whereas, provision of proper stack monitoring facilities is essential for assessing compliance of industries with prescribed emission standards and for enabling regulatory authorities to undertake effective monitoring and enforcement actions.
10. And whereas, the CPCB vide letter dated 12.03.2026 issued directions to the RSPCB under Section 18(1)(b) of the Air Act, 1981 to ensure compliance of provisions of ERP-III published by CPCB in air polluting industries in Delhi-NCR.
11. And whereas, your industry falls within the ambit of the aforesaid directions issued by CPCB.
12. And whereas the Board may, in exercise of the powers conferred upon it under the provisions of the section 33A of the Water Act and section 31A of the Air Act and in

- a. The closure, prohibition or regulation of any industry, operation or process or
- b. Stoppage or regulation of the supply of electricity or water or any other service.

Therefore, in exercise of the powers conferred under Section 31A of the Air Act, 1981, and in discharge of the functions entrusted under the Water Act, 1974 and the Air Act, 1981, and to ensure compliance with the directions issued by the CPCB on 12.03.2026, you are hereby directed to ensure the following: -

1. To provide/ensure stack monitoring facilities in accordance with the Emission Regulation Part-III (ERP-III) latest by March 28,2026 for all the stacks attached to potential air polluting sources such as Boiler, Furnaces, Thermic Fluid Heaters, Kilns and Process Emissions.
2. To ensure that the position of port-hole should comply with Emission Regulation Part-III (ERP-III) published by CPCB. Special emphasis shall be given to the criteria of compliance of minimum 8D downstream from flow disturbance and minimum 2D from top of stack to ensure laminar flow at sampling point in the stack. For other details pertaining to location of port-hole para 2.5.0 at page 18 of ERP-III may be referred.
3. To provide a separate port hole of 0.1 m diameter for manual emission sampling. For port hole installation para 2.5.2 at page 19 of ERP-III may be referred.
4. In case, if the Online Continuous Emission Monitoring Systems (OCEMS) is mandated as per consent conditions, the plane of port hole for OCEMS should be 500 mm below (vertically) the plane of manual sampling port hole.
5. To ensure that the platform for monitoring should have capacity to bear 300-350 kg of weight, it should have a size of minimum 6 x 4 feet, 800-1000 mm of guard rail to ensure proper space for sampling team and equipment required for monitoring. For monitoring platform installation, para 2.5.3, 2.5.4 & 2.5.6 at page 19 & 20 of ERP-III may be referred.

Regional Office, Bhiwadi
Rajasthan State Pollution Control Board
Plot No. GO-1, Phase-II, RIICO Industrial Area, Bhiwadi-301019
e-mail: robhiwadi@gmail.com

6. To ensure that the port hole and ladder facility is safe to carry out monitoring. In place of monkey ladder, spiral type/scaffold ladder shall be provided to ensure safety of monitoring personnel.

You are further directed to submit a compliance report to this office regarding the above directions by 28.03.2026.

In the event of failure to comply with the above directions within the stipulated time, the absence of proper stack monitoring facility as per ERP-III and as prescribed above shall be considered as violation and appropriate action shall be taken including closure of the industry, without any further notice in this matter. Further, any other action deemed appropriate under the provisions of the said Acts may also be initiated.

Yours sincerely,

a

Sub: Directions under Section 31A of the Air (Prevention and Control of Pollution) Act, 1981 to provide and maintain stack emission monitoring facilities in accordance with Emission Regulation Part – III (ERP-III) published by CPCB in air polluting industry: regarding

Ref: Directions issued by Central Pollution Control Board (CPCB) under Section 18(1)(b) of the Air Act, 1981, to RSPCB vide letter dated 12.03.2026

Sir/Madam

1. Whereas, the Water (Prevention and Control of Pollution) Act, 1974 and the Air (Prevention and Control of Pollution) Act, 1981 (hereinafter collectively referred to as the "Acts") have come into force throughout the country with effect from 23.03.1974 and 16.05.1981, respectively.
2. And whereas, the said Acts have been enacted to provide for the prevention, control, and abatement of water and air pollution and for maintaining and restoring the wholesomeness of water and air, and the Rajasthan State Pollution Control Board (hereinafter referred to as the "Board") has been vested with the powers to take such steps as may be deemed necessary for enforcement of the provisions of the aforesaid Acts.
3. And whereas, under the provisions of Section 24 of the Water Act, no person shall knowingly cause or permit any poisonous, noxious, or polluting matter, determined in accordance with the standards laid down by the Board, to enter any stream, well, sewer, or land.
4. And whereas under the provisions of section 25/26 of the Act, no person shall without the previous consent of the Board establish or take any steps to establish, any industry,

Regional Office, Bhiwadi
Rajasthan State Pollution Control Board
Plot No. GO-1, Phase-II, RIICO Industrial Area, Bhiwadi-301019
e-mail: robhiwadi@gmail.com

operation or process or any treatment and disposal system or any extension or addition thereto, which is likely to discharge sewage or trade effluent into a stream or well or sewer or on land or bring into use any new or altered outlet for the discharge or sewage or trade effluent or begin to make any new discharge of sewage or trade effluent.

5. And whereas under the provisions of section 21 of the Air Act, no person shall without the previous consent of the Board, establish or operate any industrial plant in an air pollution control area. Industrial plant, under the Air Act, has been defined to mean any plant used for any industrial or trade purposes and emitting any air pollutant into the atmosphere.
6. And whereas under the provisions of section 22 of the Air Act, no person operating any industrial plant, in any air pollution control area shall discharge or cause or permit to be discharged the emission of any air pollutant more than the prescribed standards.
7. And whereas, an industry has been established in the name & style of **M/s ARK MOULD AND TOOLS at G1-609, RIA, Khushkhera, District Khairthal Tijara** (hereinafter referred to as 'the industry') and the process is such that it generates polluted trade/domestic effluent & air emission.
8. And whereas, the Central Pollution Control Board (CPCB), New Delhi, has published Emission Regulation Part-III (ERP-III) in December 1985, prescribing monitoring requirement for industries including provisions relating to stack monitoring facilities, equipment, and testing procedures for regulation of emissions from industrial sources.
9. And whereas, provision of proper stack monitoring facilities is essential for assessing compliance of industries with prescribed emission standards and for enabling regulatory authorities to undertake effective monitoring and enforcement actions.
10. And whereas, the CPCB vide letter dated 12.03.2026 issued directions to the RSPCB under Section 18(1)(b) of the Air Act, 1981 to ensure compliance of provisions of ERP-III published by CPCB in air polluting industries in Delhi-NCR.
11. And whereas, your industry falls within the ambit of the aforesaid directions issued by CPCB.
12. And whereas the Board may, in exercise of the powers conferred upon it under the provisions of the section 33A of the Water Act and section 31A of the Air Act and in

- a. The closure, prohibition or regulation of any industry, operation or process or
- b. Stoppage or regulation of the supply of electricity or water or any other service.

Therefore, in exercise of the powers conferred under Section 31A of the Air Act, 1981, and in discharge of the functions entrusted under the Water Act, 1974 and the Air Act, 1981, and to ensure compliance with the directions issued by the CPCB on 12.03.2026, you are hereby directed to ensure the following: -

1. To provide/ensure stack monitoring facilities in accordance with the Emission Regulation Part-III (ERP-III) latest by March 28,2026 for all the stacks attached to potential air polluting sources such as Boiler, Furnaces, Thermic Fluid Heaters, Kilns and Process Emissions.
2. To ensure that the position of port-hole should comply with Emission Regulation Part-III (ERP-III) published by CPCB. Special emphasis shall be given to the criteria of compliance of minimum 8D downstream from flow disturbance and minimum 2D from top of stack to ensure laminar flow at sampling point in the stack. For other details pertaining to location of port-hole para 2.5.0 at page 18 of ERP-III may be referred.
3. To provide a separate port hole of 0.1 m diameter for manual emission sampling. For port hole installation para 2.5.2 at page 19 of ERP-III may be referred.
4. In case, if the Online Continuous Emission Monitoring Systems (OCEMS) is mandated as per consent conditions, the plane of port hole for OCEMS should be 500 mm below (vertically) the plane of manual sampling port hole.
5. To ensure that the platform for monitoring should have capacity to bear 300-350 kg of weight, it should have a size of minimum 6 x 4 feet, 800-1000 mm of guard rail to ensure proper space for sampling team and equipment required for monitoring. For monitoring platform installation, para 2.5.3, 2.5.4 & 2.5.6 at page 19 & 20 of ERP-III may be referred.

Regional Office, Bhiwadi
Rajasthan State Pollution Control Board
Plot No. GO-1, Phase-II, RIICO Industrial Area, Bhiwadi-301019
e-mail: robhiwadi@gmail.com

6. To ensure that the port hole and ladder facility is safe to carry out monitoring. In place of monkey ladder, spiral type/scaffold ladder shall be provided to ensure safety of monitoring personnel.

You are further directed to submit a compliance report to this office regarding the above directions by 28.03.2026.

In the event of failure to comply with the above directions within the stipulated time, the absence of proper stack monitoring facility as per ERP-III and as prescribed above shall be considered as violation and appropriate action shall be taken including closure of the industry, without any further notice in this matter. Further, any other action deemed appropriate under the provisions of the said Acts may also be initiated.

Yours sincerely,

- b. Stoppage or regulation of the supply of electricity or water or any other service.

Therefore, in exercise of the powers conferred under Section 31A of the Air Act, 1981, and in discharge of the functions entrusted under the Water Act, 1974 and the Air Act, 1981, and to ensure compliance with the directions issued by the CPCB on 12.03.2026, you are hereby directed to ensure the following: -

1. To provide/ensure stack monitoring facilities in accordance with the Emission Regulation Part-III (ERP-III) latest by March 28,2026 for all the stacks attached to potential air polluting sources such as Boiler, Furnaces, Thermic Fluid Heaters, Kilns and Process Emissions.
2. To ensure that the position of port-hole should comply with Emission Regulation Part-III (ERP-III) published by CPCB. Special emphasis shall be given to the criteria of compliance of minimum 8D downstream from flow disturbance and minimum 2D from top of stack to ensure laminar flow at sampling point in the stack. For other details pertaining to location of port-hole para 2.5.0 at page 18 of ERP-III may be referred.
3. To provide a separate port hole of 0.1 m diameter for manual emission sampling. For port hole installation para 2.5.2 at page 19 of ERP-III may be referred.
4. In case, if the Online Continuous Emission Monitoring Systems (OCEMS) is mandated as per consent conditions, the plane of port hole for OCEMS should be 500 mm below (vertically) the plane of manual sampling port hole.
5. To ensure that the platform for monitoring should have capacity to bear 300-350 kg of weight, it should have a size of minimum 6 x 4 feet, 800-1000 mm of guard rail to ensure proper space for sampling team and equipment required for monitoring. For monitoring platform installation, para 2.5.3, 2.5.4 & 2.5.6 at page 19 & 20 of ERP-III may be referred.

Regional Office, Bhiwadi
Rajasthan State Pollution Control Board
Plot No. GO-1, Phase-II, RIICO Industrial Area, Bhiwadi-301019
e-mail: robhiwadi@gmail.com

6. To ensure that the port hole and ladder facility is safe to carry out monitoring. In place of monkey ladder, spiral type/scaffold ladder shall be provided to ensure safety of monitoring personnel.

You are further directed to submit a compliance report to this office regarding the above directions by 28.03.2026.

In the event of failure to comply with the above directions within the stipulated time, the absence of proper stack monitoring facility as per ERP-III and as prescribed above shall be considered as violation and appropriate action shall be taken including closure of the industry, without any further notice in this matter. Further, any other action deemed appropriate under the provisions of the said Acts may also be initiated.

Yours sincerely,

Sub: Directions under Section 31A of the Air (Prevention and Control of Pollution) Act, 1981 to provide and maintain stack emission monitoring facilities in accordance with Emission Regulation Part – III (ERP-III) published by CPCB in air polluting industry: regarding

Ref: Directions issued by Central Pollution Control Board (CPCB) under Section 18(1)(b) of the Air Act, 1981, to RSPCB vide letter dated 12.03.2026

Sir/Madam

1. Whereas, the Water (Prevention and Control of Pollution) Act, 1974 and the Air (Prevention and Control of Pollution) Act, 1981 (hereinafter collectively referred to as the "Acts") have come into force throughout the country with effect from 23.03.1974 and 16.05.1981, respectively.
2. And whereas, the said Acts have been enacted to provide for the prevention, control, and abatement of water and air pollution and for maintaining and restoring the wholesomeness of water and air, and the Rajasthan State Pollution Control Board (hereinafter referred to as the "Board") has been vested with the powers to take such steps as may be deemed necessary for enforcement of the provisions of the aforesaid Acts.
3. And whereas, under the provisions of Section 24 of the Water Act, no person shall knowingly cause or permit any poisonous, noxious, or polluting matter, determined in accordance with the standards laid down by the Board, to enter any stream, well, sewer, or land.
4. And whereas under the provisions of section 25/26 of the Act, no person shall without the previous consent of the Board establish or take any steps to establish, any industry,

Regional Office, Bhiwadi
Rajasthan State Pollution Control Board

e-mail: robhiwadi@gmail.com

operation or process or any treatment and disposal system or any extension or addition thereto, which is likely to discharge sewage or trade effluent into a stream or well or sewer or on land or bring into use any new or altered outlet for the discharge or sewage or trade effluent or begin to make any new discharge of sewage or trade effluent.

5. And whereas under the provisions of section 21 of the Air Act, no person shall without the previous consent of the Board, establish or operate any industrial plant in an air pollution control area. Industrial plant, under the Air Act, has been defined to mean any plant used for any industrial or trade purposes and emitting any air pollutant into the atmosphere.
6. And whereas under the provisions of section 22 of the Air Act, no person operating any industrial plant, in any air pollution control area shall discharge or cause or permit to be discharged the emission of any air pollutant more than the prescribed standards.
7. And whereas, an industry has been established in the name & style of **M/s EUROSPARK ENERGY PVT. LTD. at A-1118 (E) RIA Bhiwadi, District Khairthal Tijara** (hereinafter referred to as 'the industry') and the process is such that it generates polluted trade/domestic effluent & air emission.
8. And whereas, the Central Pollution Control Board (CPCB), New Delhi, has published Emission Regulation Part-III (ERP-III) in December 1985, prescribing monitoring requirement for industries including provisions relating to stack monitoring facilities, equipment, and testing procedures for regulation of emissions from industrial sources.
9. And whereas, provision of proper stack monitoring facilities is essential for assessing compliance of industries with prescribed emission standards and for enabling regulatory authorities to undertake effective monitoring and enforcement actions.
10. And whereas, the CPCB vide letter dated 12.03.2026 issued directions to the RSPCB under Section 18(1)(b) of the Air Act, 1981 to ensure compliance of provisions of ERP-III published by CPCB in air polluting industries in Delhi-NCR.
11. And whereas, your industry falls within the ambit of the aforesaid directions issued by CPCB.
12. And whereas the Board may, in exercise of the powers conferred upon it under the provisions of the section 33A of the Water Act and section 31A of the Air Act and in

- b. Stoppage or regulation of the supply of electricity or water or any other service.

Therefore, in exercise of the powers conferred under Section 31A of the Air Act, 1981, and in discharge of the functions entrusted under the Water Act, 1974 and the Air Act, 1981, and to ensure compliance with the directions issued by the CPCB on 12.03.2026, you are hereby directed to ensure the following: -

1. To provide/ensure stack monitoring facilities in accordance with the Emission Regulation Part-III (ERP-III) latest by March 28,2026 for all the stacks attached to potential air polluting sources such as Boiler, Furnaces, Thermic Fluid Heaters, Kilns and Process Emissions.
2. To ensure that the position of port-hole should comply with Emission Regulation Part-III (ERP-III) published by CPCB. Special emphasis shall be given to the criteria of compliance of minimum 8D downstream from flow disturbance and minimum 2D from top of stack to ensure laminar flow at sampling point in the stack. For other details pertaining to location of port-hole para 2.5.0 at page 18 of ERP-III may be referred.
3. To provide a separate port hole of 0.1 m diameter for manual emission sampling. For port hole installation para 2.5.2 at page 19 of ERP-III may be referred.
4. In case, if the Online Continuous Emission Monitoring Systems (OCEMS) is mandated as per consent conditions, the plane of port hole for OCEMS should be 500 mm below (vertically) the plane of manual sampling port hole.
5. To ensure that the platform for monitoring should have capacity to bear 300-350 kg of weight, it should have a size of minimum 6 x 4 feet, 800-1000 mm of guard rail to ensure proper space for sampling team and equipment required for monitoring. For monitoring platform installation, para 2.5.3, 2.5.4 & 2.5.6 at page 19 & 20 of ERP-III may be referred.

Regional Office, Bhiwadi
Rajasthan State Pollution Control Board
Plot No. GO-1, Phase-II, RIICO Industrial Area, Bhiwadi-301019
e-mail: robhiwadi@gmail.com

6. To ensure that the port hole and ladder facility is safe to carry out monitoring. In place of monkey ladder, spiral type/scaffold ladder shall be provided to ensure safety of monitoring personnel.

You are further directed to submit a compliance report to this office regarding the above directions by 28.03.2026.

In the event of failure to comply with the above directions within the stipulated time, the absence of proper stack monitoring facility as per ERP-III and as prescribed above shall be considered as violation and appropriate action shall be taken including closure of the industry, without any further notice in this matter. Further, any other action deemed appropriate under the provisions of the said Acts may also be initiated.

Yours sincerely,

Sub: Directions under Section 31A of the Air (Prevention and Control of Pollution) Act, 1981 to provide and maintain stack emission monitoring facilities in accordance with Emission Regulation Part – III (ERP-III) published by CPCB in air polluting industry: regarding
Ref: Directions issued by Central Pollution Control Board (CPCB) under Section 18(1)(b) of the Air Act, 1981, to RSPCB vide letter dated 12.03.2026

Sir/Madam

1. Whereas, the Water (Prevention and Control of Pollution) Act, 1974 and the Air (Prevention and Control of Pollution) Act, 1981 (hereinafter collectively referred to as the "Acts") have come into force throughout the country with effect from 23.03.1974 and 16.05.1981, respectively.
2. And whereas, the said Acts have been enacted to provide for the prevention, control, and abatement of water and air pollution and for maintaining and restoring the wholesomeness of water and air, and the Rajasthan State Pollution Control Board (hereinafter referred to as the "Board") has been vested with the powers to take such steps as may be deemed necessary for enforcement of the provisions of the aforesaid Acts.
3. And whereas, under the provisions of Section 24 of the Water Act, no person shall knowingly cause or permit any poisonous, noxious, or polluting matter, determined in accordance with the standards laid down by the Board, to enter any stream, well, sewer, or land.
4. And whereas under the provisions of section 25/26 of the Act, no person shall without the previous consent of the Board establish or take any steps to establish, any industry,

Regional Office, Bhiwadi
Rajasthan State Pollution Control Board

- b. Stoppage or regulation of the supply of electricity or water or any other service.

Therefore, in exercise of the powers conferred under Section 31A of the Air Act, 1981, and in discharge of the functions entrusted under the Water Act, 1974 and the Air Act, 1981, and to ensure compliance with the directions issued by the CPCB on 12.03.2026, you are hereby directed to ensure the following: -

1. To provide/ensure stack monitoring facilities in accordance with the Emission Regulation Part-III (ERP-III) latest by March 28,2026 for all the stacks attached to potential air polluting sources such as Boiler, Furnaces, Thermic Fluid Heaters, Kilns and Process Emissions.
2. To ensure that the position of port-hole should comply with Emission Regulation Part-III (ERP-III) published by CPCB. Special emphasis shall be given to the criteria of compliance of minimum 8D downstream from flow disturbance and minimum 2D from top of stack to ensure laminar flow at sampling point in the stack. For other details pertaining to location of port-hole para 2.5.0 at page 18 of ERP-III may be referred.
3. To provide a separate port hole of 0.1 m diameter for manual emission sampling. For port hole installation para 2.5.2 at page 19 of ERP-III may be referred.
4. In case, if the Online Continuous Emission Monitoring Systems (OCEMS) is mandated as per consent conditions, the plane of port hole for OCEMS should be 500 mm below (vertically) the plane of manual sampling port hole.
5. To ensure that the platform for monitoring should have capacity to bear 300-350 kg of weight, it should have a size of minimum 6 x 4 feet, 800-1000 mm of guard rail to ensure proper space for sampling team and equipment required for monitoring. For monitoring platform installation, para 2.5.3, 2.5.4 & 2.5.6 at page 19 & 20 of ERP-III may be referred.

Regional Office, Bhiwadi
Rajasthan State Pollution Control Board
Plot No. GO-1, Phase-II, RIICO Industrial Area, Bhiwadi-301019
e-mail: robhiwadi@gmail.com

6. To ensure that the port hole and ladder facility is safe to carry out monitoring. In place of monkey ladder, spiral type/scaffold ladder shall be provided to ensure safety of monitoring personnel.

You are further directed to submit a compliance report to this office regarding the above directions by 28.03.2026.

In the event of failure to comply with the above directions within the stipulated time, the absence of proper stack monitoring facility as per ERP-III and as prescribed above shall be considered as violation and appropriate action shall be taken including closure of the industry, without any further notice in this matter. Further, any other action deemed appropriate under the provisions of the said Acts may also be initiated.

Yours sincerely,

Sub: Directions under Section 31A of the Air (Prevention and Control of Pollution) Act, 1981 to provide and maintain stack emission monitoring facilities in accordance with Emission Regulation Part – III (ERP-III) published by CPCB in air polluting industry: regarding

Ref: Directions issued by Central Pollution Control Board (CPCB) under Section 18(1)(b) of the Air Act, 1981, to RSPCB vide letter dated 12.03.2026

Sir/Madam

1. Whereas, the Water (Prevention and Control of Pollution) Act, 1974 and the Air (Prevention and Control of Pollution) Act, 1981 (hereinafter collectively referred to as the "Acts") have come into force throughout the country with effect from 23.03.1974 and 16.05.1981, respectively.
2. And whereas, the said Acts have been enacted to provide for the prevention, control, and abatement of water and air pollution and for maintaining and restoring the wholesomeness of water and air, and the Rajasthan State Pollution Control Board (hereinafter referred to as the "Board") has been vested with the powers to take such steps as may be deemed necessary for enforcement of the provisions of the aforesaid Acts.
3. And whereas, under the provisions of Section 24 of the Water Act, no person shall knowingly cause or permit any poisonous, noxious, or polluting matter, determined in accordance with the standards laid down by the Board, to enter any stream, well, sewer, or land.
4. And whereas under the provisions of section 25/26 of the Act, no person shall without the previous consent of the Board establish or take any steps to establish, any industry,

- b. Stoppage or regulation of the supply of electricity or water or any other service.

Therefore, in exercise of the powers conferred under Section 31A of the Air Act, 1981, and in discharge of the functions entrusted under the Water Act, 1974 and the Air Act, 1981, and to ensure compliance with the directions issued by the CPCB on 12.03.2026, you are hereby directed to ensure the following: -

1. To provide/ensure stack monitoring facilities in accordance with the Emission Regulation Part-III (ERP-III) latest by March 28,2026 for all the stacks attached to potential air polluting sources such as Boiler, Furnaces, Thermic Fluid Heaters, Kilns and Process Emissions.
2. To ensure that the position of port-hole should comply with Emission Regulation Part-III (ERP-III) published by CPCB. Special emphasis shall be given to the criteria of compliance of minimum 8D downstream from flow disturbance and minimum 2D from top of stack to ensure laminar flow at sampling point in the stack. For other details pertaining to location of port-hole para 2.5.0 at page 18 of ERP-III may be referred.
3. To provide a separate port hole of 0.1 m diameter for manual emission sampling. For port hole installation para 2.5.2 at page 19 of ERP-III may be referred.
4. In case, if the Online Continuous Emission Monitoring Systems (OCEMS) is mandated as per consent conditions, the plane of port hole for OCEMS should be 500 mm below (vertically) the plane of manual sampling port hole.
5. To ensure that the platform for monitoring should have capacity to bear 300-350 kg of weight, it should have a size of minimum 6 x 4 feet, 800-1000 mm of guard rail to ensure proper space for sampling team and equipment required for monitoring. For monitoring platform installation, para 2.5.3, 2.5.4 & 2.5.6 at page 19 & 20 of ERP-III may be referred.

Regional Office, Bhiwadi
Rajasthan State Pollution Control Board
Plot No. GO-1, Phase-II, RIICO Industrial Area, Bhiwadi-301019
e-mail: robhiwadi@gmail.com

6. To ensure that the port hole and ladder facility is safe to carry out monitoring. In place of monkey ladder, spiral type/scaffold ladder shall be provided to ensure safety of monitoring personnel.

You are further directed to submit a compliance report to this office regarding the above directions by 28.03.2026.

In the event of failure to comply with the above directions within the stipulated time, the absence of proper stack monitoring facility as per ERP-III and as prescribed above shall be considered as violation and appropriate action shall be taken including closure of the industry, without any further notice in this matter. Further, any other action deemed appropriate under the provisions of the said Acts may also be initiated.

Yours sincerely,

Sub: Directions under Section 31A of the Air (Prevention and Control of Pollution) Act, 1981 to provide and maintain stack emission monitoring facilities in accordance with Emission Regulation Part – III (ERP-III) published by CPCB in air polluting industry: regarding

Ref: Directions issued by Central Pollution Control Board (CPCB) under Section 18(1)(b) of the Air Act, 1981, to RSPCB vide letter dated 12.03.2026

Sir/Madam

1. Whereas, the Water (Prevention and Control of Pollution) Act, 1974 and the Air (Prevention and Control of Pollution) Act, 1981 (hereinafter collectively referred to as the "Acts") have come into force throughout the country with effect from 23.03.1974 and 16.05.1981, respectively.
2. And whereas, the said Acts have been enacted to provide for the prevention, control, and abatement of water and air pollution and for maintaining and restoring the wholesomeness of water and air, and the Rajasthan State Pollution Control Board (hereinafter referred to as the "Board") has been vested with the powers to take such steps as may be deemed necessary for enforcement of the provisions of the aforesaid Acts.
3. And whereas, under the provisions of Section 24 of the Water Act, no person shall knowingly cause or permit any poisonous, noxious, or polluting matter, determined in accordance with the standards laid down by the Board, to enter any stream, well, sewer, or land.
4. And whereas under the provisions of section 25/26 of the Act, no person shall without the previous consent of the Board establish or take any steps to establish, any industry,

Regional Office, Bhiwadi

Therefore, in exercise of the powers conferred under Section 31A of the Air Act, 1981, and in discharge of the functions entrusted under the Water Act, 1974 and the Air Act, 1981, and to ensure compliance with the directions issued by the CPCB on 12.03.2026, you are hereby directed to ensure the following: -

1. To provide/ensure stack monitoring facilities in accordance with the Emission Regulation Part-III (ERP-III) latest by March 28,2026 for all the stacks attached to potential air polluting sources such as Boiler, Furnaces, Thermic Fluid Heaters, Kilns and Process Emissions.
2. To ensure that the position of port-hole should comply with Emission Regulation Part-III (ERP-III) published by CPCB. Special emphasis shall be given to the criteria of compliance of minimum 8D downstream from flow disturbance and minimum 2D from top of stack to ensure laminar flow at sampling point in the stack. For other details pertaining to location of port-hole para 2.5.0 at page 18 of ERP-III may be referred.
3. To provide a separate port hole of 0.1 m diameter for manual emission sampling. For port hole installation para 2.5.2 at page 19 of ERP-III may be referred.
4. In case, if the Online Continuous Emission Monitoring Systems (OCEMS) is mandated as per consent conditions, the plane of port hole for OCEMS should be 500 mm below (vertically) the plane of manual sampling port hole.
5. To ensure that the platform for monitoring should have capacity to bear 300-350 kg of weight, it should have a size of minimum 6 x 4 feet, 800-1000 mm of guard rail to ensure proper space for sampling team and equipment required for monitoring. For monitoring platform installation, para 2.5.3, 2.5.4 & 2.5.6 at page 19 & 20 of ERP-III may be referred.

Regional Office, Bhiwadi
Rajasthan State Pollution Control Board
Plot No. GO-1, Phase-II, RIICO Industrial Area, Bhiwadi-301019
e-mail: robhiwadi@gmail.com

6. To ensure that the port hole and ladder facility is safe to carry out monitoring. In place of monkey ladder, spiral type/scaffold ladder shall be provided to ensure safety of monitoring personnel.

You are further directed to submit a compliance report to this office regarding the above directions by 28.03.2026.

In the event of failure to comply with the above directions within the stipulated time, the absence of proper stack monitoring facility as per ERP-III and as prescribed above shall be considered as violation and appropriate action shall be taken including closure of the industry, without any further notice in this matter. Further, any other action deemed appropriate under the provisions of the said Acts may also be initiated.

Yours sincerely,

- Sub: Directions under Section 31A of the Air (Prevention and Control of Pollution) Act, 1981 to provide and maintain stack emission monitoring facilities in accordance with Emission Regulation Part – III (ERP-III) published by CPCB in air polluting industry: regarding
- Ref: Directions issued by Central Pollution Control Board (CPCB) under Section 18(1)(b) of the Air Act, 1981, to RSPCB vide letter dated 12.03.2026

Sir/Madam

1. Whereas, the Water (Prevention and Control of Pollution) Act, 1974 and the Air (Prevention and Control of Pollution) Act, 1981 (hereinafter collectively referred to as the "Acts") have come into force throughout the country with effect from 23.03.1974 and 16.05.1981, respectively.
2. And whereas, the said Acts have been enacted to provide for the prevention, control, and abatement of water and air pollution and for maintaining and restoring the wholesomeness of water and air, and the Rajasthan State Pollution Control Board (hereinafter referred to as the "Board") has been vested with the powers to take such steps as may be deemed necessary for enforcement of the provisions of the aforesaid Acts.
3. And whereas, under the provisions of Section 24 of the Water Act, no person shall knowingly cause or permit any poisonous, noxious, or polluting matter, determined in accordance with the standards laid down by the Board, to enter any stream, well, sewer, or land.
4. And whereas under the provisions of section 25/26 of the Act, no person shall without the previous consent of the Board establish or take any steps to establish, any industry,

Regional Office, Bhiwadi

Therefore, in exercise of the powers conferred under Section 31A of the Air Act, 1981, and in discharge of the functions entrusted under the Water Act, 1974 and the Air Act, 1981, and to ensure compliance with the directions issued by the CPCB on 12.03.2026, you are hereby directed to ensure the following: –

1. To provide/ensure stack monitoring facilities in accordance with the Emission Regulation Part-III (ERP-III) latest by March 28,2026 for all the stacks attached to potential air polluting sources such as Boiler, Furnaces, Thermic Fluid Heaters, Kilns and Process Emissions.
2. To ensure that the position of port-hole should comply with Emission Regulation Part-III (ERP-III) published by CPCB. Special emphasis shall be given to the criteria of compliance of minimum 8D downstream from flow disturbance and minimum 2D from top of stack to ensure laminar flow at sampling point in the stack. For other details pertaining to location of port-hole para 2.5.0 at page 18 of ERP-III may be referred.
3. To provide a separate port hole of 0.1 m diameter for manual emission sampling. For port hole installation para 2.5.2 at page 19 of ERP-III may be referred.
4. In case, if the Online Continuous Emission Monitoring Systems (OCEMS) is mandated as per consent conditions, the plane of port hole for OCEMS should be 500 mm below (vertically) the plane of manual sampling port hole.
5. To ensure that the platform for monitoring should have capacity to bear 300–350 kg of weight, it should have a size of minimum 6 x 4 feet, 800–1000 mm of guard rail to ensure proper space for sampling team and equipment required for monitoring. For monitoring platform installation, para 2.5.3, 2.5.4 & 2.5.6 at page 19 & 20 of ERP-III may be referred.

Regional Office, Bhiwadi
Rajasthan State Pollution Control Board
Plot No. GO-1, Phase-II, RIICO Industrial Area, Bhiwadi-301019
e-mail: robhiwadi@gmail.com

6. To ensure that the port hole and ladder facility is safe to carry out monitoring. In place of monkey ladder, spiral type/scaffold ladder shall be provided to ensure safety of monitoring personnel.

You are further directed to submit a compliance report to this office regarding the above directions by 28.03.2026.

In the event of failure to comply with the above directions within the stipulated time, the absence of proper stack monitoring facility as per ERP-III and as prescribed above shall be considered as violation and appropriate action shall be taken including closure of the industry, without any further notice in this matter. Further, any other action deemed appropriate under the provisions of the said Acts may also be initiated.

Yours sincerely,

Sub: Directions under Section 31A of the Air (Prevention and Control of Pollution) Act, 1981 to provide and maintain stack emission monitoring facilities in accordance with Emission Regulation Part – III (ERP-III) published by CPCB in air polluting industry: regarding
Ref: Directions issued by Central Pollution Control Board (CPCB) under Section 18(1)(b) of the Air Act, 1981, to RSPCB vide letter dated 12.03.2026

Sir/Madam

1. Whereas, the Water (Prevention and Control of Pollution) Act, 1974 and the Air (Prevention and Control of Pollution) Act, 1981 (hereinafter collectively referred to as the "Acts") have come into force throughout the country with effect from 23.03.1974 and 16.05.1981, respectively.
2. And whereas, the said Acts have been enacted to provide for the prevention, control, and abatement of water and air pollution and for maintaining and restoring the wholesomeness of water and air, and the Rajasthan State Pollution Control Board (hereinafter referred to as the "Board") has been vested with the powers to take such steps as may be deemed necessary for enforcement of the provisions of the aforesaid Acts.
3. And whereas, under the provisions of Section 24 of the Water Act, no person shall knowingly cause or permit any poisonous, noxious, or polluting matter, determined in accordance with the standards laid down by the Board, to enter any stream, well, sewer, or land.
4. And whereas under the provisions of section 25/26 of the Act, no person shall without the previous consent of the Board establish or take any steps to establish, any industry,

Regional Office, Bhiwadi
Rajasthan State Pollution Control Board

e-mail: robhiwadi@gmail.com

operation or process or any treatment and disposal system or any extension or addition thereto, which is likely to discharge sewage or trade effluent into a stream or well or sewer or on land or bring into use any new or altered outlet for the discharge or sewage or trade effluent or begin to make any new discharge of sewage or trade effluent.

5. And whereas under the provisions of section 21 of the Air Act, no person shall without the previous consent of the Board, establish or operate any industrial plant in an air pollution control area. Industrial plant, under the Air Act, has been defined to mean any plant used for any industrial or trade purposes and emitting any air pollutant into the atmosphere.
6. And whereas under the provisions of section 22 of the Air Act, no person operating any industrial plant, in any air pollution control area shall discharge or cause or permit to be discharged the emission of any air pollutant more than the prescribed standards.
7. And whereas, an industry has been established in the name & style of **M/s PERFECT METAL CASTINGS**, at **H1-1330 F RIICO INDUSTRIAL AREA RAMPUR MUNDANA, District Khairthal Tijara** (hereinafter referred to as 'the industry') and the process is such that it generates polluted trade/domestic effluent & air emission.
8. And whereas, the Central Pollution Control Board (CPCB), New Delhi, has published Emission Regulation Part-III (ERP-III) in December 1985, prescribing monitoring requirement for industries including provisions relating to stack monitoring facilities, equipment, and testing procedures for regulation of emissions from industrial sources.
9. And whereas, provision of proper stack monitoring facilities is essential for assessing compliance of industries with prescribed emission standards and for enabling regulatory authorities to undertake effective monitoring and enforcement actions.
10. And whereas, the CPCB vide letter dated 12.03.2026 issued directions to the RSPCB under Section 18(1)(b) of the Air Act, 1981 to ensure compliance of provisions of ERP-III published by CPCB in air polluting industries in Delhi-NCR.
11. And whereas, your industry falls within the ambit of the aforesaid directions issued by CPCB.
12. And whereas the Board may, in exercise of the powers conferred upon it under the provisions of the section 33A of the Water Act and section 31A of the Air Act and in

- b. Stoppage or regulation of the supply of electricity or water or any other service.

Therefore, in exercise of the powers conferred under Section 31A of the Air Act, 1981, and in discharge of the functions entrusted under the Water Act, 1974 and the Air Act, 1981, and to ensure compliance with the directions issued by the CPCB on 12.03.2026, you are hereby directed to ensure the following: -

1. To provide/ensure stack monitoring facilities in accordance with the Emission Regulation Part-III (ERP-III) latest by March 28,2026 for all the stacks attached to potential air polluting sources such as Boiler, Furnaces, Thermic Fluid Heaters, Kilns and Process Emissions.
2. To ensure that the position of port-hole should comply with Emission Regulation Part-III (ERP-III) published by CPCB. Special emphasis shall be given to the criteria of compliance of minimum 8D downstream from flow disturbance and minimum 2D from top of stack to ensure laminar flow at sampling point in the stack. For other details pertaining to location of port-hole para 2.5.0 at page 18 of ERP-III may be referred.
3. To provide a separate port hole of 0.1 m diameter for manual emission sampling. For port hole installation para 2.5.2 at page 19 of ERP-III may be referred.
4. In case, if the Online Continuous Emission Monitoring Systems (OCEMS) is mandated as per consent conditions, the plane of port hole for OCEMS should be 500 mm below (vertically) the plane of manual sampling port hole.
5. To ensure that the platform for monitoring should have capacity to bear 300-350 kg of weight, it should have a size of minimum 6 x 4 feet, 800-1000 mm of guard rail to ensure proper space for sampling team and equipment required for monitoring. For monitoring platform installation, para 2.5.3, 2.5.4 & 2.5.6 at page 19 & 20 of ERP-III may be referred.

Regional Office, Bhiwadi
Rajasthan State Pollution Control Board
Plot No. GO-1, Phase-II, RIICO Industrial Area, Bhiwadi-301019
e-mail: robhiwadi@gmail.com

6. To ensure that the port hole and ladder facility is safe to carry out monitoring. In place of monkey ladder, spiral type/scaffold ladder shall be provided to ensure safety of monitoring personnel.

You are further directed to submit a compliance report to this office regarding the above directions by 28.03.2026.

In the event of failure to comply with the above directions within the stipulated time, the absence of proper stack monitoring facility as per ERP-III and as prescribed above shall be considered as violation and appropriate action shall be taken including closure of the industry, without any further notice in this matter. Further, any other action deemed appropriate under the provisions of the said Acts may also be initiated.

Yours sincerely,

- a. The closure, prohibition or regulation of any industry, operation or process or
- b. Stoppage or regulation of the supply of electricity or water or any other service.

Therefore, in exercise of the powers conferred under Section 31A of the Air Act, 1981, and in discharge of the functions entrusted under the Water Act, 1974 and the Air Act, 1981, and to ensure compliance with the directions issued by the CPCB on 12.03.2026, you are hereby directed to ensure the following: -

1. To provide/ensure stack monitoring facilities in accordance with the Emission Regulation Part-III (ERP-III) latest by March 28,2026 for all the stacks attached to potential air polluting sources such as Boiler, Furnaces, Thermic Fluid Heaters, Kilns and Process Emissions.
2. To ensure that the position of port-hole should comply with Emission Regulation Part-III (ERP-III) published by CPCB. Special emphasis shall be given to the criteria of compliance of minimum 8D downstream from flow disturbance and minimum 2D from top of stack to ensure laminar flow at sampling point in the stack. For other details pertaining to location of port-hole para 2.5.0 at page 18 of ERP-III may be referred.
3. To provide a separate port hole of 0.1 m diameter for manual emission sampling. For port hole installation para 2.5.2 at page 19 of ERP-III may be referred.
4. In case, if the Online Continuous Emission Monitoring Systems (OCEMS) is mandated as per consent conditions, the plane of port hole for OCEMS should be 500 mm below (vertically) the plane of manual sampling port hole.
5. To ensure that the platform for monitoring should have capacity to bear 300-350 kg of weight, it should have a size of minimum 6 x 4 feet, 800-1000 mm of guard rail to ensure proper space for sampling team and equipment required for monitoring. For monitoring platform installation, para 2.5.3, 2.5.4 & 2.5.6 at page 19 & 20 of ERP-III may be referred.

Regional Office, Bhiwadi
Rajasthan State Pollution Control Board
Plot No. GO-1, Phase-II, RIICO Industrial Area, Bhiwadi-301019
e-mail: robhiwadi@gmail.com

6. To ensure that the port hole and ladder facility is safe to carry out monitoring. In place of monkey ladder, spiral type/scaffold ladder shall be provided to ensure safety of monitoring personnel.

You are further directed to submit a compliance report to this office regarding the above directions by 28.03.2026.

In the event of failure to comply with the above directions within the stipulated time, the absence of proper stack monitoring facility as per ERP-III and as prescribed above shall be considered as violation and appropriate action shall be taken including closure of the industry, without any further notice in this matter. Further, any other action deemed appropriate under the provisions of the said Acts may also be initiated.

Yours sincerely,

- Sub: Directions under Section 31A of the Air (Prevention and Control of Pollution) Act, 1981 to provide and maintain stack emission monitoring facilities in accordance with Emission Regulation Part – III (ERP-III) published by CPCB in air polluting industry: regarding
- Ref: Directions issued by Central Pollution Control Board (CPCB) under Section 18(1)(b) of the Air Act, 1981, to RSPCB vide letter dated 12.03.2026

Sir/Madam

1. Whereas, the Water (Prevention and Control of Pollution) Act, 1974 and the Air (Prevention and Control of Pollution) Act, 1981 (hereinafter collectively referred to as the "Acts") have come into force throughout the country with effect from 23.03.1974 and 16.05.1981, respectively.
2. And whereas, the said Acts have been enacted to provide for the prevention, control, and abatement of water and air pollution and for maintaining and restoring the wholesomeness of water and air, and the Rajasthan State Pollution Control Board (hereinafter referred to as the "Board") has been vested with the powers to take such steps as may be deemed necessary for enforcement of the provisions of the aforesaid Acts.
3. And whereas, under the provisions of Section 24 of the Water Act, no person shall knowingly cause or permit any poisonous, noxious, or polluting matter, determined in accordance with the standards laid down by the Board, to enter any stream, well, sewer, or land.
4. And whereas under the provisions of section 25/26 of the Act, no person shall without the previous consent of the Board establish or take any steps to establish, any industry,

Regional Office, Bhiwadi
Rajasthan State Pollution Control Board
Plot No. GO-1, Phase-II, RIICO Industrial Area, Bhiwadi-301019
e-mail: robhiwadi@gmail.com

operation or process or any treatment and disposal system or any extension or addition thereto, which is likely to discharge sewage or trade effluent into a stream or well or sewer or on land or bring into use any new or altered outlet for the discharge or sewage or trade effluent or begin to make any new discharge of sewage or trade effluent.

5. And whereas under the provisions of section 21 of the Air Act, no person shall without the previous consent of the Board, establish or operate any industrial plant in an air pollution control area. Industrial plant, under the Air Act, has been defined to mean any plant used for any industrial or trade purposes and emitting any air pollutant into the atmosphere.
6. And whereas under the provisions of section 22 of the Air Act, no person operating any industrial plant, in any air pollution control area shall discharge or cause or permit to be discharged the emission of any air pollutant more than the prescribed standards.
7. And whereas, an industry has been established in the name & style of **M/s Paramount Communications Ltd.** at **SP-30A, 30B, & E-31, RIA, Khushkhera, District Khairthal Tijara** (hereinafter referred to as 'the industry') and the process is such that it generates polluted trade/domestic effluent & air emission.
8. And whereas, the Central Pollution Control Board (CPCB), New Delhi, has published Emission Regulation Part-III (ERP-III) in December 1985, prescribing monitoring requirement for industries including provisions relating to stack monitoring facilities, equipment, and testing procedures for regulation of emissions from industrial sources.
9. And whereas, provision of proper stack monitoring facilities is essential for assessing compliance of industries with prescribed emission standards and for enabling regulatory authorities to undertake effective monitoring and enforcement actions.
10. And whereas, the CPCB vide letter dated 12.03.2026 issued directions to the RSPCB under Section 18(1)(b) of the Air Act, 1981 to ensure compliance of provisions of ERP-III published by CPCB in air polluting industries in Delhi-NCR.
11. And whereas, your industry falls within the ambit of the aforesaid directions issued by CPCB.
12. And whereas the Board may, in exercise of the powers conferred upon it under the provisions of the section 33A of the Water Act and section 31A of the Air Act and in

- a. The closure, prohibition or regulation of any industry, operation or process or
- b. Stoppage or regulation of the supply of electricity or water or any other service.

Therefore, in exercise of the powers conferred under Section 31A of the Air Act, 1981, and in discharge of the functions entrusted under the Water Act, 1974 and the Air Act, 1981, and to ensure compliance with the directions issued by the CPCB on 12.03.2026, you are hereby directed to ensure the following: -

1. To provide/ensure stack monitoring facilities in accordance with the Emission Regulation Part-III (ERP-III) latest by March 28,2026 for all the stacks attached to potential air polluting sources such as Boiler, Furnaces, Thermic Fluid Heaters, Kilns and Process Emissions.
2. To ensure that the position of port-hole should comply with Emission Regulation Part-III (ERP-III) published by CPCB. Special emphasis shall be given to the criteria of compliance of minimum 8D downstream from flow disturbance and minimum 2D from top of stack to ensure laminar flow at sampling point in the stack. For other details pertaining to location of port-hole para 2.5.0 at page 18 of ERP-III may be referred.
3. To provide a separate port hole of 0.1 m diameter for manual emission sampling. For port hole installation para 2.5.2 at page 19 of ERP-III may be referred.
4. In case, if the Online Continuous Emission Monitoring Systems (OCEMS) is mandated as per consent conditions, the plane of port hole for OCEMS should be 500 mm below (vertically) the plane of manual sampling port hole.
5. To ensure that the platform for monitoring should have capacity to bear 300-350 kg of weight, it should have a size of minimum 6 x 4 feet, 800-1000 mm of guard rail to ensure proper space for sampling team and equipment required for monitoring. For monitoring platform installation, para 2.5.3, 2.5.4 & 2.5.6 at page 19 & 20 of ERP-III may be referred.

Regional Office, Bhiwadi
Rajasthan State Pollution Control Board
Plot No. GO-1, Phase-II, RIICO Industrial Area, Bhiwadi-301019
e-mail: robhiwadi@gmail.com

6. To ensure that the port hole and ladder facility is safe to carry out monitoring. In place of monkey ladder, spiral type/scaffold ladder shall be provided to ensure safety of monitoring personnel.

You are further directed to submit a compliance report to this office regarding the above directions by 28.03.2026.

In the event of failure to comply with the above directions within the stipulated time, the absence of proper stack monitoring facility as per ERP-III and as prescribed above shall be considered as violation and appropriate action shall be taken including closure of the industry, without any further notice in this matter. Further, any other action deemed appropriate under the provisions of the said Acts may also be initiated.

Yours sincerely,

Sub: Directions under Section 31A of the Air (Prevention and Control of Pollution) Act, 1981 to provide and maintain stack emission monitoring facilities in accordance with Emission Regulation Part – III (ERP-III) published by CPCB in air polluting industry: regarding

Ref: Directions issued by Central Pollution Control Board (CPCB) under Section 18(1)(b) of the Air Act, 1981, to RSPCB vide letter dated 12.03.2026

Sir/Madam

1. Whereas, the Water (Prevention and Control of Pollution) Act, 1974 and the Air (Prevention and Control of Pollution) Act, 1981 (hereinafter collectively referred to as the "Acts") have come into force throughout the country with effect from 23.03.1974 and 16.05.1981, respectively.
2. And whereas, the said Acts have been enacted to provide for the prevention, control, and abatement of water and air pollution and for maintaining and restoring the wholesomeness of water and air, and the Rajasthan State Pollution Control Board (hereinafter referred to as the "Board") has been vested with the powers to take such steps as may be deemed necessary for enforcement of the provisions of the aforesaid Acts.
3. And whereas, under the provisions of Section 24 of the Water Act, no person shall knowingly cause or permit any poisonous, noxious, or polluting matter, determined in accordance with the standards laid down by the Board, to enter any stream, well, sewer, or land.
4. And whereas under the provisions of section 25/26 of the Act, no person shall without the previous consent of the Board establish or take any steps to establish, any industry,

Regional Office, Bhiwadi
Rajasthan State Pollution Control Board

e-mail: robhiwadi@gmail.com

operation or process or any treatment and disposal system or any extension or addition thereto, which is likely to discharge sewage or trade effluent into a stream or well or sewer or on land or bring into use any new or altered outlet for the discharge or sewage or trade effluent or begin to make any new discharge of sewage or trade effluent.

5. And whereas under the provisions of section 21 of the Air Act, no person shall without the previous consent of the Board, establish or operate any industrial plant in an air pollution control area. Industrial plant, under the Air Act, has been defined to mean any plant used for any industrial or trade purposes and emitting any air pollutant into the atmosphere.
6. And whereas under the provisions of section 22 of the Air Act, no person operating any industrial plant, in any air pollution control area shall discharge or cause or permit to be discharged the emission of any air pollutant more than the prescribed standards.
7. And whereas, an industry has been established in the name & style of **M/s KEI Industries Ltd.** at **SP-922, RIA, Bhiwadi, District Khairthal Tijara** (hereinafter referred to as 'the industry') and the process is such that it generates polluted trade/domestic effluent & air emission.
8. And whereas, the Central Pollution Control Board (CPCB), New Delhi, has published Emission Regulation Part-III (ERP-III) in December 1985, prescribing monitoring requirement for industries including provisions relating to stack monitoring facilities, equipment, and testing procedures for regulation of emissions from industrial sources.
9. And whereas, provision of proper stack monitoring facilities is essential for assessing compliance of industries with prescribed emission standards and for enabling regulatory authorities to undertake effective monitoring and enforcement actions.
10. And whereas, the CPCB vide letter dated 12.03.2026 issued directions to the RSPCB under Section 18(1)(b) of the Air Act, 1981 to ensure compliance of provisions of ERP-III published by CPCB in air polluting industries in Delhi-NCR.
11. And whereas, your industry falls within the ambit of the aforesaid directions issued by CPCB.
12. And whereas the Board may, in exercise of the powers conferred upon it under the provisions of the section 33A of the Water Act and section 31A of the Air Act and in

- a. The closure, prohibition or regulation of any industry, operation or process or
- b. Stoppage or regulation of the supply of electricity or water or any other service.

Therefore, in exercise of the powers conferred under Section 31A of the Air Act, 1981, and in discharge of the functions entrusted under the Water Act, 1974 and the Air Act, 1981, and to ensure compliance with the directions issued by the CPCB on 12.03.2026, you are hereby directed to ensure the following: -

1. To provide/ensure stack monitoring facilities in accordance with the Emission Regulation Part-III (ERP-III) latest by March 28,2026 for all the stacks attached to potential air polluting sources such as Boiler, Furnaces, Thermic Fluid Heaters, Kilns and Process Emissions.
2. To ensure that the position of port-hole should comply with Emission Regulation Part-III (ERP-III) published by CPCB. Special emphasis shall be given to the criteria of compliance of minimum 8D downstream from flow disturbance and minimum 2D from top of stack to ensure laminar flow at sampling point in the stack. For other details pertaining to location of port-hole para 2.5.0 at page 18 of ERP-III may be referred.
3. To provide a separate port hole of 0.1 m diameter for manual emission sampling. For port hole installation para 2.5.2 at page 19 of ERP-III may be referred.
4. In case, if the Online Continuous Emission Monitoring Systems (OCEMS) is mandated as per consent conditions, the plane of port hole for OCEMS should be 500 mm below (vertically) the plane of manual sampling port hole.
5. To ensure that the platform for monitoring should have capacity to bear 300-350 kg of weight, it should have a size of minimum 6 x 4 feet, 800-1000 mm of guard rail to ensure proper space for sampling team and equipment required for monitoring. For monitoring platform installation, para 2.5.3, 2.5.4 & 2.5.6 at page 19 & 20 of ERP-III may be referred.

Regional Office, Bhiwadi
Rajasthan State Pollution Control Board
Plot No. GO-1, Phase-II, RIICO Industrial Area, Bhiwadi-301019
e-mail: robhiwadi@gmail.com

6. To ensure that the port hole and ladder facility is safe to carry out monitoring. In place of monkey ladder, spiral type/scaffold ladder shall be provided to ensure safety of monitoring personnel.

You are further directed to submit a compliance report to this office regarding the above directions by 28.03.2026.

In the event of failure to comply with the above directions within the stipulated time, the absence of proper stack monitoring facility as per ERP-III and as prescribed above shall be considered as violation and appropriate action shall be taken including closure of the industry, without any further notice in this matter. Further, any other action deemed appropriate under the provisions of the said Acts may also be initiated.

Yours sincerely,

a

Sub: Directions under Section 31A of the Air (Prevention and Control of Pollution) Act, 1981 to provide and maintain stack emission monitoring facilities in accordance with Emission Regulation Part – III (ERP-III) published by CPCB in air polluting industry: regarding

Ref: Directions issued by Central Pollution Control Board (CPCB) under Section 18(1)(b) of the Air Act, 1981, to RSPCB vide letter dated 12.03.2026

Sir/Madam

1. Whereas, the Water (Prevention and Control of Pollution) Act, 1974 and the Air (Prevention and Control of Pollution) Act, 1981 (hereinafter collectively referred to as the "Acts") have come into force throughout the country with effect from 23.03.1974 and 16.05.1981, respectively.
2. And whereas, the said Acts have been enacted to provide for the prevention, control, and abatement of water and air pollution and for maintaining and restoring the wholesomeness of water and air, and the Rajasthan State Pollution Control Board (hereinafter referred to as the "Board") has been vested with the powers to take such steps as may be deemed necessary for enforcement of the provisions of the aforesaid Acts.
3. And whereas, under the provisions of Section 24 of the Water Act, no person shall knowingly cause or permit any poisonous, noxious, or polluting matter, determined in accordance with the standards laid down by the Board, to enter any stream, well, sewer, or land.
4. And whereas under the provisions of section 25/26 of the Act, no person shall without the previous consent of the Board establish or take any steps to establish, any industry,

Regional Office, Bhiwadi
Rajasthan State Pollution Control Board
Plot No. GO-1, Phase-II, RIICO Industrial Area, Bhiwadi-301019
e-mail: robhiwadi@gmail.com

operation or process or any treatment and disposal system or any extension or addition thereto, which is likely to discharge sewage or trade effluent into a stream or well or sewer or on land or bring into use any new or altered outlet for the discharge or sewage or trade effluent or begin to make any new discharge of sewage or trade effluent.

5. And whereas under the provisions of section 21 of the Air Act, no person shall without the previous consent of the Board, establish or operate any industrial plant in an air pollution control area. Industrial plant, under the Air Act, has been defined to mean any plant used for any industrial or trade purposes and emitting any air pollutant into the atmosphere.
6. And whereas under the provisions of section 22 of the Air Act, no person operating any industrial plant, in any air pollution control area shall discharge or cause or permit to be discharged the emission of any air pollutant more than the prescribed standards.
7. And whereas, an industry has been established in the name & style of **M/s Casablanca Industries Pvt. Ltd.** at **SPA-500(B), RIA, Bhiwadi, District Khairthal Tijara** (hereinafter referred to as 'the industry') and the process is such that it generates polluted trade/domestic effluent & air emission.
8. And whereas, the Central Pollution Control Board (CPCB), New Delhi, has published Emission Regulation Part-III (ERP-III) in December 1985, prescribing monitoring requirement for industries including provisions relating to stack monitoring facilities, equipment, and testing procedures for regulation of emissions from industrial sources.
9. And whereas, provision of proper stack monitoring facilities is essential for assessing compliance of industries with prescribed emission standards and for enabling regulatory authorities to undertake effective monitoring and enforcement actions.
10. And whereas, the CPCB vide letter dated 12.03.2026 issued directions to the RSPCB under Section 18(1)(b) of the Air Act, 1981 to ensure compliance of provisions of ERP-III published by CPCB in air polluting industries in Delhi-NCR.
11. And whereas, your industry falls within the ambit of the aforesaid directions issued by CPCB.
12. And whereas the Board may, in exercise of the powers conferred upon it under the provisions of the section 33A of the Water Act and section 31A of the Air Act and in

- a. The closure, prohibition or regulation of any industry, operation or process or
- b. Stoppage or regulation of the supply of electricity or water or any other service.

Therefore, in exercise of the powers conferred under Section 31A of the Air Act, 1981, and in discharge of the functions entrusted under the Water Act, 1974 and the Air Act, 1981, and to ensure compliance with the directions issued by the CPCB on 12.03.2026, you are hereby directed to ensure the following: -

1. To provide/ensure stack monitoring facilities in accordance with the Emission Regulation Part-III (ERP-III) latest by March 28,2026 for all the stacks attached to potential air polluting sources such as Boiler, Furnaces, Thermic Fluid Heaters, Kilns and Process Emissions.
2. To ensure that the position of port-hole should comply with Emission Regulation Part-III (ERP-III) published by CPCB. Special emphasis shall be given to the criteria of compliance of minimum 8D downstream from flow disturbance and minimum 2D from top of stack to ensure laminar flow at sampling point in the stack. For other details pertaining to location of port-hole para 2.5.0 at page 18 of ERP-III may be referred.
3. To provide a separate port hole of 0.1 m diameter for manual emission sampling. For port hole installation para 2.5.2 at page 19 of ERP-III may be referred.
4. In case, if the Online Continuous Emission Monitoring Systems (OCEMS) is mandated as per consent conditions, the plane of port hole for OCEMS should be 500 mm below (vertically) the plane of manual sampling port hole.
5. To ensure that the platform for monitoring should have capacity to bear 300-350 kg of weight, it should have a size of minimum 6 x 4 feet, 800-1000 mm of guard rail to ensure proper space for sampling team and equipment required for monitoring. For monitoring platform installation, para 2.5.3, 2.5.4 & 2.5.6 at page 19 & 20 of ERP-III may be referred.

Regional Office, Bhiwadi
Rajasthan State Pollution Control Board
Plot No. GO-1, Phase-II, RIICO Industrial Area, Bhiwadi-301019
e-mail: robhiwadi@gmail.com

6. To ensure that the port hole and ladder facility is safe to carry out monitoring. In place of monkey ladder, spiral type/scaffold ladder shall be provided to ensure safety of monitoring personnel.

You are further directed to submit a compliance report to this office regarding the above directions by 28.03.2026.

In the event of failure to comply with the above directions within the stipulated time, the absence of proper stack monitoring facility as per ERP-III and as prescribed above shall be considered as violation and appropriate action shall be taken including closure of the industry, without any further notice in this matter. Further, any other action deemed appropriate under the provisions of the said Acts may also be initiated.

Yours sincerely,

- a. The closure, prohibition or regulation of any industry, operation or process or
- b. Stoppage or regulation of the supply of electricity or water or any other service.

Therefore, in exercise of the powers conferred under Section 31A of the Air Act, 1981, and in discharge of the functions entrusted under the Water Act, 1974 and the Air Act, 1981, and to ensure compliance with the directions issued by the CPCB on 12.03.2026, you are hereby directed to ensure the following: -

1. To provide/ensure stack monitoring facilities in accordance with the Emission Regulation Part-III (ERP-III) latest by March 28,2026 for all the stacks attached to potential air polluting sources such as Boiler, Furnaces, Thermic Fluid Heaters, Kilns and Process Emissions.
2. To ensure that the position of port-hole should comply with Emission Regulation Part-III (ERP-III) published by CPCB. Special emphasis shall be given to the criteria of compliance of minimum 8D downstream from flow disturbance and minimum 2D from top of stack to ensure laminar flow at sampling point in the stack. For other details pertaining to location of port-hole para 2.5.0 at page 18 of ERP-III may be referred.
3. To provide a separate port hole of 0.1 m diameter for manual emission sampling. For port hole installation para 2.5.2 at page 19 of ERP-III may be referred.
4. In case, if the Online Continuous Emission Monitoring Systems (OCEMS) is mandated as per consent conditions, the plane of port hole for OCEMS should be 500 mm below (vertically) the plane of manual sampling port hole.
5. To ensure that the platform for monitoring should have capacity to bear 300-350 kg of weight, it should have a size of minimum 6 x 4 feet, 800-1000 mm of guard rail to ensure proper space for sampling team and equipment required for monitoring. For monitoring platform installation, para 2.5.3, 2.5.4 & 2.5.6 at page 19 & 20 of ERP-III may be referred.

Regional Office, Bhiwadi
Rajasthan State Pollution Control Board
Plot No. GO-1, Phase-II, RIICO Industrial Area, Bhiwadi-301019
e-mail: robhiwadi@gmail.com

6. To ensure that the port hole and ladder facility is safe to carry out monitoring. In place of monkey ladder, spiral type/scaffold ladder shall be provided to ensure safety of monitoring personnel.

You are further directed to submit a compliance report to this office regarding the above directions by 28.03.2026.

In the event of failure to comply with the above directions within the stipulated time, the absence of proper stack monitoring facility as per ERP-III and as prescribed above shall be considered as violation and appropriate action shall be taken including closure of the industry, without any further notice in this matter. Further, any other action deemed appropriate under the provisions of the said Acts may also be initiated.

- a. The closure, prohibition or regulation of any industry, operation or process or
- b. Stoppage or regulation of the supply of electricity or water or any other service.

Therefore, in exercise of the powers conferred under Section 31A of the Air Act, 1981, and in discharge of the functions entrusted under the Water Act, 1974 and the Air Act, 1981, and to ensure compliance with the directions issued by the CPCB on 12.03.2026, you are hereby directed to ensure the following: -

1. To provide/ensure stack monitoring facilities in accordance with the Emission Regulation Part-III (ERP-III) latest by March 28,2026 for all the stacks attached to potential air polluting sources such as Boiler, Furnaces, Thermic Fluid Heaters, Kilns and Process Emissions.
2. To ensure that the position of port-hole should comply with Emission Regulation Part-III (ERP-III) published by CPCB. Special emphasis shall be given to the criteria of compliance of minimum 8D downstream from flow disturbance and minimum 2D from top of stack to ensure laminar flow at sampling point in the stack. For other details pertaining to location of port-hole para 2.5.0 at page 18 of ERP-III may be referred.
3. To provide a separate port hole of 0.1 m diameter for manual emission sampling. For port hole installation para 2.5.2 at page 19 of ERP-III may be referred.
4. In case, if the Online Continuous Emission Monitoring Systems (OCEMS) is mandated as per consent conditions, the plane of port hole for OCEMS should be 500 mm below (vertically) the plane of manual sampling port hole.
5. To ensure that the platform for monitoring should have capacity to bear 300-350 kg of weight, it should have a size of minimum 6 x 4 feet, 800-1000 mm of guard rail to ensure proper space for sampling team and equipment required for monitoring. For monitoring platform installation, para 2.5.3, 2.5.4 & 2.5.6 at page 19 & 20 of ERP-III may be referred.

Regional Office, Bhiwadi
Rajasthan State Pollution Control Board
Plot No. GO-1, Phase-II, RIICO Industrial Area, Bhiwadi-301019
e-mail: robhiwadi@gmail.com

6. To ensure that the port hole and ladder facility is safe to carry out monitoring. In place of monkey ladder, spiral type/scaffold ladder shall be provided to ensure safety of monitoring personnel.

You are further directed to submit a compliance report to this office regarding the above directions by 28.03.2026.

In the event of failure to comply with the above directions within the stipulated time, the absence of proper stack monitoring facility as per ERP-III and as prescribed above shall be considered as violation and appropriate action shall be taken including closure of the industry, without any further notice in this matter. Further, any other action deemed appropriate under the provisions of the said Acts may also be initiated.

Yours sincerely,

Sub: Directions under Section 31A of the Air (Prevention and Control of Pollution) Act, 1981 to provide and maintain stack emission monitoring facilities in accordance with Emission Regulation Part – III (ERP-III) published by CPCB in air polluting industry: regarding

Ref: Directions issued by Central Pollution Control Board (CPCB) under Section 18(1)(b) of the Air Act, 1981, to RSPCB vide letter dated 12.03.2026

Sir/Madam

1. Whereas, the Water (Prevention and Control of Pollution) Act, 1974 and the Air (Prevention and Control of Pollution) Act, 1981 (hereinafter collectively referred to as the "Acts") have come into force throughout the country with effect from 23.03.1974 and 16.05.1981, respectively.
2. And whereas, the said Acts have been enacted to provide for the prevention, control, and abatement of water and air pollution and for maintaining and restoring the wholesomeness of water and air, and the Rajasthan State Pollution Control Board (hereinafter referred to as the "Board") has been vested with the powers to take such steps as may be deemed necessary for enforcement of the provisions of the aforesaid Acts.
3. And whereas, under the provisions of Section 24 of the Water Act, no person shall knowingly cause or permit any poisonous, noxious, or polluting matter, determined in accordance with the standards laid down by the Board, to enter any stream, well, sewer, or land.
4. And whereas under the provisions of section 25/26 of the Act, no person shall without the previous consent of the Board establish or take any steps to establish, any industry,

Regional Office, Bhiwadi
Rajasthan State Pollution Control Board

e-mail: robhiwadi@gmail.com

operation or process or any treatment and disposal system or any extension or addition thereto, which is likely to discharge sewage or trade effluent into a stream or well or sewer or on land or bring into use any new or altered outlet for the discharge or sewage or trade effluent or begin to make any new discharge of sewage or trade effluent.

5. And whereas under the provisions of section 21 of the Air Act, no person shall without the previous consent of the Board, establish or operate any industrial plant in an air pollution control area. Industrial plant, under the Air Act, has been defined to mean any plant used for any industrial or trade purposes and emitting any air pollutant into the atmosphere.
6. And whereas under the provisions of section 22 of the Air Act, no person operating any industrial plant, in any air pollution control area shall discharge or cause or permit to be discharged the emission of any air pollutant more than the prescribed standards.
7. And whereas, an industry has been established in the name & style of **M/s Tayal Tuff Pvt Ltd** at **SP-5, RIA, Kehrani, District Khairthal Tijara** (hereinafter referred to as 'the industry') and the process is such that it generates polluted trade/domestic effluent & air emission.
8. And whereas, the Central Pollution Control Board (CPCB), New Delhi, has published Emission Regulation Part-III (ERP-III) in December 1985, prescribing monitoring requirement for industries including provisions relating to stack monitoring facilities, equipment, and testing procedures for regulation of emissions from industrial sources.
9. And whereas, provision of proper stack monitoring facilities is essential for assessing compliance of industries with prescribed emission standards and for enabling regulatory authorities to undertake effective monitoring and enforcement actions.
10. And whereas, the CPCB vide letter dated 12.03.2026 issued directions to the RSPCB under Section 18(1)(b) of the Air Act, 1981 to ensure compliance of provisions of ERP-III published by CPCB in air polluting industries in Delhi-NCR.
11. And whereas, your industry falls within the ambit of the aforesaid directions issued by CPCB.
12. And whereas the Board may, in exercise of the powers conferred upon it under the provisions of the section 33A of the Water Act and section 31A of the Air Act and in

- a. The closure, prohibition or regulation of any industry, operation or process or
- b. Stoppage or regulation of the supply of electricity or water or any other service.

Therefore, in exercise of the powers conferred under Section 31A of the Air Act, 1981, and in discharge of the functions entrusted under the Water Act, 1974 and the Air Act, 1981, and to ensure compliance with the directions issued by the CPCB on 12.03.2026, you are hereby directed to ensure the following: -

1. To provide/ensure stack monitoring facilities in accordance with the Emission Regulation Part-III (ERP-III) latest by March 28,2026 for all the stacks attached to potential air polluting sources such as Boiler, Furnaces, Thermic Fluid Heaters, Kilns and Process Emissions.
2. To ensure that the position of port-hole should comply with Emission Regulation Part-III (ERP-III) published by CPCB. Special emphasis shall be given to the criteria of compliance of minimum 8D downstream from flow disturbance and minimum 2D from top of stack to ensure laminar flow at sampling point in the stack. For other details pertaining to location of port-hole para 2.5.0 at page 18 of ERP-III may be referred.
3. To provide a separate port hole of 0.1 m diameter for manual emission sampling. For port hole installation para 2.5.2 at page 19 of ERP-III may be referred.
4. In case, if the Online Continuous Emission Monitoring Systems (OCEMS) is mandated as per consent conditions, the plane of port hole for OCEMS should be 500 mm below (vertically) the plane of manual sampling port hole.
5. To ensure that the platform for monitoring should have capacity to bear 300-350 kg of weight, it should have a size of minimum 6 x 4 feet, 800-1000 mm of guard rail to ensure proper space for sampling team and equipment required for monitoring. For monitoring platform installation, para 2.5.3, 2.5.4 & 2.5.6 at page 19 & 20 of ERP-III may be referred.

Regional Office, Bhiwadi
Rajasthan State Pollution Control Board
Plot No. GO-1, Phase-II, RIICO Industrial Area, Bhiwadi-301019
e-mail: robhiwadi@gmail.com

6. To ensure that the port hole and ladder facility is safe to carry out monitoring. In place of monkey ladder, spiral type/scaffold ladder shall be provided to ensure safety of monitoring personnel.

You are further directed to submit a compliance report to this office regarding the above directions by 28.03.2026.

In the event of failure to comply with the above directions within the stipulated time, the absence of proper stack monitoring facility as per ERP-III and as prescribed above shall be considered as violation and appropriate action shall be taken including closure of the industry, without any further notice in this matter. Further, any other action deemed appropriate under the provisions of the said Acts may also be initiated.

Yours sincerely,

- a. The closure, prohibition or regulation of any industry, operation or process or
- b. Stoppage or regulation of the supply of electricity or water or any other service.

Therefore, in exercise of the powers conferred under Section 31A of the Air Act, 1981, and in discharge of the functions entrusted under the Water Act, 1974 and the Air Act, 1981, and to ensure compliance with the directions issued by the CPCB on 12.03.2026, you are hereby directed to ensure the following: –

1. To provide/ensure stack monitoring facilities in accordance with the Emission Regulation Part-III (ERP-III) latest by March 28,2026 for all the stacks attached to potential air polluting sources such as Boiler, Furnaces, Thermic Fluid Heaters, Kilns and Process Emissions.
2. To ensure that the position of port-hole should comply with Emission Regulation Part-III (ERP-III) published by CPCB. Special emphasis shall be given to the criteria of compliance of minimum 8D downstream from flow disturbance and minimum 2D from top of stack to ensure laminar flow at sampling point in the stack. For other details pertaining to location of port-hole para 2.5.0 at page 18 of ERP-III may be referred.
3. To provide a separate port hole of 0.1 m diameter for manual emission sampling. For port hole installation para 2.5.2 at page 19 of ERP-III may be referred.
4. In case, if the Online Continuous Emission Monitoring Systems (OCEMS) is mandated as per consent conditions, the plane of port hole for OCEMS should be 500 mm below (vertically) the plane of manual sampling port hole.
5. To ensure that the platform for monitoring should have capacity to bear 300–350 kg of weight, it should have a size of minimum 6 x 4 feet, 800–1000 mm of guard rail to ensure proper space for sampling team and equipment required for monitoring. For monitoring platform installation, para 2.5.3, 2.5.4 & 2.5.6 at page 19 & 20 of ERP-III may be referred.

Regional Office, Bhiwadi
Rajasthan State Pollution Control Board
Plot No. GO-1, Phase-II, RIICO Industrial Area, Bhiwadi-301019
e-mail: robhiwadi@gmail.com

6. To ensure that the port hole and ladder facility is safe to carry out monitoring. In place of monkey ladder, spiral type/scaffold ladder shall be provided to ensure safety of monitoring personnel.

You are further directed to submit a compliance report to this office regarding the above directions by 28.03.2026.

In the event of failure to comply with the above directions within the stipulated time, the absence of proper stack monitoring facility as per ERP-III and as prescribed above shall be considered as violation and appropriate action shall be taken including closure of the industry, without any further notice in this matter. Further, any other action deemed appropriate under the provisions of the said Acts may also be initiated.

Yours sincerely,

- b. Stoppage or regulation of the supply of electricity or water or any other service.

Therefore, in exercise of the powers conferred under Section 31A of the Air Act, 1981, and in discharge of the functions entrusted under the Water Act, 1974 and the Air Act, 1981, and to ensure compliance with the directions issued by the CPCB on 12.03.2026, you are hereby directed to ensure the following: -

1. To provide/ensure stack monitoring facilities in accordance with the Emission Regulation Part-III (ERP-III) latest by March 28,2026 for all the stacks attached to potential air polluting sources such as Boiler, Furnaces, Thermic Fluid Heaters, Kilns and Process Emissions.
2. To ensure that the position of port-hole should comply with Emission Regulation Part-III (ERP-III) published by CPCB. Special emphasis shall be given to the criteria of compliance of minimum 8D downstream from flow disturbance and minimum 2D from top of stack to ensure laminar flow at sampling point in the stack. For other details pertaining to location of port-hole para 2.5.0 at page 18 of ERP-III may be referred.
3. To provide a separate port hole of 0.1 m diameter for manual emission sampling. For port hole installation para 2.5.2 at page 19 of ERP-III may be referred.
4. In case, if the Online Continuous Emission Monitoring Systems (OCEMS) is mandated as per consent conditions, the plane of port hole for OCEMS should be 500 mm below (vertically) the plane of manual sampling port hole.
5. To ensure that the platform for monitoring should have capacity to bear 300-350 kg of weight, it should have a size of minimum 6 x 4 feet, 800-1000 mm of guard rail to ensure proper space for sampling team and equipment required for monitoring. For monitoring platform installation, para 2.5.3, 2.5.4 & 2.5.6 at page 19 & 20 of ERP-III may be referred.

Regional Office, Bhiwadi
Rajasthan State Pollution Control Board
Plot No. GO-1, Phase-II, RIICO Industrial Area, Bhiwadi-301019
e-mail: robhiwadi@gmail.com

6. To ensure that the port hole and ladder facility is safe to carry out monitoring. In place of monkey ladder, spiral type/scaffold ladder shall be provided to ensure safety of monitoring personnel.

You are further directed to submit a compliance report to this office regarding the above directions by 28.03.2026.

In the event of failure to comply with the above directions within the stipulated time, the absence of proper stack monitoring facility as per ERP-III and as prescribed above shall be considered as violation and appropriate action shall be taken including closure of the industry, without any further notice in this matter. Further, any other action deemed appropriate under the provisions of the said Acts may also be initiated.

Sub: Directions under Section 31A of the Air (Prevention and Control of Pollution) Act, 1981 to provide and maintain stack emission monitoring facilities in accordance with Emission Regulation Part – III (ERP-III) published by CPCB in air polluting industry: regarding

Ref: Directions issued by Central Pollution Control Board (CPCB) under Section 18(1)(b) of the Air Act, 1981, to RSPCB vide letter dated 12.03.2026

Sir/Madam

1. Whereas, the Water (Prevention and Control of Pollution) Act, 1974 and the Air (Prevention and Control of Pollution) Act, 1981 (hereinafter collectively referred to as the "Acts") have come into force throughout the country with effect from 23.03.1974 and 16.05.1981, respectively.
2. And whereas, the said Acts have been enacted to provide for the prevention, control, and abatement of water and air pollution and for maintaining and restoring the wholesomeness of water and air, and the Rajasthan State Pollution Control Board (hereinafter referred to as the "Board") has been vested with the powers to take such steps as may be deemed necessary for enforcement of the provisions of the aforesaid Acts.
3. And whereas, under the provisions of Section 24 of the Water Act, no person shall knowingly cause or permit any poisonous, noxious, or polluting matter, determined in accordance with the standards laid down by the Board, to enter any stream, well, sewer, or land.
4. And whereas under the provisions of section 25/26 of the Act, no person shall without the previous consent of the Board establish or take any steps to establish, any industry,

Regional Office, Bhiwadi

e-mail: robhiwadi@gmail.com

operation or process or any treatment and disposal system or any extension or addition thereto, which is likely to discharge sewage or trade effluent into a stream or well or sewer or on land or bring into use any new or altered outlet for the discharge or sewage or trade effluent or begin to make any new discharge of sewage or trade effluent.

5. And whereas under the provisions of section 21 of the Air Act, no person shall without the previous consent of the Board, establish or operate any industrial plant in an air pollution control area. Industrial plant, under the Air Act, has been defined to mean any plant used for any industrial or trade purposes and emitting any air pollutant into the atmosphere.
6. And whereas under the provisions of section 22 of the Air Act, no person operating any industrial plant, in any air pollution control area shall discharge or cause or permit to be discharged the emission of any air pollutant more than the prescribed standards.
7. And whereas, an industry has been established in the name & style of **M/s KS OCEAN OVERSEAS LLP**, at **F-288 B, RIA Chopanki, District Khairthal Tijara** (hereinafter referred to as 'the industry') and the process is such that it generates polluted trade/domestic effluent & air emission.
8. And whereas, the Central Pollution Control Board (CPCB), New Delhi, has published Emission Regulation Part-III (ERP-III) in December 1985, prescribing monitoring requirement for industries including provisions relating to stack monitoring facilities, equipment, and testing procedures for regulation of emissions from industrial sources.
9. And whereas, provision of proper stack monitoring facilities is essential for assessing compliance of industries with prescribed emission standards and for enabling regulatory authorities to undertake effective monitoring and enforcement actions.
10. And whereas, the CPCB vide letter dated 12.03.2026 issued directions to the RSPCB under Section 18(1)(b) of the Air Act, 1981 to ensure compliance of provisions of ERP-III published by CPCB in air polluting industries in Delhi-NCR.
11. And whereas, your industry falls within the ambit of the aforesaid directions issued by CPCB.
12. And whereas the Board may, in exercise of the powers conferred upon it under the provisions of the section 33A of the Water Act and section 31A of the Air Act and in

- b. Stoppage or regulation of the supply of electricity or water or any other service.

Therefore, in exercise of the powers conferred under Section 31A of the Air Act, 1981, and in discharge of the functions entrusted under the Water Act, 1974 and the Air Act, 1981, and to ensure compliance with the directions issued by the CPCB on 12.03.2026, you are hereby directed to ensure the following: -

1. To provide/ensure stack monitoring facilities in accordance with the Emission Regulation Part-III (ERP-III) latest by March 28,2026 for all the stacks attached to potential air polluting sources such as Boiler, Furnaces, Thermic Fluid Heaters, Kilns and Process Emissions.
2. To ensure that the position of port-hole should comply with Emission Regulation Part-III (ERP-III) published by CPCB. Special emphasis shall be given to the criteria of compliance of minimum 8D downstream from flow disturbance and minimum 2D from top of stack to ensure laminar flow at sampling point in the stack. For other details pertaining to location of port-hole para 2.5.0 at page 18 of ERP-III may be referred.
3. To provide a separate port hole of 0.1 m diameter for manual emission sampling. For port hole installation para 2.5.2 at page 19 of ERP-III may be referred.
4. In case, if the Online Continuous Emission Monitoring Systems (OCEMS) is mandated as per consent conditions, the plane of port hole for OCEMS should be 500 mm below (vertically) the plane of manual sampling port hole.
5. To ensure that the platform for monitoring should have capacity to bear 300-350 kg of weight, it should have a size of minimum 6 x 4 feet, 800-1000 mm of guard rail to ensure proper space for sampling team and equipment required for monitoring. For monitoring platform installation, para 2.5.3, 2.5.4 & 2.5.6 at page 19 & 20 of ERP-III may be referred.

Regional Office, Bhiwadi
Rajasthan State Pollution Control Board
Plot No. GO-1, Phase-II, RIICO Industrial Area, Bhiwadi-301019
e-mail: robhiwadi@gmail.com

6. To ensure that the port hole and ladder facility is safe to carry out monitoring. In place of monkey ladder, spiral type/scaffold ladder shall be provided to ensure safety of monitoring personnel.

You are further directed to submit a compliance report to this office regarding the above directions by 28.03.2026.

In the event of failure to comply with the above directions within the stipulated time, the absence of proper stack monitoring facility as per ERP-III and as prescribed above shall be considered as violation and appropriate action shall be taken including closure of the industry, without any further notice in this matter. Further, any other action deemed appropriate under the provisions of the said Acts may also be initiated.

1. To provide/ensure stack monitoring facilities in accordance with the Emission Regulation Part-III (ERP-III) latest by March 28,2026 for all the stacks attached to potential air polluting sources such as Boiler, Furnaces, Thermic Fluid Heaters, Kilns and Process Emissions.
2. To ensure that the position of port-hole should comply with Emission Regulation Part-III (ERP-III) published by CPCB. Special emphasis shall be given to the criteria of compliance of minimum 8D downstream from flow disturbance and minimum 2D from top of stack to ensure laminar flow at sampling point in the stack. For other details pertaining to location of port-hole para 2.5.0 at page 18 of ERP-III may be referred.
3. To provide a separate port hole of 0.1 m diameter for manual emission sampling. For port hole installation para 2.5.2 at page 19 of ERP-III may be referred.
4. In case, if the Online Continuous Emission Monitoring Systems (OCEMS) is mandated as per consent conditions, the plane of port hole for OCEMS should be 500 mm below (vertically) the plane of manual sampling port hole.
5. To ensure that the platform for monitoring should have capacity to bear 300-350 kg of weight, it should have a size of minimum 6 x 4 feet, 800-1000 mm of guard rail to ensure proper space for sampling team and equipment required for monitoring. For monitoring platform installation, para 2.5.3, 2.5.4 & 2.5.6 at page 19 & 20 of ERP-III may be referred.

Regional Office, Bhiwadi

e-mail: robhiwadi@gmail.com

6. To ensure that the port hole and ladder facility is safe to carry out monitoring. In place of monkey ladder, spiral type/scaffold ladder shall be provided to ensure safety of monitoring personnel.

You are further directed to submit a compliance report to this office regarding the above directions by 28.03.2026.

In the event of failure to comply with the above directions within the stipulated time, the absence of proper stack monitoring facility as per ERP-III and as prescribed above shall be considered as violation and appropriate action shall be taken including closure of the industry, without any further notice in this matter. Further, any other action deemed appropriate under the provisions of the said Acts may also be initiated.

Yours sincerely,

- Sub: Directions under Section 31A of the Air (Prevention and Control of Pollution) Act, 1981 to provide and maintain stack emission monitoring facilities in accordance with Emission Regulation Part – III (ERP-III) published by CPCB in air polluting industry: regarding
- Ref: Directions issued by Central Pollution Control Board (CPCB) under Section 18(1)(b) of the Air Act, 1981, to RSPCB vide letter dated 12.03.2026

Sir/Madam

1. Whereas, the Water (Prevention and Control of Pollution) Act, 1974 and the Air (Prevention and Control of Pollution) Act, 1981 (hereinafter collectively referred to as the "Acts") have come into force throughout the country with effect from 23.03.1974 and 16.05.1981, respectively.
2. And whereas, the said Acts have been enacted to provide for the prevention, control, and abatement of water and air pollution and for maintaining and restoring the wholesomeness of water and air, and the Rajasthan State Pollution Control Board (hereinafter referred to as the "Board") has been vested with the powers to take such steps as may be deemed necessary for enforcement of the provisions of the aforesaid Acts.
3. And whereas, under the provisions of Section 24 of the Water Act, no person shall knowingly cause or permit any poisonous, noxious, or polluting matter, determined in accordance with the standards laid down by the Board, to enter any stream, well, sewer, or land.
4. And whereas under the provisions of section 25/26 of the Act, no person shall without the previous consent of the Board establish or take any steps to establish, any industry,

Regional Office, Bhiwadi

e-mail: robhiwadi@gmail.com

operation or process or any treatment and disposal system or any extension or addition thereto, which is likely to discharge sewage or trade effluent into a stream or well or sewer or on land or bring into use any new or altered outlet for the discharge or sewage or trade effluent or begin to make any new discharge of sewage or trade effluent.

5. And whereas under the provisions of section 21 of the Air Act, no person shall without the previous consent of the Board, establish or operate any industrial plant in an air pollution control area. Industrial plant, under the Air Act, has been defined to mean any plant used for any industrial or trade purposes and emitting any air pollutant into the atmosphere.
6. And whereas under the provisions of section 22 of the Air Act, no person operating any industrial plant, in any air pollution control area shall discharge or cause or permit to be discharged the emission of any air pollutant more than the prescribed standards.
7. And whereas, an industry has been established in the name & style of **M/s RAHUL BRICKS** at **VILLAGE: THETRA KISHANGARHBAS, District Khairthal Tijara** (hereinafter referred to as 'the industry') and the process is such that it generates polluted trade/domestic effluent & air emission.
8. And whereas, the Central Pollution Control Board (CPCB), New Delhi, has published Emission Regulation Part-III (ERP-III) in December 1985, prescribing monitoring requirement for industries including provisions relating to stack monitoring facilities, equipment, and testing procedures for regulation of emissions from industrial sources.
9. And whereas, provision of proper stack monitoring facilities is essential for assessing compliance of industries with prescribed emission standards and for enabling regulatory authorities to undertake effective monitoring and enforcement actions.
10. And whereas, the CPCB vide letter dated 12.03.2026 issued directions to the RSPCB under Section 18(1)(b) of the Air Act, 1981 to ensure compliance of provisions of ERP-III published by CPCB in air polluting industries in Delhi-NCR.
11. And whereas, your industry falls within the ambit of the aforesaid directions issued by CPCB.
12. And whereas the Board may, in exercise of the powers conferred upon it under the provisions of the section 33A of the Water Act and section 31A of the Air Act and in

Special emphasis shall be given to the criteria of compliance of minimum 8D downstream from flow disturbance and minimum 2D from top of stack to ensure laminar flow at sampling point in the stack. For other details pertaining to location of port-hole para 2.5.0 at page 18 of ERP-III may be referred.
3. To provide a separate port hole of 0.1 m diameter for manual emission sampling. For port hole installation para 2.5.2 at page 19 of ERP-III may be referred.
4. In case, if the Online Continuous Emission Monitoring Systems (OCEMS) is mandated as per consent conditions, the plane of port hole for OCEMS should be 500 mm below (vertically) the plane of manual sampling port hole.
5. To ensure that the platform for monitoring should have capacity to bear 300-350 kg of weight, it should have a size of minimum 6 x 4 feet, 800-1000 mm of guard rail to ensure proper space for sampling team and equipment required for monitoring. For monitoring platform installation, para 2.5.3, 2.5.4 & 2.5.6 at page 19 & 20 of ERP-III may be referred.

Plot No. GO-1, Phase-II, RIICO Industrial Area, Bhiwadi-301019
e-mail: robhiwadi@gmail.com

6. To ensure that the port hole and ladder facility is safe to carry out monitoring. In place of monkey ladder, spiral type/scaffold ladder shall be provided to ensure safety of monitoring personnel.

You are further directed to submit a compliance report to this office regarding the above directions by 28.03.2026.

In the event of failure to comply with the above directions within the stipulated time, the absence of proper stack monitoring facility as per ERP-III and as prescribed above shall be considered as violation and appropriate action shall be taken including closure of the industry, without any further notice in this matter. Further, any other action deemed appropriate under the provisions of the said Acts may also be initiated.

Yours sincerely,

- Sub: Directions under Section 31A of the Air (Prevention and Control of Pollution) Act, 1981 to provide and maintain stack emission monitoring facilities in accordance with Emission Regulation Part – III (ERP-III) published by CPCB in air polluting industry: regarding
- Ref: Directions issued by Central Pollution Control Board (CPCB) under Section 18(1)(b) of the Air Act, 1981, to RSPCB vide letter dated 12.03.2026

Sir/Madam

1. Whereas, the Water (Prevention and Control of Pollution) Act, 1974 and the Air (Prevention and Control of Pollution) Act, 1981 (hereinafter collectively referred to as the "Acts") have come into force throughout the country with effect from 23.03.1974 and 16.05.1981, respectively.
2. And whereas, the said Acts have been enacted to provide for the prevention, control, and abatement of water and air pollution and for maintaining and restoring the wholesomeness of water and air, and the Rajasthan State Pollution Control Board (hereinafter referred to as the "Board") has been vested with the powers to take such steps as may be deemed necessary for enforcement of the provisions of the aforesaid Acts.
3. And whereas, under the provisions of Section 24 of the Water Act, no person shall knowingly cause or permit any poisonous, noxious, or polluting matter, determined in accordance with the standards laid down by the Board, to enter any stream, well, sewer, or land.
4. And whereas under the provisions of section 25/26 of the Act, no person shall without the previous consent of the Board establish or take any steps to establish, any industry,

Regional Office, Bhiwadi
Rajasthan State Pollution Control Board

e-mail: robhiwadi@gmail.com

operation or process or any treatment and disposal system or any extension or addition thereto, which is likely to discharge sewage or trade effluent into a stream or well or sewer or on land or bring into use any new or altered outlet for the discharge or sewage or trade effluent or begin to make any new discharge of sewage or trade effluent.

5. And whereas under the provisions of section 21 of the Air Act, no person shall without the previous consent of the Board, establish or operate any industrial plant in an air pollution control area. Industrial plant, under the Air Act, has been defined to mean any plant used for any industrial or trade purposes and emitting any air pollutant into the atmosphere.
6. And whereas under the provisions of section 22 of the Air Act, no person operating any industrial plant, in any air pollution control area shall discharge or cause or permit to be discharged the emission of any air pollutant more than the prescribed standards.
7. And whereas, an industry has been established in the name & style of **M/s SHIV BRICKS** at **NAREDI MUNDAWAR, District Khairthal Tijara** (hereinafter referred to as 'the industry') and the process is such that it generates polluted trade/domestic effluent & air emission.
8. And whereas, the Central Pollution Control Board (CPCB), New Delhi, has published Emission Regulation Part-III (ERP-III) in December 1985, prescribing monitoring requirement for industries including provisions relating to stack monitoring facilities, equipment, and testing procedures for regulation of emissions from industrial sources.
9. And whereas, provision of proper stack monitoring facilities is essential for assessing compliance of industries with prescribed emission standards and for enabling regulatory authorities to undertake effective monitoring and enforcement actions.
10. And whereas, the CPCB vide letter dated 12.03.2026 issued directions to the RSPCB under Section 18(1)(b) of the Air Act, 1981 to ensure compliance of provisions of ERP-III published by CPCB in air polluting industries in Delhi-NCR.
11. And whereas, your industry falls within the ambit of the aforesaid directions issued by CPCB.
12. And whereas the Board may, in exercise of the powers conferred upon it under the provisions of the section 33A of the Water Act and section 31A of the Air Act and in

- Sub: Directions under Section 31A of the Air (Prevention and Control of Pollution) Act, 1981 to provide and maintain stack emission monitoring facilities in accordance with Emission Regulation Part – III (ERP-III) published by CPCB in air polluting industry. regarding
- Ref: Directions issued by Central Pollution Control Board (CPCB) under Section 18(1)(b) of the Air Act, 1981, to RSPCB vide letter dated 12.03.2026

Sir/Madam

1. Whereas, the Water (Prevention and Control of Pollution) Act, 1974 and the Air (Prevention and Control of Pollution) Act, 1981 (hereinafter collectively referred to as the "Acts") have come into force throughout the country with effect from 23.03.1974 and 16.05.1981, respectively.
2. And whereas, the said Acts have been enacted to provide for the prevention, control, and abatement of water and air pollution and for maintaining and restoring the wholesomeness of water and air, and the Rajasthan State Pollution Control Board (hereinafter referred to as the "Board") has been vested with the powers to take such steps as may be deemed necessary for enforcement of the provisions of the aforesaid Acts.
3. And whereas, under the provisions of Section 24 of the Water Act, no person shall knowingly cause or permit any poisonous, noxious, or polluting matter, determined in accordance with the standards laid down by the Board, to enter any stream, well, sewer, or land.
4. And whereas under the provisions of section 25/26 of the Act, no person shall without the previous consent of the Board establish or take any steps to establish, any industry,

Regional Office, Bhiwadi
Rajasthan State Pollution Control Board

e-mail: robhiwadi@gmail.com

operation or process or any treatment and disposal system or any extension or addition thereto, which is likely to discharge sewage or trade effluent into a stream or well or sewer or on land or bring into use any new or altered outlet for the discharge or sewage or trade effluent or begin to make any new discharge of sewage or trade effluent.

5. And whereas under the provisions of section 21 of the Air Act, no person shall without the previous consent of the Board, establish or operate any industrial plant in an air pollution control area. Industrial plant, under the Air Act, has been defined to mean any plant used for any industrial or trade purposes and emitting any air pollutant into the atmosphere.
6. And whereas under the provisions of section 22 of the Air Act, no person operating any industrial plant, in any air pollution control area shall discharge or cause or permit to be discharged the emission of any air pollutant more than the prescribed standards.
7. And whereas, an industry has been established in the name & style of **M/s Choudhary Vikas Bricks (Old Name.OM Bricks Bhatta Co.)** at **NEAR VILLAGE- GHAKA AKOTKASIM, District Khairthal Tijara** (hereinafter referred to as 'the industry') and the process is such that it generates polluted trade/domestic effluent & air emission.
8. And whereas, the Central Pollution Control Board (CPCB), New Delhi, has published Emission Regulation Part-III (ERP-III) in December 1985, prescribing monitoring requirement for industries including provisions relating to stack monitoring facilities, equipment, and testing procedures for regulation of emissions from industrial sources.
9. And whereas, provision of proper stack monitoring facilities is essential for assessing compliance of industries with prescribed emission standards and for enabling regulatory authorities to undertake effective monitoring and enforcement actions.
10. And whereas, the CPCB vide letter dated 12.03.2026 issued directions to the RSPCB under Section 18(1)(b) of the Air Act, 1981 to ensure compliance of provisions of ERP-III published by CPCB in air polluting industries in Delhi-NCR.
11. And whereas, your industry falls within the ambit of the aforesaid directions issued by CPCB.
12. And whereas the Board may, in exercise of the powers conferred upon it under the provisions of the section 33A of the Water Act and section 31A of the Air Act and in

Regional Office, Bhiwadi
Rajasthan State Pollution Control Board

performance of its functions conferred under these Acts, issue directions in writing to any person, officer or any authority and such person, officer or authority shall be bound to comply with such directions which includes the power direct: -

- a. The closure, prohibition or regulation of any industry, operation or process or
- b. Stoppage or regulation of the supply of electricity or water or any other service.

Therefore, in exercise of the powers conferred under Section 31A of the Air Act, 1981, and in discharge of the functions entrusted under the Water Act, 1974 and the Air Act, 1981, and to ensure compliance with the directions issued by the CPCB on 12.03.2026, you are hereby directed to ensure the following: -

1. To provide/ensure stack monitoring facilities in accordance with the Emission Regulation Part-III (ERP-III) latest by March 28,2026 for all the stacks attached to potential air polluting sources such as Boiler, Furnaces, Thermic Fluid Heaters, Kilns and Process Emissions.
2. To ensure that the position of port-hole should comply with Emission Regulation Part-III (ERP-III) published by CPCB. Special emphasis shall be given to the criteria of compliance of minimum 8D downstream from flow disturbance and minimum 2D from top of stack to ensure laminar flow at sampling point in the stack. For other details pertaining to location of port-hole para 2.5.0 at page 18 of ERP-III may be referred.
3. To provide a separate port hole of 0.1 m diameter for manual emission sampling. For port hole installation para 2.5.2 at page 19 of ERP-III may be referred.
4. In case, if the Online Continuous Emission Monitoring Systems (OCEMS) is mandated as per consent conditions, the plane of port hole for OCEMS should be 500 mm below (vertically) the plane of manual sampling port hole.
5. To ensure that the platform for monitoring should have capacity to bear 300-350 kg of weight, it should have a size of minimum 6 x 4 feet, 800-1000 mm of guard rail to ensure proper space for sampling team and equipment required for monitoring. e-mail: robhiwadi@gmail.com

6. To ensure that the port hole and ladder facility is safe to carry out monitoring. In place of monkey ladder, spiral type/scaffold ladder shall be provided to ensure safety of monitoring personnel.

You are further directed to submit a compliance report to this office regarding the above directions by 28.03.2026.

In the event of failure to comply with the above directions within the stipulated time, the absence of proper stack monitoring facility as per ERP-III and as prescribed above shall be considered as violation and appropriate action shall be taken including closure of the industry, without any further notice in this matter. Further, any other action deemed appropriate under the provisions of the said Acts may also be initiated.

Yours sincerely,

- Sub: Directions under Section 31A of the Air (Prevention and Control of Pollution) Act, 1981 to provide and maintain stack emission monitoring facilities in accordance with Emission Regulation Part – III (ERP-III) published by CPCB in air polluting industry: regarding
- Ref: Directions issued by Central Pollution Control Board (CPCB) under Section 18(1)(b) of the Air Act, 1981, to RSPCB vide letter dated 12.03.2026

Sir/Madam

1. Whereas, the Water (Prevention and Control of Pollution) Act, 1974 and the Air (Prevention and Control of Pollution) Act, 1981 (hereinafter collectively referred to as the "Acts") have come into force throughout the country with effect from 23.03.1974 and 16.05.1981, respectively.
2. And whereas, the said Acts have been enacted to provide for the prevention, control, and abatement of water and air pollution and for maintaining and restoring the wholesomeness of water and air, and the Rajasthan State Pollution Control Board (hereinafter referred to as the "Board") has been vested with the powers to take such steps as may be deemed necessary for enforcement of the provisions of the aforesaid Acts.
3. And whereas, under the provisions of Section 24 of the Water Act, no person shall knowingly cause or permit any poisonous, noxious, or polluting matter, determined in accordance with the standards laid down by the Board, to enter any stream, well, sewer, or land.
4. And whereas under the provisions of section 25/26 of the Act, no person shall without the previous consent of the Board establish or take any steps to establish, any industry,

Regional Office, Bhiwadi
Rajasthan State Pollution Control Board
Plot No. GO-1, Phase-II, RIICO Industrial Area, Bhiwadi-301019
e-mail: robhiwadi@gmail.com

operation or process or any treatment and disposal system or any extension or addition thereto, which is likely to discharge sewage or trade effluent into a stream or well or sewer or on land or bring into use any new or altered outlet for the discharge or sewage or trade effluent or begin to make any new discharge of sewage or trade effluent.

5. And whereas under the provisions of section 21 of the Air Act, no person shall without the previous consent of the Board, establish or operate any industrial plant in an air pollution control area. Industrial plant, under the Air Act, has been defined to mean any plant used for any industrial or trade purposes and emitting any air pollutant into the atmosphere.
6. And whereas under the provisions of section 22 of the Air Act, no person operating any industrial plant, in any air pollution control area shall discharge or cause or permit to be discharged the emission of any air pollutant more than the prescribed standards.
7. And whereas, an industry has been established in the name & style of **M/s MALA BRICKS** at **KUSHALBAS MUNDAWAR, District Khairthal Tijara** (hereinafter referred to as 'the industry') and the process is such that it generates polluted trade/domestic effluent & air emission.
8. And whereas, the Central Pollution Control Board (CPCB), New Delhi, has published Emission Regulation Part-III (ERP-III) in December 1985, prescribing monitoring requirement for industries including provisions relating to stack monitoring facilities, equipment, and testing procedures for regulation of emissions from industrial sources.
9. And whereas, provision of proper stack monitoring facilities is essential for assessing compliance of industries with prescribed emission standards and for enabling regulatory authorities to undertake effective monitoring and enforcement actions.
10. And whereas, the CPCB vide letter dated 12.03.2026 issued directions to the RSPCB under Section 18(1)(b) of the Air Act, 1981 to ensure compliance of provisions of ERP-III published by CPCB in air polluting industries in Delhi-NCR.
11. And whereas, your industry falls within the ambit of the aforesaid directions issued by CPCB.
12. And whereas the Board may, in exercise of the powers conferred upon it under the provisions of the section 33A of the Water Act and section 31A of the Air Act and in

Regional Office, Bhiwadi
Rajasthan State Pollution Control Board

performance of its functions conferred under these Acts, issue directions in writing to any person, officer or any authority and such person, officer or authority shall be bound to comply with such directions which includes the power direct: -

- a. The closure, prohibition or regulation of any industry, operation or process or
- b. Stoppage or regulation of the supply of electricity or water or any other service.

Therefore, in exercise of the powers conferred under Section 31A of the Air Act, 1981, and in discharge of the functions entrusted under the Water Act, 1974 and the Air Act, 1981, and to ensure compliance with the directions issued by the CPCB on 12.03.2026, you are hereby directed to ensure the following: -

1. To provide/ensure stack monitoring facilities in accordance with the Emission Regulation Part-III (ERP-III) latest by March 28,2026 for all the stacks attached to potential air polluting sources such as Boiler, Furnaces, Thermic Fluid Heaters, Kilns and Process Emissions.
2. To ensure that the position of port-hole should comply with Emission Regulation Part-III (ERP-III) published by CPCB. Special emphasis shall be given to the criteria of compliance of minimum 8D downstream from flow disturbance and minimum 2D from top of stack to ensure laminar flow at sampling point in the stack. For other details pertaining to location of port-hole para 2.5.0 at page 18 of ERP-III may be referred.
3. To provide a separate port hole of 0.1 m diameter for manual emission sampling. For port hole installation para 2.5.2 at page 19 of ERP-III may be referred.
4. In case, if the Online Continuous Emission Monitoring Systems (OCEMS) is mandated as per consent conditions, the plane of port hole for OCEMS should be 500 mm below (vertically) the plane of manual sampling port hole.
5. To ensure that the platform for monitoring should have capacity to bear 300-350 kg of weight, it should have a size of minimum 6 x 4 feet, 800-1000 mm of guard rail to ensure proper space for sampling team and equipment required for monitoring. For monitoring platform installation, para 2.5.3, 2.5.4 & 2.5.6 at page 19 & 20 of ERP-III may be referred.

6. To ensure that the port hole and ladder facility is safe to carry out monitoring. In place of monkey ladder, spiral type/scaffold ladder shall be provided to ensure safety of monitoring personnel.

You are further directed to submit a compliance report to this office regarding the above directions by 28.03.2026.

In the event of failure to comply with the above directions within the stipulated time, the absence of proper stack monitoring facility as per ERP-III and as prescribed above shall be considered as violation and appropriate action shall be taken including closure of the industry, without any further notice in this matter. Further, any other action deemed appropriate under the provisions of the said Acts may also be initiated.

Yours sincerely,

- Sub: Directions under Section 31A of the Air (Prevention and Control of Pollution) Act, 1981 to provide and maintain stack emission monitoring facilities in accordance with Emission Regulation Part – III (ERP-III) published by CPCB in air polluting industry: regarding
- Ref: Directions issued by Central Pollution Control Board (CPCB) under Section 18(1)(b) of the Air Act, 1981, to RSPCB vide letter dated 12.03.2026

Sir/Madam

1. Whereas, the Water (Prevention and Control of Pollution) Act, 1974 and the Air (Prevention and Control of Pollution) Act, 1981 (hereinafter collectively referred to as the "Acts") have come into force throughout the country with effect from 23.03.1974 and 16.05.1981, respectively.
2. And whereas, the said Acts have been enacted to provide for the prevention, control, and abatement of water and air pollution and for maintaining and restoring the wholesomeness of water and air, and the Rajasthan State Pollution Control Board (hereinafter referred to as the "Board") has been vested with the powers to take such steps as may be deemed necessary for enforcement of the provisions of the aforesaid Acts.
3. And whereas, under the provisions of Section 24 of the Water Act, no person shall knowingly cause or permit any poisonous, noxious, or polluting matter, determined in accordance with the standards laid down by the Board, to enter any stream, well, sewer, or land.
4. And whereas under the provisions of section 25/26 of the Act, no person shall without the previous consent of the Board establish or take any steps to establish, any industry,

Regional Office, Bhiwadi
Rajasthan State Pollution Control Board
Plot No. GO-1, Phase-II, RIICO Industrial Area, Bhiwadi-301019
e-mail: robhiwadi@gmail.com

operation or process or any treatment and disposal system or any extension or addition thereto, which is likely to discharge sewage or trade effluent into a stream or well or sewer or on land or bring into use any new or altered outlet for the discharge or sewage or trade effluent or begin to make any new discharge of sewage or trade effluent.

5. And whereas under the provisions of section 21 of the Air Act, no person shall without the previous consent of the Board, establish or operate any industrial plant in an air pollution control area. Industrial plant, under the Air Act, has been defined to mean any plant used for any industrial or trade purposes and emitting any air pollutant into the atmosphere.
6. And whereas under the provisions of section 22 of the Air Act, no person operating any industrial plant, in any air pollution control area shall discharge or cause or permit to be discharged the emission of any air pollutant more than the prescribed standards.
7. And whereas, an industry has been established in the name & style of **M/s J R Brick Kiln** at **Jhiwana, District Khairthal Tijara** (hereinafter referred to as 'the industry') and the process is such that it generates polluted trade/domestic effluent & air emission.
8. And whereas, the Central Pollution Control Board (CPCB), New Delhi, has published Emission Regulation Part-III (ERP-III) in December 1985, prescribing monitoring requirement for industries including provisions relating to stack monitoring facilities, equipment, and testing procedures for regulation of emissions from industrial sources.
9. And whereas, provision of proper stack monitoring facilities is essential for assessing compliance of industries with prescribed emission standards and for enabling regulatory authorities to undertake effective monitoring and enforcement actions.
10. And whereas, the CPCB vide letter dated 12.03.2026 issued directions to the RSPCB under Section 18(1)(b) of the Air Act, 1981 to ensure compliance of provisions of ERP-III published by CPCB in air polluting industries in Delhi-NCR.
11. And whereas, your industry falls within the ambit of the aforesaid directions issued by CPCB.
12. And whereas the Board may, in exercise of the powers conferred upon it under the provisions of the section 33A of the Water Act and section 31A of the Air Act and in performance of its functions conferred under these Acts, issue directions in writing to any

Regional Office, Bhiwadi
Rajasthan State Pollution Control Board

e-mail: robhiwadi@gmail.com

person, officer or any authority and such person, officer or authority shall be bound to comply with such directions which includes the power direct: –

- a. The closure, prohibition or regulation of any industry, operation or process or
- b. Stoppage or regulation of the supply of electricity or water or any other service.

Therefore, in exercise of the powers conferred under Section 31A of the Air Act, 1981, and in discharge of the functions entrusted under the Water Act, 1974 and the Air Act, 1981, and to ensure compliance with the directions issued by the CPCB on 12.03.2026, you are hereby directed to ensure the following: –

1. To provide/ensure stack monitoring facilities in accordance with the Emission Regulation Part-III (ERP-III) latest by March 28, 2026 for all the stacks attached to potential air polluting sources such as Boiler, Furnaces, Thermic Fluid Heaters, Kilns and Process Emissions.
2. To ensure that the position of port-hole should comply with Emission Regulation Part-III (ERP-III) published by CPCB. Special emphasis shall be given to the criteria of compliance of minimum 8D downstream from flow disturbance and minimum 2D from top of stack to ensure laminar flow at sampling point in the stack. For other details pertaining to location of port-hole para 2.5.0 at page 18 of ERP-III may be referred.
3. To provide a separate port hole of 0.1 m diameter for manual emission sampling. For port hole installation para 2.5.2 at page 19 of ERP-III may be referred.
4. In case, if the Online Continuous Emission Monitoring Systems (OCEMS) is mandated as per consent conditions, the plane of port hole for OCEMS should be 500 mm below (vertically) the plane of manual sampling port hole.
5. To ensure that the platform for monitoring should have capacity to bear 300–350 kg of weight, it should have a size of minimum 6 x 4 feet, 800–1000 mm of guard rail to ensure proper space for sampling team and equipment required for monitoring. For monitoring platform installation, para 2.5.3, 2.5.4 & 2.5.6 at page 19 & 20 of ERP-III may be referred.
6. To ensure that the port hole and ladder facility is safe to carry out monitoring. In place of monkey ladder, spiral type/scaffold ladder shall be provided to ensure safety of monitoring personnel.

Sub: Directions under Section 31A of the Air (Prevention and Control of Pollution) Act, 1981 to provide and maintain stack emission monitoring facilities in accordance with Emission Regulation Part – III (ERP-III) published by CPCB in air polluting industry: regarding

Ref: Directions issued by Central Pollution Control Board (CPCB) under Section 18(1)(b) of the Air Act, 1981, to RSPCB vide letter dated 12.03.2026

Sir/Madam

1. Whereas, the Water (Prevention and Control of Pollution) Act, 1974 and the Air (Prevention and Control of Pollution) Act, 1981 (hereinafter collectively referred to as the "Acts") have come into force throughout the country with effect from 23.03.1974 and 16.05.1981, respectively.
2. And whereas, the said Acts have been enacted to provide for the prevention, control, and abatement of water and air pollution and for maintaining and restoring the wholesomeness of water and air, and the Rajasthan State Pollution Control Board (hereinafter referred to as the "Board") has been vested with the powers to take such steps as may be deemed necessary for enforcement of the provisions of the aforesaid Acts.
3. And whereas, under the provisions of Section 24 of the Water Act, no person shall knowingly cause or permit any poisonous, noxious, or polluting matter, determined in accordance with the standards laid down by the Board, to enter any stream, well, sewer, or land.
4. And whereas under the provisions of section 25/26 of the Act, no person shall without the previous consent of the Board establish or take any steps to establish, any industry,

Regional Office, Bhiwadi
Rajasthan State Pollution Control Board
Plot No. GO-1, Phase-II, RIICO Industrial Area, Bhiwadi-301019
e-mail: robhiwadi@gmail.com

operation or process or any treatment and disposal system or any extension or addition thereto, which is likely to discharge sewage or trade effluent into a stream or well or sewer or on land or bring into use any new or altered outlet for the discharge or sewage or trade effluent or begin to make any new discharge of sewage or trade effluent.

5. And whereas under the provisions of section 21 of the Air Act, no person shall without the previous consent of the Board, establish or operate any industrial plant in an air pollution control area. Industrial plant, under the Air Act, has been defined to mean any plant used for any industrial or trade purposes and emitting any air pollutant into the atmosphere.
6. And whereas under the provisions of section 22 of the Air Act, no person operating any industrial plant, in any air pollution control area shall discharge or cause or permit to be discharged the emission of any air pollutant more than the prescribed standards.
7. And whereas, an industry has been established in the name & style of **M/s ALBAUX ENGINEERING PVT LTD** at **B-35/B-1 RIA KHUSKHERA, District Khairthal Tijara** (hereinafter referred to as 'the industry') and the process is such that it generates polluted trade/domestic effluent & air emission.
8. And whereas, the Central Pollution Control Board (CPCB), New Delhi, has published Emission Regulation Part-III (ERP-III) in December 1985, prescribing monitoring requirement for industries including provisions relating to stack monitoring facilities, equipment, and testing procedures for regulation of emissions from industrial sources.
9. And whereas, provision of proper stack monitoring facilities is essential for assessing compliance of industries with prescribed emission standards and for enabling regulatory authorities to undertake effective monitoring and enforcement actions.
10. And whereas, the CPCB vide letter dated 12.03.2026 issued directions to the RSPCB under Section 18(1)(b) of the Air Act, 1981 to ensure compliance of provisions of ERP-III published by CPCB in air polluting industries in Delhi-NCR.
11. And whereas, your industry falls within the ambit of the aforesaid directions issued by CPCB.
12. And whereas the Board may, in exercise of the powers conferred upon it under the provisions of the section 33A of the Water Act and section 31A of the Air Act and in

Regional Office, Bhiwadi
Rajasthan State Pollution Control Board
Plot No. GO-1, Phase-II, RIICO Industrial Area, Bhiwadi-301019
e-mail: robhiwadi@gmail.com

performance of its functions conferred under these Acts, issue directions in writing to any person, officer or any authority and such person, officer or authority shall be bound to comply with such directions which includes the power direct: -

- a. The closure, prohibition or regulation of any industry, operation or process or
- b. Stoppage or regulation of the supply of electricity or water or any other service.

Therefore, in exercise of the powers conferred under Section 31A of the Air Act, 1981, and in discharge of the functions entrusted under the Water Act, 1974 and the Air Act, 1981, and to ensure compliance with the directions issued by the CPCB on 12.03.2026, you are hereby directed to ensure the following: -

1. To provide/ensure stack monitoring facilities in accordance with the Emission Regulation Part-III (ERP-III) latest by March 28,2026 for all the stacks attached to potential air polluting sources such as Boiler, Furnaces, Thermic Fluid Heaters, Kilns and Process Emissions.
2. To ensure that the position of port-hole should comply with Emission Regulation Part-III (ERP-III) published by CPCB. Special emphasis shall be given to the criteria of compliance of minimum 8D downstream from flow disturbance and minimum 2D from top of stack to ensure laminar flow at sampling point in the stack. For other details pertaining to location of port-hole para 2.5.0 at page 18 of ERP-III may be referred.
3. To provide a separate port hole of 0.1 m diameter for manual emission sampling. For port hole installation para 2.5.2 at page 19 of ERP-III may be referred.
4. In case, if the Online Continuous Emission Monitoring Systems (OCEMS) is mandated as per consent conditions, the plane of port hole for OCEMS should be 500 mm below (vertically) the plane of manual sampling port hole.
5. To ensure that the platform for monitoring should have capacity to bear 300-350 kg of weight, it should have a size of minimum 6 x 4 feet, 800-1000 mm of guard rail to ensure proper space for sampling team and equipment required for monitoring. For monitoring platform installation, para 2.5.3, 2.5.4 & 2.5.6 at page 19 & 20 of ERP-III may be referred.

Regional Office, Bhiwadi
Rajasthan State Pollution Control Board
Plot No. GO-1, Phase-II, RIICO Industrial Area, Bhiwadi-301019
e-mail: robhiwadi@gmail.com

6. To ensure that the port hole and ladder facility is safe to carry out monitoring. In place of monkey ladder, spiral type/scaffold ladder shall be provided to ensure safety of monitoring personnel.

You are further directed to submit a compliance report to this office regarding the above directions by 28.03.2026.

In the event of failure to comply with the above directions within the stipulated time, the absence of proper stack monitoring facility as per ERP-III and as prescribed above shall be considered as violation and appropriate action shall be taken including closure of the industry, without any further notice in this matter. Further, any other action deemed appropriate under the provisions of the said Acts may also be initiated.

Yours sincerely,

a

- Sub: Directions under Section 31A of the Air (Prevention and Control of Pollution) Act, 1981 to provide and maintain stack emission monitoring facilities in accordance with Emission Regulation Part – III (ERP-III) published by CPCB in air polluting industry: regarding
- Ref: Directions issued by Central Pollution Control Board (CPCB) under Section 18(1)(b) of the Air Act, 1981, to RSPCB vide letter dated 12.03.2026

Sir/Madam

1. Whereas, the Water (Prevention and Control of Pollution) Act, 1974 and the Air (Prevention and Control of Pollution) Act, 1981 (hereinafter collectively referred to as the "Acts") have come into force throughout the country with effect from 23.03.1974 and 16.05.1981, respectively.
2. And whereas, the said Acts have been enacted to provide for the prevention, control, and abatement of water and air pollution and for maintaining and restoring the wholesomeness of water and air, and the Rajasthan State Pollution Control Board (hereinafter referred to as the "Board") has been vested with the powers to take such steps as may be deemed necessary for enforcement of the provisions of the aforesaid Acts.
3. And whereas, under the provisions of Section 24 of the Water Act, no person shall knowingly cause or permit any poisonous, noxious, or polluting matter, determined in accordance with the standards laid down by the Board, to enter any stream, well, sewer, or land.
4. And whereas under the provisions of section 25/26 of the Act, no person shall without the previous consent of the Board establish or take any steps to establish, any industry,

Regional Office, Bhiwadi
Rajasthan State Pollution Control Board
Plot No. GO-1, Phase-II, RIICO Industrial Area, Bhiwadi-301019
e-mail: robhiwadi@gmail.com

operation or process or any treatment and disposal system or any extension or addition thereto, which is likely to discharge sewage or trade effluent into a stream or well or sewer or on land or bring into use any new or altered outlet for the discharge or sewage or trade effluent or begin to make any new discharge of sewage or trade effluent.

5. And whereas under the provisions of section 21 of the Air Act, no person shall without the previous consent of the Board, establish or operate any industrial plant in an air pollution control area. Industrial plant, under the Air Act, has been defined to mean any plant used for any industrial or trade purposes and emitting any air pollutant into the atmosphere.
6. And whereas under the provisions of section 22 of the Air Act, no person operating any industrial plant, in any air pollution control area shall discharge or cause or permit to be discharged the emission of any air pollutant more than the prescribed standards.
7. And whereas, an industry has been established in the name & style of **M/s Sindh Bricks Industries** at **KISHANGARH ROAD, KHAIRTHAL, District Khairthal Tijara** (hereinafter referred to as 'the industry') and the process is such that it generates polluted trade/domestic effluent & air emission.
8. And whereas, the Central Pollution Control Board (CPCB), New Delhi, has published Emission Regulation Part-III (ERP-III) in December 1985, prescribing monitoring requirement for industries including provisions relating to stack monitoring facilities, equipment, and testing procedures for regulation of emissions from industrial sources.
9. And whereas, provision of proper stack monitoring facilities is essential for assessing compliance of industries with prescribed emission standards and for enabling regulatory authorities to undertake effective monitoring and enforcement actions.
10. And whereas, the CPCB vide letter dated 12.03.2026 issued directions to the RSPCB under Section 18(1)(b) of the Air Act, 1981 to ensure compliance of provisions of ERP-III published by CPCB in air polluting industries in Delhi-NCR.
11. And whereas, your industry falls within the ambit of the aforesaid directions issued by CPCB.
12. And whereas the Board may, in exercise of the powers conferred upon it under the provisions of the section 33A of the Water Act and section 31A of the Air Act and in

Regional Office, Bhiwadi
Rajasthan State Pollution Control Board
Plot No. GO-1, Phase-II, RIICO Industrial Area, Bhiwadi-301019
e-mail: robhiwadi@gmail.com

performance of its functions conferred under these Acts, issue directions in writing to any person, officer or any authority and such person, officer or authority shall be bound to comply with such directions which includes the power direct: -

- a. The closure, prohibition or regulation of any industry, operation or process or
- b. Stoppage or regulation of the supply of electricity or water or any other service.

Therefore, in exercise of the powers conferred under Section 31A of the Air Act, 1981, and in discharge of the functions entrusted under the Water Act, 1974 and the Air Act, 1981, and to ensure compliance with the directions issued by the CPCB on 12.03.2026, you are hereby directed to ensure the following: -

1. To provide/ensure stack monitoring facilities in accordance with the Emission Regulation Part-III (ERP-III) latest by March 28,2026 for all the stacks attached to potential air polluting sources such as Boiler, Furnaces, Thermic Fluid Heaters, Kilns and Process Emissions.
2. To ensure that the position of port-hole should comply with Emission Regulation Part-III (ERP-III) published by CPCB. Special emphasis shall be given to the criteria of compliance of minimum 8D downstream from flow disturbance and minimum 2D from top of stack to ensure laminar flow at sampling point in the stack. For other details pertaining to location of port-hole para 2.5.0 at page 18 of ERP-III may be referred.
3. To provide a separate port hole of 0.1 m diameter for manual emission sampling. For port hole installation para 2.5.2 at page 19 of ERP-III may be referred.
4. In case, if the Online Continuous Emission Monitoring Systems (OCEMS) is mandated as per consent conditions, the plane of port hole for OCEMS should be 500 mm below (vertically) the plane of manual sampling port hole.
5. To ensure that the platform for monitoring should have capacity to bear 300-350 kg of weight, it should have a size of minimum 6 x 4 feet, 800-1000 mm of guard rail to ensure proper space for sampling team and equipment required for monitoring. For monitoring platform installation, para 2.5.3, 2.5.4 & 2.5.6 at page 19 & 20 of ERP-III may be referred.

Regional Office, Bhiwadi
Rajasthan State Pollution Control Board
Plot No. GO-1, Phase-II, RIICO Industrial Area, Bhiwadi-301019
e-mail: robhiwadi@gmail.com

6. To ensure that the port hole and ladder facility is safe to carry out monitoring. In place of monkey ladder, spiral type/scaffold ladder shall be provided to ensure safety of monitoring personnel.

You are further directed to submit a compliance report to this office regarding the above directions by 28.03.2026.

In the event of failure to comply with the above directions within the stipulated time, the absence of proper stack monitoring facility as per ERP-III and as prescribed above shall be considered as violation and appropriate action shall be taken including closure of the industry, without any further notice in this matter. Further, any other action deemed appropriate under the provisions of the said Acts may also be initiated.

Yours sincerely,

a

- Ref:** Directions issued by Central Pollution Control Board (CPCB) under Section 18(1)(b) of the Air Act, 1981, to RSPCB vide letter dated 12.03.2026

Sir/Madam

1. Whereas, the Water (Prevention and Control of Pollution) Act, 1974 and the Air (Prevention and Control of Pollution) Act, 1981 (hereinafter collectively referred to as the “Acts”) have come into force throughout the country with effect from 23.03.1974 and 16.05.1981, respectively.
2. And whereas, the said Acts have been enacted to provide for the prevention, control, and abatement of water and air pollution and for maintaining and restoring the wholesomeness of water and air, and the Rajasthan State Pollution Control Board (hereinafter referred to as the “Board”) has been vested with the powers to take such steps as may be deemed necessary for enforcement of the provisions of the aforesaid Acts.
3. And whereas, under the provisions of Section 24 of the Water Act, no person shall knowingly cause or permit any poisonous, noxious, or polluting matter, determined in accordance with the standards laid down by the Board, to enter any stream, well, sewer, or land.
4. And whereas under the provisions of section 25/26 of the Act, no person shall without the previous consent of the Board establish or take any steps to establish, any industry, operation or process or any treatment and disposal system or any extension or addition

Regional Office, Bhiwadi
Rajasthan State Pollution Control Board
Plot No. GO-1, Phase-II, RIICO Industrial Area, Bhiwadi-301019
e-mail: robhiwadi@gmail.com

thereto, which is likely to discharge sewage or trade effluent into a stream or well or sewer or on land or bring into use any new or altered outlet for the discharge of sewage or trade effluent or begin to make any new discharge of sewage or trade effluent.

5. And whereas under the provisions of section 21 of the Air Act, no person shall without the previous consent of the Board, establish or operate any industrial plant in an air pollution control area. Industrial plant, under the Air Act, has been defined to mean any plant used for any industrial or trade purposes and emitting any air pollutant into the atmosphere.
6. And whereas under the provisions of section 22 of the Air Act, no person operating any industrial plant, in any air pollution control area shall discharge or cause or permit to be discharged the emission of any air pollutant more than the prescribed standards.
7. And whereas, an industry has been established in the name & style of **M/s A. P. INDUSTRIES** at **G-1-111, RIA, CHOPANKI, District Khairthal Tijara** (hereinafter referred to as "the industry") and the process is such that it generates polluted trade/domestic effluent & air emission.
8. And whereas, the Central Pollution Control Board (CPCB), New Delhi, has published Emission Regulation Part-III (ERP-III) in December 1985, prescribing monitoring requirement for industries including provisions relating to stack monitoring facilities, equipment, and testing procedures for regulation of emissions from industrial sources.
9. And whereas, provision of proper stack monitoring facilities is essential for assessing compliance of industries with prescribed emission standards and for enabling regulatory authorities to undertake effective monitoring and enforcement actions.
10. And whereas, the CPCB vide letter dated 12.03.2026 issued directions to the RSPCB under Section 18(1)(b) of the Air Act, 1981 to ensure compliance of provisions of ERP-III published by CPCB in air polluting industries in Delhi-NCR.
11. And whereas, your industry falls within the ambit of the aforesaid directions issued by CPCB.
12. And whereas the Board may, in exercise of the powers conferred upon it under the provisions of the section 33A of the Water Act and section 31A of the Air Act and in performance of its functions conferred under these Acts, issue directions in writing to any

Regional Office, Bhiwadi
Rajasthan State Pollution Control Board
Plot No. GO-1, Phase-II, RIICO Industrial Area, Bhiwadi-301019
e-mail: robhiwadi@gmail.com

person, officer or any authority and such person, officer or authority shall be bound to comply with such directions which includes the power direct: –

- a. The closure, prohibition or regulation of any industry, operation or process or
- b. Stoppage or regulation of the supply of electricity or water or any other service.

Therefore, in exercise of the powers conferred under Section 31A of the Air Act, 1981, and in discharge of the functions entrusted under the Water Act, 1974 and the Air Act, 1981, and to ensure compliance with the directions issued by the CPCB on 12.03.2026, you are hereby directed to ensure the following: –

1. To provide/ensure stack monitoring facilities in accordance with the Emission Regulation Part-III (ERP-III) latest by March 28, 2026 for all the stacks attached to potential air polluting sources such as Boiler, Furnaces, Thermic Fluid Heaters, Kilns and Process Emissions.
2. To ensure that the position of port-hole should comply with Emission Regulation Part-III (ERP-III) published by CPCB. Special emphasis shall be given to the criteria of compliance of minimum 8D downstream from flow disturbance and minimum 2D from top of stack to ensure laminar flow at sampling point in the stack. For other details pertaining to location of port-hole para 2.5.0 at page 18 of ERP-III may be referred.
3. To provide a separate port hole of 0.1 m diameter for manual emission sampling. For port hole installation para 2.5.2 at page 19 of ERP-III may be referred.
4. In case, if the Online Continuous Emission Monitoring Systems (OCEMS) is mandated as per consent conditions, the plane of port hole for OCEMS should be 500 mm below (vertically) the plane of manual sampling port hole.
5. To ensure that the platform for monitoring should have capacity to bear 300–350 kg of weight, it should have a size of minimum 6 x 4 feet, 800–1000 mm of guard rail to ensure proper space for sampling team and equipment required for monitoring. For monitoring platform installation, para 2.5.3, 2.5.4 & 2.5.6 at page 19 & 20 of ERP-III may be referred.
6. To ensure that the port hole and ladder facility is safe to carry out monitoring. In place of monkey ladder, spiral type/scaffold ladder shall be provided to ensure safety of monitoring personnel.

Regional Office, Bhiwadi
Rajasthan State Pollution Control Board
Plot No. GO-1, Phase-II, RIICO Industrial Area, Bhiwadi-301019
e-mail: robhiwadi@gmail.com

You are further directed to submit a compliance report to this office regarding the above directions by 28.03.2026.

In the event of failure to comply with the above directions within the stipulated time, the absence of proper stack monitoring facility as per ERP-III and as prescribed above shall be considered as violation and appropriate action shall be taken including closure of the industry, without any further notice in this matter. Further, any other action deemed appropriate under the provisions of the said Acts may also be initiated.

Yours sincerely,

Sir/Madam

1. Whereas, the Water (Prevention and Control of Pollution) Act, 1974 and the Air (Prevention and Control of Pollution) Act, 1981 (hereinafter collectively referred to as the “Acts”) have come into force throughout the country with effect from 23.03.1974 and 16.05.1981, respectively.
2. And whereas, the said Acts have been enacted to provide for the prevention, control, and abatement of water and air pollution and for maintaining and restoring the wholesomeness of water and air, and the Rajasthan State Pollution Control Board (hereinafter referred to as the “Board”) has been vested with the powers to take such steps as may be deemed necessary for enforcement of the provisions of the aforesaid Acts.
3. And whereas, under the provisions of Section 24 of the Water Act, no person shall knowingly cause or permit any poisonous, noxious, or polluting matter, determined in accordance with the standards laid down by the Board, to enter any stream, well, sewer, or land.
4. And whereas under the provisions of section 25/26 of the Act, no person shall without the previous consent of the Board establish or take any steps to establish, any industry, operation or process or any treatment and disposal system or any extension or addition

Regional Office, Bhiwadi
Rajasthan State Pollution Control Board
Plot No. GO-1, Phase-II, RIICO Industrial Area, Bhiwadi-301019
e-mail: robhiwadi@gmail.com

thereto, which is likely to discharge sewage or trade effluent into a stream or well or sewer or on land or bring into use any new or altered outlet for the discharge of sewage or trade effluent or begin to make any new discharge of sewage or trade effluent.

5. And whereas under the provisions of section 21 of the Air Act, no person shall without the previous consent of the Board, establish or operate any industrial plant in an air pollution control area. Industrial plant, under the Air Act, has been defined to mean any plant used for any industrial or trade purposes and emitting any air pollutant into the atmosphere.
6. And whereas under the provisions of section 22 of the Air Act, no person operating any industrial plant, in any air pollution control area shall discharge or cause or permit to be discharged the emission of any air pollutant more than the prescribed standards.
7. And whereas, an industry has been established in the name & style of **M/s Abhinandan Export Limited** at **E-367 RIA Bhiwadi, District Khairthal Tijara** (hereinafter referred to as 'the industry') and the process is such that it generates polluted trade/domestic effluent & air emission.
8. And whereas, the Central Pollution Control Board (CPCB), New Delhi, has published Emission Regulation Part-III (ERP-III) in December 1985, prescribing monitoring requirement for industries including provisions relating to stack monitoring facilities, equipment, and testing procedures for regulation of emissions from industrial sources.
9. And whereas, provision of proper stack monitoring facilities is essential for assessing compliance of industries with prescribed emission standards and for enabling regulatory authorities to undertake effective monitoring and enforcement actions.
10. And whereas, the CPCB vide letter dated 12.03.2026 issued directions to the RSPCB under Section 18(1)(b) of the Air Act, 1981 to ensure compliance of provisions of ERP-III published by CPCB in air polluting industries in Delhi-NCR.
11. And whereas, your industry falls within the ambit of the aforesaid directions issued by CPCB.
12. And whereas the Board may, in exercise of the powers conferred upon it under the provisions of the section 33A of the Water Act and section 31A of the Air Act and in performance of its functions conferred under these Acts, issue directions in writing to any

Regional Office, Bhiwadi
Rajasthan State Pollution Control Board
Plot No. GO-1, Phase-II, RIICO Industrial Area, Bhiwadi-301019
e-mail: robhiwadi@gmail.com

person, officer or any authority and such person, officer or authority shall be bound to comply with such directions which includes the power direct: –

- a. The closure, prohibition or regulation of any industry, operation or process or
- b. Stoppage or regulation of the supply of electricity or water or any other service.

Therefore, in exercise of the powers conferred under Section 31A of the Air Act, 1981, and in discharge of the functions entrusted under the Water Act, 1974 and the Air Act, 1981, and to ensure compliance with the directions issued by the CPCB on 12.03.2026, you are hereby directed to ensure the following: –

1. To provide/ensure stack monitoring facilities in accordance with the Emission Regulation Part-III (ERP-III) latest by March 28, 2026 for all the stacks attached to potential air polluting sources such as Boiler, Furnaces, Thermic Fluid Heaters, Kilns and Process Emissions.
2. To ensure that the position of port-hole should comply with Emission Regulation Part-III (ERP-III) published by CPCB. Special emphasis shall be given to the criteria of compliance of minimum 8D downstream from flow disturbance and minimum 2D from top of stack to ensure laminar flow at sampling point in the stack. For other details pertaining to location of port-hole para 2.5.0 at page 18 of ERP-III may be referred.
3. To provide a separate port hole of 0.1 m diameter for manual emission sampling. For port hole installation para 2.5.2 at page 19 of ERP-III may be referred.
4. In case, if the Online Continuous Emission Monitoring Systems (OCEMS) is mandated as per consent conditions, the plane of port hole for OCEMS should be 500 mm below (vertically) the plane of manual sampling port hole.
5. To ensure that the platform for monitoring should have capacity to bear 300–350 kg of weight, it should have a size of minimum 6 x 4 feet, 800–1000 mm of guard rail to ensure proper space for sampling team and equipment required for monitoring. For monitoring platform installation, para 2.5.3, 2.5.4 & 2.5.6 at page 19 & 20 of ERP-III may be referred.
6. To ensure that the port hole and ladder facility is safe to carry out monitoring. In place of monkey ladder, spiral type/scaffold ladder shall be provided to ensure safety of monitoring personnel.

Regional Office, Bhiwadi

thereto, which is likely to discharge sewage or trade effluent into a stream or well or sewer or on land or bring into use any new or altered outlet for the discharge of sewage or trade effluent or begin to make any new discharge of sewage or trade effluent.

5. And whereas under the provisions of section 21 of the Air Act, no person shall without the previous consent of the Board, establish or operate any industrial plant in an air pollution control area. Industrial plant, under the Air Act, has been defined to mean any plant used for any industrial or trade purposes and emitting any air pollutant into the atmosphere.
6. And whereas under the provisions of section 22 of the Air Act, no person operating any industrial plant, in any air pollution control area shall discharge or cause or permit to be discharged the emission of any air pollutant more than the prescribed standards.
7. And whereas, an industry has been established in the name & style of **M/s AEROCOACH PRIVATE LIMITED** at **B-9, RIA, Karoli, District Khairthal Tijara** (hereinafter referred to as 'the industry') and the process is such that it generates polluted trade/domestic effluent & air emission.
8. And whereas, the Central Pollution Control Board (CPCB), New Delhi, has published Emission Regulation Part-III (ERP-III) in December 1985, prescribing monitoring requirement for industries including provisions relating to stack monitoring facilities, equipment, and testing procedures for regulation of emissions from industrial sources.
9. And whereas, provision of proper stack monitoring facilities is essential for assessing compliance of industries with prescribed emission standards and for enabling regulatory authorities to undertake effective monitoring and enforcement actions.
10. And whereas, the CPCB vide letter dated 12.03.2026 issued directions to the RSPCB under Section 18(1)(b) of the Air Act, 1981 to ensure compliance of provisions of ERP-III published by CPCB in air polluting industries in Delhi-NCR.
11. And whereas, your industry falls within the ambit of the aforesaid directions issued by CPCB.
12. And whereas the Board may, in exercise of the powers conferred upon it under the provisions of the section 33A of the Water Act and section 31A of the Air Act and in performance of its functions conferred under these Acts, issue directions in writing to any

e-mail: robhiwadi@gmail.com

person, officer or any authority and such person, officer or authority shall be bound to comply with such directions which includes the power direct: –

- a. The closure, prohibition or regulation of any industry, operation or process or
- b. Stoppage or regulation of the supply of electricity or water or any other service.

Therefore, in exercise of the powers conferred under Section 31A of the Air Act, 1981, and in discharge of the functions entrusted under the Water Act, 1974 and the Air Act, 1981, and to ensure compliance with the directions issued by the CPCB on 12.03.2026, you are hereby directed to ensure the following: –

1. To provide/ensure stack monitoring facilities in accordance with the Emission Regulation Part-III (ERP-III) latest by March 28, 2026 for all the stacks attached to potential air polluting sources such as Boiler, Furnaces, Thermic Fluid Heaters, Kilns and Process Emissions.
2. To ensure that the position of port-hole should comply with Emission Regulation Part-III (ERP-III) published by CPCB. Special emphasis shall be given to the criteria of compliance of minimum 8D downstream from flow disturbance and minimum 2D from top of stack to ensure laminar flow at sampling point in the stack. For other details pertaining to location of port-hole para 2.5.0 at page 18 of ERP-III may be referred.
3. To provide a separate port hole of 0.1 m diameter for manual emission sampling. For port hole installation para 2.5.2 at page 19 of ERP-III may be referred.
4. In case, if the Online Continuous Emission Monitoring Systems (OCEMS) is mandated as per consent conditions, the plane of port hole for OCEMS should be 500 mm below (vertically) the plane of manual sampling port hole.
5. To ensure that the platform for monitoring should have capacity to bear 300–350 kg of weight, it should have a size of minimum 6 x 4 feet, 800–1000 mm of guard rail to ensure proper space for sampling team and equipment required for monitoring. For monitoring platform installation, para 2.5.3, 2.5.4 & 2.5.6 at page 19 & 20 of ERP-III may be referred.
6. To ensure that the port hole and ladder facility is safe to carry out monitoring. In place of monkey ladder, spiral type/scaffold ladder shall be provided to ensure safety of monitoring personnel.

Regional Office, Bhiwadi

e-mail: robhiwadi@gmail.com

thereto, which is likely to discharge sewage or trade effluent into a stream or well or sewer or on land or bring into use any new or altered outlet for the discharge of sewage or trade effluent or begin to make any new discharge of sewage or trade effluent.

5. And whereas under the provisions of section 21 of the Air Act, no person shall without the previous consent of the Board, establish or operate any industrial plant in an air pollution control area. Industrial plant, under the Air Act, has been defined to mean any plant used for any industrial or trade purposes and emitting any air pollutant into the atmosphere.
6. And whereas under the provisions of section 22 of the Air Act, no person operating any industrial plant, in any air pollution control area shall discharge or cause or permit to be discharged the emission of any air pollutant more than the prescribed standards.
7. And whereas, an industry has been established in the name & style of **M/s ALGO Industries** at **F-953(A), RIA, Chopanki, District Khairthal Tijara** (hereinafter referred to as 'the industry') and the process is such that it generates polluted trade/domestic effluent & air emission.
8. And whereas, the Central Pollution Control Board (CPCB), New Delhi, has published Emission Regulation Part-III (ERP-III) in December 1985, prescribing monitoring requirement for industries including provisions relating to stack monitoring facilities, equipment, and testing procedures for regulation of emissions from industrial sources.
9. And whereas, provision of proper stack monitoring facilities is essential for assessing compliance of industries with prescribed emission standards and for enabling regulatory authorities to undertake effective monitoring and enforcement actions.
10. And whereas, the CPCB vide letter dated 12.03.2026 issued directions to the RSPCB under Section 18(1)(b) of the Air Act, 1981 to ensure compliance of provisions of ERP-III published by CPCB in air polluting industries in Delhi-NCR.
11. And whereas, your industry falls within the ambit of the aforesaid directions issued by CPCB.
12. And whereas the Board may, in exercise of the powers conferred upon it under the provisions of the section 33A of the Water Act and section 31A of the Air Act and in performance of its functions conferred under these Acts, issue directions in writing to any

Plot No. GO-1, Phase-II, RIICO Industrial Area, Bhiwadi-301019
e-mail: robhiwadi@gmail.com

person, officer or any authority and such person, officer or authority shall be bound to comply with such directions which includes the power direct: –

- a. The closure, prohibition or regulation of any industry, operation or process or
- b. Stoppage or regulation of the supply of electricity or water or any other service.

Therefore, in exercise of the powers conferred under Section 31A of the Air Act, 1981, and in discharge of the functions entrusted under the Water Act, 1974 and the Air Act, 1981, and to ensure compliance with the directions issued by the CPCB on 12.03.2026, you are hereby directed to ensure the following: –

1. To provide/ensure stack monitoring facilities in accordance with the Emission Regulation Part-III (ERP-III) latest by March 28,2026 for all the stacks attached to potential air polluting sources such as Boiler, Furnaces, Thermic Fluid Heaters, Kilns and Process Emissions.
2. To ensure that the position of port-hole should comply with Emission Regulation Part-III (ERP-III) published by CPCB. Special emphasis shall be given to the criteria of compliance of minimum 8D downstream from flow disturbance and minimum 2D from top of stack to ensure laminar flow at sampling point in the stack. For other details pertaining to location of port-hole para 2.5.0 at page 18 of ERP-III may be referred.
3. To provide a separate port hole of 0.1 m diameter for manual emission sampling. For port hole installation para 2.5.2 at page 19 of ERP-III may be referred.
4. In case, if the Online Continuous Emission Monitoring Systems (OCEMS) is mandated as per consent conditions, the plane of port hole for OCEMS should be 500 mm below (vertically) the plane of manual sampling port hole.
5. To ensure that the platform for monitoring should have capacity to bear 300–350 kg of weight, it should have a size of minimum 6 x 4 feet, 800–1000 mm of guard rail to ensure proper space for sampling team and equipment required for monitoring. For monitoring platform installation, para 2.5.3, 2.5.4 & 2.5.6 at page 19 & 20 of ERP-III may be referred.
6. To ensure that the port hole and ladder facility is safe to carry out monitoring. In place of monkey ladder, spiral type/scaffold ladder shall be provided to ensure safety of monitoring personnel.

Regional Office, Bhiwadi

thereto, which is likely to discharge sewage or trade effluent into a stream or well or sewer or on land or bring into use any new or altered outlet for the discharge of sewage or trade effluent or begin to make any new discharge of sewage or trade effluent.

5. And whereas under the provisions of section 21 of the Air Act, no person shall without the previous consent of the Board, establish or operate any industrial plant in an air pollution control area. Industrial plant, under the Air Act, has been defined to mean any plant used for any industrial or trade purposes and emitting any air pollutant into the atmosphere.
6. And whereas under the provisions of section 22 of the Air Act, no person operating any industrial plant, in any air pollution control area shall discharge or cause or permit to be discharged the emission of any air pollutant more than the prescribed standards.
7. And whereas, an industry has been established in the name & style of **M/s Aqualite industries private limited** at **G1-1033 RIA Bhiwadi, District Khairthal Tijara** (hereinafter referred to as 'the industry') and the process is such that it generates polluted trade/domestic effluent & air emission.
8. And whereas, the Central Pollution Control Board (CPCB), New Delhi, has published Emission Regulation Part-III (ERP-III) in December 1985, prescribing monitoring requirement for industries including provisions relating to stack monitoring facilities, equipment, and testing procedures for regulation of emissions from industrial sources.
9. And whereas, provision of proper stack monitoring facilities is essential for assessing compliance of industries with prescribed emission standards and for enabling regulatory authorities to undertake effective monitoring and enforcement actions.
10. And whereas, the CPCB vide letter dated 12.03.2026 issued directions to the RSPCB under Section 18(1)(b) of the Air Act, 1981 to ensure compliance of provisions of ERP-III published by CPCB in air polluting industries in Delhi-NCR.
11. And whereas, your industry falls within the ambit of the aforesaid directions issued by CPCB.
12. And whereas the Board may, in exercise of the powers conferred upon it under the provisions of the section 33A of the Water Act and section 31A of the Air Act and in performance of its functions conferred under these Acts, issue directions in writing to any

e-mail: robhiwadi@gmail.com

person, officer or any authority and such person, officer or authority shall be bound to comply with such directions which includes the power direct: –

- a. The closure, prohibition or regulation of any industry, operation or process or
- b. Stoppage or regulation of the supply of electricity or water or any other service.

Therefore, in exercise of the powers conferred under Section 31A of the Air Act, 1981, and in discharge of the functions entrusted under the Water Act, 1974 and the Air Act, 1981, and to ensure compliance with the directions issued by the CPCB on 12.03.2026, you are hereby directed to ensure the following: –

1. To provide/ensure stack monitoring facilities in accordance with the Emission Regulation Part-III (ERP-III) latest by March 28,2026 for all the stacks attached to potential air polluting sources such as Boiler, Furnaces, Thermic Fluid Heaters, Kilns and Process Emissions.
2. To ensure that the position of port-hole should comply with Emission Regulation Part-III (ERP-III) published by CPCB. Special emphasis shall be given to the criteria of compliance of minimum 8D downstream from flow disturbance and minimum 2D from top of stack to ensure laminar flow at sampling point in the stack. For other details pertaining to location of port-hole para 2.5.0 at page 18 of ERP-III may be referred.
3. To provide a separate port hole of 0.1 m diameter for manual emission sampling. For port hole installation para 2.5.2 at page 19 of ERP-III may be referred.
4. In case, if the Online Continuous Emission Monitoring Systems (OCEMS) is mandated as per consent conditions, the plane of port hole for OCEMS should be 500 mm below (vertically) the plane of manual sampling port hole.
5. To ensure that the platform for monitoring should have capacity to bear 300–350 kg of weight, it should have a size of minimum 6 x 4 feet, 800–1000 mm of guard rail to ensure proper space for sampling team and equipment required for monitoring. For monitoring platform installation, para 2.5.3, 2.5.4 & 2.5.6 at page 19 & 20 of ERP-III may be referred.
6. To ensure that the port hole and ladder facility is safe to carry out monitoring. In place of monkey ladder, spiral type/scaffold ladder shall be provided to ensure safety of monitoring personnel.

Regional Office, Bhiwadi
Rajasthan State Pollution Control Board

thereto, which is likely to discharge sewage or trade effluent into a stream or well or sewer or on land or bring into use any new or altered outlet for the discharge of sewage or trade effluent or begin to make any new discharge of sewage or trade effluent.

5. And whereas under the provisions of section 21 of the Air Act, no person shall without the previous consent of the Board, establish or operate any industrial plant in an air pollution control area. Industrial plant, under the Air Act, has been defined to mean any plant used for any industrial or trade purposes and emitting any air pollutant into the atmosphere.
6. And whereas under the provisions of section 22 of the Air Act, no person operating any industrial plant, in any air pollution control area shall discharge or cause or permit to be discharged the emission of any air pollutant more than the prescribed standards.
7. And whereas, an industry has been established in the name & style of **M/s Aromatic Allied & Organic Pvt. Ltd. (Old Name Jain N Gupta Healthy Products Pvt. Ltd.)** at **G1-946, RIA, Bhiwadi, District Khairthal Tijara** (hereinafter referred to as 'the industry') and the process is such that it generates polluted trade/domestic effluent & air emission.
8. And whereas, the Central Pollution Control Board (CPCB), New Delhi, has published Emission Regulation Part-III (ERP-III) in December 1985, prescribing monitoring requirement for industries including provisions relating to stack monitoring facilities, equipment, and testing procedures for regulation of emissions from industrial sources.
9. And whereas, provision of proper stack monitoring facilities is essential for assessing compliance of industries with prescribed emission standards and for enabling regulatory authorities to undertake effective monitoring and enforcement actions.
10. And whereas, the CPCB vide letter dated 12.03.2026 issued directions to the RSPCB under Section 18(1)(b) of the Air Act, 1981 to ensure compliance of provisions of ERP-III published by CPCB in air polluting industries in Delhi-NCR.
11. And whereas, your industry falls within the ambit of the aforesaid directions issued by CPCB.
12. And whereas the Board may, in exercise of the powers conferred upon it under the provisions of the section 33A of the Water Act and section 31A of the Air Act and in performance of its functions conferred under these Acts, issue directions in writing to any

e-mail: robhiwadi@gmail.com

person, officer or any authority and such person, officer or authority shall be bound to comply with such directions which includes the power direct: -

- a. The closure, prohibition or regulation of any industry, operation or process or
- b. Stoppage or regulation of the supply of electricity or water or any other service.

Therefore, in exercise of the powers conferred under Section 31A of the Air Act, 1981, and in discharge of the functions entrusted under the Water Act, 1974 and the Air Act, 1981, and to ensure compliance with the directions issued by the CPCB on 12.03.2026, you are hereby directed to ensure the following: -

1. To provide/ensure stack monitoring facilities in accordance with the Emission Regulation Part-III (ERP-III) latest by March 28, 2026 for all the stacks attached to potential air polluting sources such as Boiler, Furnaces, Thermic Fluid Heaters, Kilns and Process Emissions.
2. To ensure that the position of port-hole should comply with Emission Regulation Part-III (ERP-III) published by CPCB. Special emphasis shall be given to the criteria of compliance of minimum 8D downstream from flow disturbance and minimum 2D from top of stack to ensure laminar flow at sampling point in the stack. For other details pertaining to location of port-hole para 2.5.0 at page 18 of ERP-III may be referred.
3. To provide a separate port hole of 0.1 m diameter for manual emission sampling. For port hole installation para 2.5.2 at page 19 of ERP-III may be referred.
4. In case, if the Online Continuous Emission Monitoring Systems (OCEMS) is mandated as per consent conditions, the plane of port hole for OCEMS should be 500 mm below (vertically) the plane of manual sampling port hole.
5. To ensure that the platform for monitoring should have capacity to bear 300-350 kg of weight, it should have a size of minimum 6 x 4 feet, 800-1000 mm of guard rail to ensure proper space for sampling team and equipment required for monitoring. For monitoring platform installation, para 2.5.3, 2.5.4 & 2.5.6 at page 19 & 20 of ERP-III may be referred.
6. To ensure that the port hole and ladder facility is safe to carry out monitoring. In place of monkey ladder, spiral type/scaffold ladder shall be provided to ensure safety of monitoring personnel.

e-mail: robhiwadi@gmail.com

thereto, which is likely to discharge sewage or trade effluent into a stream or well or sewer or on land or bring into use any new or altered outlet for the discharge of sewage or trade effluent or begin to make any new discharge of sewage or trade effluent.

5. And whereas under the provisions of section 21 of the Air Act, no person shall without the previous consent of the Board, establish or operate any industrial plant in an air pollution control area. Industrial plant, under the Air Act, has been defined to mean any plant used for any industrial or trade purposes and emitting any air pollutant into the atmosphere.
6. And whereas under the provisions of section 22 of the Air Act, no person operating any industrial plant, in any air pollution control area shall discharge or cause or permit to be discharged the emission of any air pollutant more than the prescribed standards.
7. And whereas, an industry has been established in the name & style of **M/s Arya Alloys Pvt Ltd** at **B-824, RIA, Phase-III, RIA, Bhiwadi, District Khairthal Tijara** (hereinafter referred to as "the industry") and the process is such that it generates polluted trade/domestic effluent & air emission.
8. And whereas, the Central Pollution Control Board (CPCB), New Delhi, has published Emission Regulation Part-III (ERP-III) in December 1985, prescribing monitoring requirement for industries including provisions relating to stack monitoring facilities, equipment, and testing procedures for regulation of emissions from industrial sources.
9. And whereas, provision of proper stack monitoring facilities is essential for assessing compliance of industries with prescribed emission standards and for enabling regulatory authorities to undertake effective monitoring and enforcement actions.
10. And whereas, the CPCB vide letter dated 12.03.2026 issued directions to the RSPCB under Section 18(1)(b) of the Air Act, 1981 to ensure compliance of provisions of ERP-III published by CPCB in air polluting industries in Delhi-NCR.
11. And whereas, your industry falls within the ambit of the aforesaid directions issued by CPCB.
12. And whereas the Board may, in exercise of the powers conferred upon it under the provisions of the section 33A of the Water Act and section 31A of the Air Act and in performance of its functions conferred under these Acts, issue directions in writing to any

Plot No. GO-1, Phase-II, RIICO Industrial Area, Bhiwadi-301019
e-mail: robhiwadi@gmail.com

person, officer or any authority and such person, officer or authority shall be bound to comply with such directions which includes the power direct: –

- a. The closure, prohibition or regulation of any industry, operation or process or
- b. Stoppage or regulation of the supply of electricity or water or any other service.

Therefore, in exercise of the powers conferred under Section 31A of the Air Act, 1981, and in discharge of the functions entrusted under the Water Act, 1974 and the Air Act, 1981, and to ensure compliance with the directions issued by the CPCB on 12.03.2026, you are hereby directed to ensure the following: –

1. To provide/ensure stack monitoring facilities in accordance with the Emission Regulation Part-III (ERP-III) latest by March 28, 2026 for all the stacks attached to potential air polluting sources such as Boiler, Furnaces, Thermic Fluid Heaters, Kilns and Process Emissions.
2. To ensure that the position of port-hole should comply with Emission Regulation Part-III (ERP-III) published by CPCB. Special emphasis shall be given to the criteria of compliance of minimum 8D downstream from flow disturbance and minimum 2D from top of stack to ensure laminar flow at sampling point in the stack. For other details pertaining to location of port-hole para 2.5.0 at page 18 of ERP-III may be referred.
3. To provide a separate port hole of 0.1 m diameter for manual emission sampling. For port hole installation para 2.5.2 at page 19 of ERP-III may be referred.
4. In case, if the Online Continuous Emission Monitoring Systems (OCEMS) is mandated as per consent conditions, the plane of port hole for OCEMS should be 500 mm below (vertically) the plane of manual sampling port hole.
5. To ensure that the platform for monitoring should have capacity to bear 300–350 kg of weight, it should have a size of minimum 6 x 4 feet, 800–1000 mm of guard rail to ensure proper space for sampling team and equipment required for monitoring. For monitoring platform installation, para 2.5.3, 2.5.4 & 2.5.6 at page 19 & 20 of ERP-III may be referred.
6. To ensure that the port hole and ladder facility is safe to carry out monitoring. In place of monkey ladder, spiral type/scaffold ladder shall be provided to ensure safety of monitoring personnel.

Regional Office, Bhiwadi

e-mail: robhiwadi@gmail.com

thereto, which is likely to discharge sewage or trade effluent into a stream or well or sewer or on land or bring into use any new or altered outlet for the discharge or sewage or trade effluent or begin to make any new discharge of sewage or trade effluent.

5. And whereas under the provisions of section 21 of the Air Act, no person shall without the previous consent of the Board, establish or operate any industrial plant in an air pollution control area. Industrial plant, under the Air Act, has been defined to mean any plant used for any industrial or trade purposes and emitting any air pollutant into the atmosphere.
6. And whereas under the provisions of section 22 of the Air Act, no person operating any industrial plant, in any air pollution control area shall discharge or cause or permit to be discharged the emission of any air pollutant more than the prescribed standards.
7. And whereas, an industry has been established in the name & style of **M/s Associated Electrochemicals Pvt. Ltd.** at **SP-1037 RIA, Chopanki, District Khairthal Tijara** (hereinafter referred to as 'the industry') and the process is such that it generates polluted trade/domestic effluent & air emission.
8. And whereas, the Central Pollution Control Board (CPCB), New Delhi, has published Emission Regulation Part-III (ERP-III) in December 1985, prescribing monitoring requirement for industries including provisions relating to stack monitoring facilities, equipment, and testing procedures for regulation of emissions from industrial sources.
9. And whereas, provision of proper stack monitoring facilities is essential for assessing compliance of industries with prescribed emission standards and for enabling regulatory authorities to undertake effective monitoring and enforcement actions.
10. And whereas, the CPCB vide letter dated 12.03.2026 issued directions to the RSPCB under Section 18(1)(b) of the Air Act, 1981 to ensure compliance of provisions of ERP-III published by CPCB in air polluting industries in Delhi-NCR.
11. And whereas, your industry falls within the ambit of the aforesaid directions issued by CPCB.
12. And whereas the Board may, in exercise of the powers conferred upon it under the provisions of the section 33A of the Water Act and section 31A of the Air Act and in performance of its functions conferred under these Acts, issue directions in writing to any

e-mail: robhiwadi@gmail.com

person, officer or any authority and such person, officer or authority shall be bound to comply with such directions which includes the power direct: –

- a. The closure, prohibition or regulation of any industry, operation or process or
- b. Stoppage or regulation of the supply of electricity or water or any other service.

Therefore, in exercise of the powers conferred under Section 31A of the Air Act, 1981, and in discharge of the functions entrusted under the Water Act, 1974 and the Air Act, 1981, and to ensure compliance with the directions issued by the CPCB on 12.03.2026, you are hereby directed to ensure the following: –

1. To provide/ensure stack monitoring facilities in accordance with the Emission Regulation Part-III (ERP-III) latest by March 28, 2026 for all the stacks attached to potential air polluting sources such as Boiler, Furnaces, Thermic Fluid Heaters, Kilns and Process Emissions.
2. To ensure that the position of port-hole should comply with Emission Regulation Part-III (ERP-III) published by CPCB. Special emphasis shall be given to the criteria of compliance of minimum 8D downstream from flow disturbance and minimum 2D from top of stack to ensure laminar flow at sampling point in the stack. For other details pertaining to location of port-hole para 2.5.0 at page 18 of ERP-III may be referred.
3. To provide a separate port hole of 0.1 m diameter for manual emission sampling. For port hole installation para 2.5.2 at page 19 of ERP-III may be referred.
4. In case, if the Online Continuous Emission Monitoring Systems (OCEMS) is mandated as per consent conditions, the plane of port hole for OCEMS should be 500 mm below (vertically) the plane of manual sampling port hole.
5. To ensure that the platform for monitoring should have capacity to bear 300–350 kg of weight, it should have a size of minimum 6 x 4 feet, 800–1000 mm of guard rail to ensure proper space for sampling team and equipment required for monitoring. For monitoring platform installation, para 2.5.3, 2.5.4 & 2.5.6 at page 19 & 20 of ERP-III may be referred.
6. To ensure that the port hole and ladder facility is safe to carry out monitoring. In place of monkey ladder, spiral type/scaffold ladder shall be provided to ensure safety of monitoring personnel.

Regional Office, Bhiwadi

e-mail: robhiwadi@gmail.com

thereto, which is likely to discharge sewage or trade effluent into a stream or well or sewer or on land or bring into use any new or altered outlet for the discharge of sewage or trade effluent or begin to make any new discharge of sewage or trade effluent.

5. And whereas under the provisions of section 21 of the Air Act, no person shall without the previous consent of the Board, establish or operate any industrial plant in an air pollution control area. Industrial plant, under the Air Act, has been defined to mean any plant used for any industrial or trade purposes and emitting any air pollutant into the atmosphere.
6. And whereas under the provisions of section 22 of the Air Act, no person operating any industrial plant, in any air pollution control area shall discharge or cause or permit to be discharged the emission of any air pollutant more than the prescribed standards.
7. And whereas, an industry has been established in the name & style of **M/s Balaji Greenmet** at **G-97, RIA, Khushkhera, District Khairthal Tijara** (hereinafter referred to as 'the industry') and the process is such that it generates polluted trade/domestic effluent & air emission.
8. And whereas, the Central Pollution Control Board (CPCB), New Delhi, has published Emission Regulation Part-III (ERP-III) in December 1985, prescribing monitoring requirement for industries including provisions relating to stack monitoring facilities, equipment, and testing procedures for regulation of emissions from industrial sources.
9. And whereas, provision of proper stack monitoring facilities is essential for assessing compliance of industries with prescribed emission standards and for enabling regulatory authorities to undertake effective monitoring and enforcement actions.
10. And whereas, the CPCB vide letter dated 12.03.2026 issued directions to the RSPCB under Section 18(1)(b) of the Air Act, 1981 to ensure compliance of provisions of ERP-III published by CPCB in air polluting industries in Delhi-NCR.
11. And whereas, your industry falls within the ambit of the aforesaid directions issued by CPCB.
12. And whereas the Board may, in exercise of the powers conferred upon it under the provisions of the section 33A of the Water Act and section 31A of the Air Act and in performance of its functions conferred under these Acts, issue directions in writing to any

Plot No. GO-1, Phase-II, RIICO Industrial Area, Bhiwadi-301019
e-mail: robhiwadi@gmail.com

person, officer or any authority and such person, officer or authority shall be bound to comply with such directions which includes the power direct: –

- a. The closure, prohibition or regulation of any industry, operation or process or
- b. Stoppage or regulation of the supply of electricity or water or any other service.

Therefore, in exercise of the powers conferred under Section 31A of the Air Act, 1981, and in discharge of the functions entrusted under the Water Act, 1974 and the Air Act, 1981, and to ensure compliance with the directions issued by the CPCB on 12.03.2026, you are hereby directed to ensure the following: –

1. To provide/ensure stack monitoring facilities in accordance with the Emission Regulation Part-III (ERP-III) latest by March 28, 2026 for all the stacks attached to potential air polluting sources such as Boiler, Furnaces, Thermic Fluid Heaters, Kilns and Process Emissions.
2. To ensure that the position of port-hole should comply with Emission Regulation Part-III (ERP-III) published by CPCB. Special emphasis shall be given to the criteria of compliance of minimum 8D downstream from flow disturbance and minimum 2D from top of stack to ensure laminar flow at sampling point in the stack. For other details pertaining to location of port-hole para 2.5.0 at page 18 of ERP-III may be referred.
3. To provide a separate port hole of 0.1 m diameter for manual emission sampling. For port hole installation para 2.5.2 at page 19 of ERP-III may be referred.
4. In case, if the Online Continuous Emission Monitoring Systems (OCEMS) is mandated as per consent conditions, the plane of port hole for OCEMS should be 500 mm below (vertically) the plane of manual sampling port hole.
5. To ensure that the platform for monitoring should have capacity to bear 300–350 kg of weight, it should have a size of minimum 6 x 4 feet, 800–1000 mm of guard rail to ensure proper space for sampling team and equipment required for monitoring. For monitoring platform installation, para 2.5.3, 2.5.4 & 2.5.6 at page 19 & 20 of ERP-III may be referred.
6. To ensure that the port hole and ladder facility is safe to carry out monitoring. In place of monkey ladder, spiral type/scaffold ladder shall be provided to ensure safety of monitoring personnel.

e-mail: robhiwadi@gmail.com

thereto, which is likely to discharge sewage or trade effluent into a stream or well or sewer or on land or bring into use any new or altered outlet for the discharge or sewage or trade effluent or begin to make any new discharge of sewage or trade effluent.

5. And whereas under the provisions of section 21 of the Air Act, no person shall without the previous consent of the Board, establish or operate any industrial plant in an air pollution control area. Industrial plant, under the Air Act, has been defined to mean any plant used for any industrial or trade purposes and emitting any air pollutant into the atmosphere.
6. And whereas under the provisions of section 22 of the Air Act, no person operating any industrial plant, in any air pollution control area shall discharge or cause or permit to be discharged the emission of any air pollutant more than the prescribed standards.
7. And whereas, an industry has been established in the name & style of **M/s BAXY LIMITED** at **PLOT NO SP-496, AND 497. RIA, Bhiwadi, District Khairthal Tijara** (hereinafter referred to as 'the industry') and the process is such that it generates polluted trade/domestic effluent & air emission.
8. And whereas, the Central Pollution Control Board (CPCB), New Delhi, has published Emission Regulation Part-III (ERP-III) in December 1985, prescribing monitoring requirement for industries including provisions relating to stack monitoring facilities, equipment, and testing procedures for regulation of emissions from industrial sources.
9. And whereas, provision of proper stack monitoring facilities is essential for assessing compliance of industries with prescribed emission standards and for enabling regulatory authorities to undertake effective monitoring and enforcement actions.
10. And whereas, the CPCB vide letter dated 12.03.2026 issued directions to the RSPCB under Section 18(1)(b) of the Air Act, 1981 to ensure compliance of provisions of ERP-III published by CPCB in air polluting industries in Delhi-NCR.
11. And whereas, your industry falls within the ambit of the aforesaid directions issued by CPCB.
12. And whereas the Board may, in exercise of the powers conferred upon it under the provisions of the section 33A of the Water Act and section 31A of the Air Act and in performance of its functions conferred under these Acts, issue directions in writing to any

Rajasthan State Pollution Control Board
Plot No. GO-1, Phase-II, RIICO Industrial Area, Bhiwadi-301019
e-mail: robhiwadi@gmail.com

person, officer or any authority and such person, officer or authority shall be bound to comply with such directions which includes the power direct: –

- a. The closure, prohibition or regulation of any industry, operation or process or
- b. Stoppage or regulation of the supply of electricity or water or any other service.

Therefore, in exercise of the powers conferred under Section 31A of the Air Act, 1981, and in discharge of the functions entrusted under the Water Act, 1974 and the Air Act, 1981, and to ensure compliance with the directions issued by the CPCB on 12.03.2026, you are hereby directed to ensure the following: –

1. To provide/ensure stack monitoring facilities in accordance with the Emission Regulation Part-III (ERP-III) latest by March 28,2026 for all the stacks attached to potential air polluting sources such as Boiler, Furnaces, Thermic Fluid Heaters, Kilns and Process Emissions.
2. To ensure that the position of port-hole should comply with Emission Regulation Part-III (ERP-III) published by CPCB. Special emphasis shall be given to the criteria of compliance of minimum 8D downstream from flow disturbance and minimum 2D from top of stack to ensure laminar flow at sampling point in the stack. For other details pertaining to location of port-hole para 2.5.0 at page 18 of ERP-III may be referred.
3. To provide a separate port hole of 0.1 m diameter for manual emission sampling. For port hole installation para 2.5.2 at page 19 of ERP-III may be referred.
4. In case, if the Online Continuous Emission Monitoring Systems (OCEMS) is mandated as per consent conditions, the plane of port hole for OCEMS should be 500 mm below (vertically) the plane of manual sampling port hole.
5. To ensure that the platform for monitoring should have capacity to bear 300–350 kg of weight, it should have a size of minimum 6 x 4 feet, 800–1000 mm of guard rail to ensure proper space for sampling team and equipment required for monitoring. For monitoring platform installation, para 2.5.3, 2.5.4 & 2.5.6 at page 19 & 20 of ERP-III may be referred.
6. To ensure that the port hole and ladder facility is safe to carry out monitoring. In place of monkey ladder, spiral type/scaffold ladder shall be provided to ensure safety of monitoring personnel.

Regional Office, Bhiwadi

Plot No. GO-1, Phase-II, RIICO Industrial Area, Bhiwadi-301019
e-mail: robhiwadi@gmail.com

thereto, which is likely to discharge sewage or trade effluent into a stream or well or sewer or on land or bring into use any new or altered outlet for the discharge or sewage or trade effluent or begin to make any new discharge of sewage or trade effluent.

5. And whereas under the provisions of section 21 of the Air Act, no person shall without the previous consent of the Board, establish or operate any industrial plant in an air pollution control area. Industrial plant, under the Air Act, has been defined to mean any plant used for any industrial or trade purposes and emitting any air pollutant into the atmosphere.
6. And whereas under the provisions of section 22 of the Air Act, no person operating any industrial plant, in any air pollution control area shall discharge or cause or permit to be discharged the emission of any air pollutant more than the prescribed standards.
7. And whereas, an industry has been established in the name & style of **M/s Bhargava Phytolab Pvt Ltd** at **E-1216, Ghatal, RIA Bhiwadi, District Khairthal Tijara** (hereinafter referred to as 'the industry') and the process is such that it generates polluted trade/domestic effluent & air emission.
8. And whereas, the Central Pollution Control Board (CPCB), New Delhi, has published Emission Regulation Part-III (ERP-III) in December 1985, prescribing monitoring requirement for industries including provisions relating to stack monitoring facilities, equipment, and testing procedures for regulation of emissions from industrial sources.
9. And whereas, provision of proper stack monitoring facilities is essential for assessing compliance of industries with prescribed emission standards and for enabling regulatory authorities to undertake effective monitoring and enforcement actions.
10. And whereas, the CPCB vide letter dated 12.03.2026 issued directions to the RSPCB under Section 18(1)(b) of the Air Act, 1981 to ensure compliance of provisions of ERP-III published by CPCB in air polluting industries in Delhi-NCR.
11. And whereas, your industry falls within the ambit of the aforesaid directions issued by CPCB.
12. And whereas the Board may, in exercise of the powers conferred upon it under the provisions of the section 33A of the Water Act and section 31A of the Air Act and in performance of its functions conferred under these Acts, issue directions in writing to any

Regional Office, Bhiwadi

Plot No. GO-1, Phase-II, RIICO Industrial Area, Bhiwadi-301019
e-mail: robhiwadi@gmail.com

person, officer or any authority and such person, officer or authority shall be bound to comply with such directions which includes the power direct: –

- a. The closure, prohibition or regulation of any industry, operation or process or
- b. Stoppage or regulation of the supply of electricity or water or any other service.

Therefore, in exercise of the powers conferred under Section 31A of the Air Act, 1981, and in discharge of the functions entrusted under the Water Act, 1974 and the Air Act, 1981, and to ensure compliance with the directions issued by the CPCB on 12.03.2026, you are hereby directed to ensure the following: –

1. To provide/ensure stack monitoring facilities in accordance with the Emission Regulation Part-III (ERP-III) latest by March 28, 2026 for all the stacks attached to potential air polluting sources such as Boiler, Furnaces, Thermic Fluid Heaters, Kilns and Process Emissions.
2. To ensure that the position of port-hole should comply with Emission Regulation Part-III (ERP-III) published by CPCB. Special emphasis shall be given to the criteria of compliance of minimum 8D downstream from flow disturbance and minimum 2D from top of stack to ensure laminar flow at sampling point in the stack. For other details pertaining to location of port-hole para 2.5.0 at page 18 of ERP-III may be referred.
3. To provide a separate port hole of 0.1 m diameter for manual emission sampling. For port hole installation para 2.5.2 at page 19 of ERP-III may be referred.
4. In case, if the Online Continuous Emission Monitoring Systems (OCEMS) is mandated as per consent conditions, the plane of port hole for OCEMS should be 500 mm below (vertically) the plane of manual sampling port hole.
5. To ensure that the platform for monitoring should have capacity to bear 300–350 kg of weight, it should have a size of minimum 6 x 4 feet, 800–1000 mm of guard rail to ensure proper space for sampling team and equipment required for monitoring. For monitoring platform installation, para 2.5.3, 2.5.4 & 2.5.6 at page 19 & 20 of ERP-III may be referred.
6. To ensure that the port hole and ladder facility is safe to carry out monitoring. In place of monkey ladder, spiral type/scaffold ladder shall be provided to ensure safety of monitoring personnel.

thereto, which is likely to discharge sewage or trade effluent into a stream or well or sewer or on land or bring into use any new or altered outlet for the discharge of sewage or trade effluent or begin to make any new discharge of sewage or trade effluent.

5. And whereas under the provisions of section 21 of the Air Act, no person shall without the previous consent of the Board, establish or operate any industrial plant in an air pollution control area. Industrial plant, under the Air Act, has been defined to mean any plant used for any industrial or trade purposes and emitting any air pollutant into the atmosphere.
6. And whereas under the provisions of section 22 of the Air Act, no person operating any industrial plant, in any air pollution control area shall discharge or cause or permit to be discharged the emission of any air pollutant more than the prescribed standards.
7. And whereas, an industry has been established in the name & style of **M/s Bimal Ceramics** at **F-5(B), RIA, Bhiwadi, District Khairthal Tijara** (hereinafter referred to as 'the industry') and the process is such that it generates polluted trade/domestic effluent & air emission.
8. And whereas, the Central Pollution Control Board (CPCB), New Delhi, has published Emission Regulation Part-III (ERP-III) in December 1985, prescribing monitoring requirement for industries including provisions relating to stack monitoring facilities, equipment, and testing procedures for regulation of emissions from industrial sources.
9. And whereas, provision of proper stack monitoring facilities is essential for assessing compliance of industries with prescribed emission standards and for enabling regulatory authorities to undertake effective monitoring and enforcement actions.
10. And whereas, the CPCB vide letter dated 12.03.2026 issued directions to the RSPCB under Section 18(1)(b) of the Air Act, 1981 to ensure compliance of provisions of ERP-III published by CPCB in air polluting industries in Delhi-NCR.
11. And whereas, your industry falls within the ambit of the aforesaid directions issued by CPCB.
12. And whereas the Board may, in exercise of the powers conferred upon it under the provisions of the section 33A of the Water Act and section 31A of the Air Act and in performance of its functions conferred under these Acts, issue directions in writing to any

e-mail: robhiwadi@gmail.com

person, officer or any authority and such person, officer or authority shall be bound to comply with such directions which includes the power direct: –

- a. The closure, prohibition or regulation of any industry, operation or process or
- b. Stoppage or regulation of the supply of electricity or water or any other service.

Therefore, in exercise of the powers conferred under Section 31A of the Air Act, 1981, and in discharge of the functions entrusted under the Water Act, 1974 and the Air Act, 1981, and to ensure compliance with the directions issued by the CPCB on 12.03.2026, you are hereby directed to ensure the following: –

1. To provide/ensure stack monitoring facilities in accordance with the Emission Regulation Part-III (ERP-III) latest by March 28,2026 for all the stacks attached to potential air polluting sources such as Boiler, Furnaces, Thermic Fluid Heaters, Kilns and Process Emissions.
2. To ensure that the position of port-hole should comply with Emission Regulation Part-III (ERP-III) published by CPCB. Special emphasis shall be given to the criteria of compliance of minimum 8D downstream from flow disturbance and minimum 2D from top of stack to ensure laminar flow at sampling point in the stack. For other details pertaining to location of port-hole para 2.5.0 at page 18 of ERP-III may be referred.
3. To provide a separate port hole of 0.1 m diameter for manual emission sampling. For port hole installation para 2.5.2 at page 19 of ERP-III may be referred.
4. In case, if the Online Continuous Emission Monitoring Systems (OCEMS) is mandated as per consent conditions, the plane of port hole for OCEMS should be 500 mm below (vertically) the plane of manual sampling port hole.
5. To ensure that the platform for monitoring should have capacity to bear 300–350 kg of weight, it should have a size of minimum 6 x 4 feet, 800–1000 mm of guard rail to ensure proper space for sampling team and equipment required for monitoring. For monitoring platform installation, para 2.5.3, 2.5.4 & 2.5.6 at page 19 & 20 of ERP-III may be referred.
6. To ensure that the port hole and ladder facility is safe to carry out monitoring. In place of monkey ladder, spiral type/scaffold ladder shall be provided to ensure safety of monitoring personnel.

5. And whereas under the provisions of section 21 of the Air Act, no person shall without the previous consent of the Board, establish or operate any industrial plant in an air pollution control area. Industrial plant, under the Air Act, has been defined to mean any plant used for any industrial or trade purposes and emitting any air pollutant into the atmosphere.
6. And whereas under the provisions of section 22 of the Air Act, no person operating any industrial plant, in any air pollution control area shall discharge or cause or permit to be discharged the emission of any air pollutant more than the prescribed standards.
7. And whereas, an industry has been established in the name & style of **M/s BR Enterprises (Old name Sai Shreeja Industries)** at **F-193 RIA, Khushkhera, District Khairthal Tijara** (hereinafter referred to as 'the industry') and the process is such that it generates polluted trade/domestic effluent & air emission.
8. And whereas, the Central Pollution Control Board (CPCB), New Delhi, has published Emission Regulation Part-III (ERP-III) in December 1985, prescribing monitoring requirement for industries including provisions relating to stack monitoring facilities, equipment, and testing procedures for regulation of emissions from industrial sources.
9. And whereas, provision of proper stack monitoring facilities is essential for assessing compliance of industries with prescribed emission standards and for enabling regulatory authorities to undertake effective monitoring and enforcement actions.
10. And whereas, the CPCB vide letter dated 12.03.2026 issued directions to the RSPCB under Section 18(1)(b) of the Air Act, 1981 to ensure compliance of provisions of ERP-III published by CPCB in air polluting industries in Delhi-NCR.
11. And whereas, your industry falls within the ambit of the aforesaid directions issued by CPCB.
12. And whereas the Board may, in exercise of the powers conferred upon it under the provisions of the section 33A of the Water Act and section 31A of the Air Act and in performance of its functions conferred under these Acts, issue directions in writing to any

e-mail: robhiwadi@gmail.com

person, officer or any authority and such person, officer or authority shall be bound to comply with such directions which includes the power direct: –

- a. The closure, prohibition or regulation of any industry, operation or process or
- b. Stoppage or regulation of the supply of electricity or water or any other service.

Therefore, in exercise of the powers conferred under Section 31A of the Air Act, 1981, and in discharge of the functions entrusted under the Water Act, 1974 and the Air Act, 1981, and to ensure compliance with the directions issued by the CPCB on 12.03.2026, you are hereby directed to ensure the following: –

1. To provide/ensure stack monitoring facilities in accordance with the Emission Regulation Part-III (ERP-III) latest by March 28, 2026 for all the stacks attached to potential air polluting sources such as Boiler, Furnaces, Thermic Fluid Heaters, Kilns and Process Emissions.
2. To ensure that the position of port-hole should comply with Emission Regulation Part-III (ERP-III) published by CPCB. Special emphasis shall be given to the criteria of compliance of minimum 8D downstream from flow disturbance and minimum 2D from top of stack to ensure laminar flow at sampling point in the stack. For other details pertaining to location of port-hole para 2.5.0 at page 18 of ERP-III may be referred.
3. To provide a separate port hole of 0.1 m diameter for manual emission sampling. For port hole installation para 2.5.2 at page 19 of ERP-III may be referred.
4. In case, if the Online Continuous Emission Monitoring Systems (OCEMS) is mandated as per consent conditions, the plane of port hole for OCEMS should be 500 mm below (vertically) the plane of manual sampling port hole.
5. To ensure that the platform for monitoring should have capacity to bear 300–350 kg of weight, it should have a size of minimum 6 x 4 feet, 800–1000 mm of guard rail to ensure proper space for sampling team and equipment required for monitoring. For monitoring platform installation, para 2.5.3, 2.5.4 & 2.5.6 at page 19 & 20 of ERP-III may be referred.
6. To ensure that the port hole and ladder facility is safe to carry out monitoring. In place of monkey ladder, spiral type/scaffold ladder shall be provided to ensure safety of monitoring personnel.

6. And whereas under the provisions of section 22 of the Air Act, no person operating any industrial plant, in any air pollution control area shall discharge or cause or permit to be discharged the emission of any air pollutant more than the prescribed standards.
7. And whereas, an industry has been established in the name & style of **M/s Caparo Fasteners** at **A-7 to 9, & E-30 to 34, RIA, Chopanki, District Khairthal Tijara** (hereinafter referred to as 'the industry') and the process is such that it generates polluted trade/domestic effluent & air emission.
8. And whereas, the Central Pollution Control Board (CPCB), New Delhi, has published Emission Regulation Part-III (ERP-III) in December 1985, prescribing monitoring requirement for industries including provisions relating to stack monitoring facilities, equipment, and testing procedures for regulation of emissions from industrial sources.
9. And whereas, provision of proper stack monitoring facilities is essential for assessing compliance of industries with prescribed emission standards and for enabling regulatory authorities to undertake effective monitoring and enforcement actions.
10. And whereas, the CPCB vide letter dated 12.03.2026 issued directions to the RSPCB under Section 18(1)(b) of the Air Act, 1981 to ensure compliance of provisions of ERP-III published by CPCB in air polluting industries in Delhi-NCR.
11. And whereas, your industry falls within the ambit of the aforesaid directions issued by CPCB.
12. And whereas the Board may, in exercise of the powers conferred upon it under the provisions of the section 33A of the Water Act and section 31A of the Air Act and in performance of its functions conferred under these Acts, issue directions in writing to any

e-mail: robhiwadi@gmail.com

person, officer or any authority and such person, officer or authority shall be bound to comply with such directions which includes the power direct: –

- a. The closure, prohibition or regulation of any industry, operation or process or
- b. Stoppage or regulation of the supply of electricity or water or any other service.

Therefore, in exercise of the powers conferred under Section 31A of the Air Act, 1981, and in discharge of the functions entrusted under the Water Act, 1974 and the Air Act, 1981, and to ensure compliance with the directions issued by the CPCB on 12.03.2026, you are hereby directed to ensure the following: –

1. To provide/ensure stack monitoring facilities in accordance with the Emission Regulation Part-III (ERP-III) latest by March 28,2026 for all the stacks attached to potential air polluting sources such as Boiler, Furnaces, Thermic Fluid Heaters, Kilns and Process Emissions.
2. To ensure that the position of port-hole should comply with Emission Regulation Part-III (ERP-III) published by CPCB. Special emphasis shall be given to the criteria of compliance of minimum 8D downstream from flow disturbance and minimum 2D from top of stack to ensure laminar flow at sampling point in the stack. For other details pertaining to location of port-hole para 2.5.0 at page 18 of ERP-III may be referred.
3. To provide a separate port hole of 0.1 m diameter for manual emission sampling. For port hole installation para 2.5.2 at page 19 of ERP-III may be referred.
4. In case, if the Online Continuous Emission Monitoring Systems (OCEMS) is mandated as per consent conditions, the plane of port hole for OCEMS should be 500 mm below (vertically) the plane of manual sampling port hole.
5. To ensure that the platform for monitoring should have capacity to bear 300–350 kg of weight, it should have a size of minimum 6 x 4 feet, 800–1000 mm of guard rail to ensure proper space for sampling team and equipment required for monitoring. For monitoring platform installation, para 2.5.3, 2.5.4 & 2.5.6 at page 19 & 20 of ERP-III may be referred.
6. To ensure that the port hole and ladder facility is safe to carry out monitoring. In place of monkey ladder, spiral type/scaffold ladder shall be provided to ensure safety of monitoring personnel.

Regional Office, Bhiwadi
Rajasthan State Pollution Control Board

e-mail: robhiwadi@gmail.com

person, officer or any authority and such person, officer or authority shall be bound to comply with such directions which includes the power direct: –

- a. The closure, prohibition or regulation of any industry, operation or process or
- b. Stoppage or regulation of the supply of electricity or water or any other service.

Therefore, in exercise of the powers conferred under Section 31A of the Air Act, 1981, and in discharge of the functions entrusted under the Water Act, 1974 and the Air Act, 1981, and to ensure compliance with the directions issued by the CPCB on 12.03.2026, you are hereby directed to ensure the following: –

1. To provide/ensure stack monitoring facilities in accordance with the Emission Regulation Part-III (ERP-III) latest by March 28, 2026 for all the stacks attached to potential air polluting sources such as Boiler, Furnaces, Thermic Fluid Heaters, Kilns and Process Emissions.
2. To ensure that the position of port-hole should comply with Emission Regulation Part-III (ERP-III) published by CPCB. Special emphasis shall be given to the criteria of compliance of minimum 8D downstream from flow disturbance and minimum 2D from top of stack to ensure laminar flow at sampling point in the stack. For other details pertaining to location of port-hole para 2.5.0 at page 18 of ERP-III may be referred.
3. To provide a separate port hole of 0.1 m diameter for manual emission sampling. For port hole installation para 2.5.2 at page 19 of ERP-III may be referred.
4. In case, if the Online Continuous Emission Monitoring Systems (OCEMS) is mandated as per consent conditions, the plane of port hole for OCEMS should be 500 mm below (vertically) the plane of manual sampling port hole.
5. To ensure that the platform for monitoring should have capacity to bear 300–350 kg of weight, it should have a size of minimum 6 x 4 feet, 800–1000 mm of guard rail to ensure proper space for sampling team and equipment required for monitoring. For monitoring platform installation, para 2.5.3, 2.5.4 & 2.5.6 at page 19 & 20 of ERP-III may be referred.
6. To ensure that the port hole and ladder facility is safe to carry out monitoring. In place of monkey ladder, spiral type/scaffold ladder shall be provided to ensure safety of monitoring personnel.

8. And whereas, the Central Pollution Control Board (CPCB), New Delhi, has published Emission Regulation Part-III (ERP-III) in December 1985, prescribing monitoring requirement for industries including provisions relating to stack monitoring facilities, equipment, and testing procedures for regulation of emissions from industrial sources.
9. And whereas, provision of proper stack monitoring facilities is essential for assessing compliance of industries with prescribed emission standards and for enabling regulatory authorities to undertake effective monitoring and enforcement actions.
10. And whereas, the CPCB vide letter dated 12.03.2026 issued directions to the RSPCB under Section 18(1)(b) of the Air Act, 1981 to ensure compliance of provisions of ERP-III published by CPCB in air polluting industries in Delhi-NCR.
11. And whereas, your industry falls within the ambit of the aforesaid directions issued by CPCB.
12. And whereas the Board may, in exercise of the powers conferred upon it under the provisions of the section 33A of the Water Act and section 31A of the Air Act and in performance of its functions conferred under these Acts, issue directions in writing to any

Regional Office, Bhiwadi
Rajasthan State Pollution Control Board
Plot No. GO-1, Phase-II, RIICO Industrial Area, Bhiwadi-301019
e-mail: robhiwadi@gmail.com

person, officer or any authority and such person, officer or authority shall be bound to comply with such directions which includes the power direct: –

- a. The closure, prohibition or regulation of any industry, operation or process or
- b. Stoppage or regulation of the supply of electricity or water or any other service.

Therefore, in exercise of the powers conferred under Section 31A of the Air Act, 1981, and in discharge of the functions entrusted under the Water Act, 1974 and the Air Act, 1981, and to ensure compliance with the directions issued by the CPCB on 12.03.2026, you are hereby directed to ensure the following: –

1. To provide/ensure stack monitoring facilities in accordance with the Emission Regulation Part-III (ERP-III) latest by March 28,2026 for all the stacks attached to potential air polluting sources such as Boiler, Furnaces, Thermic Fluid Heaters, Kilns and Process Emissions.
2. To ensure that the position of port-hole should comply with Emission Regulation Part-III (ERP-III) published by CPCB. Special emphasis shall be given to the criteria of compliance of minimum 8D downstream from flow disturbance and minimum 2D from top of stack to ensure laminar flow at sampling point in the stack. For other details pertaining to location of port-hole para 2.5.0 at page 18 of ERP-III may be referred.
3. To provide a separate port hole of 0.1 m diameter for manual emission sampling. For port hole installation para 2.5.2 at page 19 of ERP-III may be referred.
4. In case, if the Online Continuous Emission Monitoring Systems (OCEMS) is mandated as per consent conditions, the plane of port hole for OCEMS should be 500 mm below (vertically) the plane of manual sampling port hole.
5. To ensure that the platform for monitoring should have capacity to bear 300–350 kg of weight, it should have a size of minimum 6 x 4 feet, 800–1000 mm of guard rail to ensure proper space for sampling team and equipment required for monitoring. For monitoring platform installation, para 2.5.3, 2.5.4 & 2.5.6 at page 19 & 20 of ERP-III may be referred.
6. To ensure that the port hole and ladder facility is safe to carry out monitoring. In place of monkey ladder, spiral type/scaffold ladder shall be provided to ensure safety of monitoring personnel.

Regional Office, Bhiwadi

9. And whereas, provision of proper stack monitoring facilities is essential for assessing compliance of industries with prescribed emission standards and for enabling regulatory authorities to undertake effective monitoring and enforcement actions.
10. And whereas, the CPCB vide letter dated 12.03.2026 issued directions to the RSPCB under Section 18(1)(b) of the Air Act, 1981 to ensure compliance of provisions of ERP-III published by CPCB in air polluting industries in Delhi-NCR.
11. And whereas, your industry falls within the ambit of the aforesaid directions issued by CPCB.
12. And whereas the Board may, in exercise of the powers conferred upon it under the provisions of the section 33A of the Water Act and section 31A of the Air Act and in performance of its functions conferred under these Acts, issue directions in writing to any

Regional Office, Bhiwadi
Rajasthan State Pollution Control Board
Plot No. GO-1, Phase-II, RIICO Industrial Area, Bhiwadi-301019
e-mail: robhiwadi@gmail.com

person, officer or any authority and such person, officer or authority shall be bound to comply with such directions which includes the power direct: –

- a. The closure, prohibition or regulation of any industry, operation or process or
- b. Stoppage or regulation of the supply of electricity or water or any other service.

Therefore, in exercise of the powers conferred under Section 31A of the Air Act, 1981, and in discharge of the functions entrusted under the Water Act, 1974 and the Air Act, 1981, and to ensure compliance with the directions issued by the CPCB on 12.03.2026, you are hereby directed to ensure the following: –

1. To provide/ensure stack monitoring facilities in accordance with the Emission Regulation Part-III (ERP-III) latest by March 28, 2026 for all the stacks attached to potential air polluting sources such as Boiler, Furnaces, Thermic Fluid Heaters, Kilns and Process Emissions.
2. To ensure that the position of port-hole should comply with Emission Regulation Part-III (ERP-III) published by CPCB. Special emphasis shall be given to the criteria of compliance of minimum 8D downstream from flow disturbance and minimum 2D from top of stack to ensure laminar flow at sampling point in the stack. For other details pertaining to location of port-hole para 2.5.0 at page 18 of ERP-III may be referred.
3. To provide a separate port hole of 0.1 m diameter for manual emission sampling. For port hole installation para 2.5.2 at page 19 of ERP-III may be referred.
4. In case, if the Online Continuous Emission Monitoring Systems (OCEMS) is mandated as per consent conditions, the plane of port hole for OCEMS should be 500 mm below (vertically) the plane of manual sampling port hole.
5. To ensure that the platform for monitoring should have capacity to bear 300–350 kg of weight, it should have a size of minimum 6 x 4 feet, 800–1000 mm of guard rail to ensure proper space for sampling team and equipment required for monitoring. For monitoring platform installation, para 2.5.3, 2.5.4 & 2.5.6 at page 19 & 20 of ERP-III may be referred.
6. To ensure that the port hole and ladder facility is safe to carry out monitoring. In place of monkey ladder, spiral type/scaffold ladder shall be provided to ensure safety of monitoring personnel.

Regional Office, Bhiwadi

Regional Office, Bhiwadi
Rajasthan State Pollution Control Board
Plot No. GO-1, Phase-II, RIICO Industrial Area, Bhiwadi-301019
e-mail: robhiwadi@gmail.com

person, officer or any authority and such person, officer or authority shall be bound to comply with such directions which includes the power direct: –

- a. The closure, prohibition or regulation of any industry, operation or process or
- b. Stoppage or regulation of the supply of electricity or water or any other service.

Therefore, in exercise of the powers conferred under Section 31A of the Air Act, 1981, and in discharge of the functions entrusted under the Water Act, 1974 and the Air Act, 1981, and to ensure compliance with the directions issued by the CPCB on 12.03.2026, you are hereby directed to ensure the following: –

1. To provide/ensure stack monitoring facilities in accordance with the Emission Regulation Part-III (ERP-III) latest by March 28,2026 for all the stacks attached to potential air polluting sources such as Boiler, Furnaces, Thermic Fluid Heaters, Kilns and Process Emissions.
2. To ensure that the position of port-hole should comply with Emission Regulation Part-III (ERP-III) published by CPCB. Special emphasis shall be given to the criteria of compliance of minimum 8D downstream from flow disturbance and minimum 2D from top of stack to ensure laminar flow at sampling point in the stack. For other details pertaining to location of port-hole para 2.5.0 at page 18 of ERP-III may be referred.
3. To provide a separate port hole of 0.1 m diameter for manual emission sampling. For port hole installation para 2.5.2 at page 19 of ERP-III may be referred.
4. In case, if the Online Continuous Emission Monitoring Systems (OCEMS) is mandated as per consent conditions, the plane of port hole for OCEMS should be 500 mm below (vertically) the plane of manual sampling port hole.
5. To ensure that the platform for monitoring should have capacity to bear 300–350 kg of weight, it should have a size of minimum 6 x 4 feet, 800–1000 mm of guard rail to ensure proper space for sampling team and equipment required for monitoring. For monitoring platform installation, para 2.5.3, 2.5.4 & 2.5.6 at page 19 & 20 of ERP-III may be referred.
6. To ensure that the port hole and ladder facility is safe to carry out monitoring. In place of monkey ladder, spiral type/scaffold ladder shall be provided to ensure safety of monitoring personnel.

Regional Office, Bhiwadi

person, officer or any authority and such person, officer or authority shall be bound to comply with such directions which includes the power direct: –

- a. The closure, prohibition or regulation of any industry, operation or process or
- b. Stoppage or regulation of the supply of electricity or water or any other service.

Therefore, in exercise of the powers conferred under Section 31A of the Air Act, 1981, and in discharge of the functions entrusted under the Water Act, 1974 and the Air Act, 1981, and to ensure compliance with the directions issued by the CPCB on 12.03.2026, you are hereby directed to ensure the following: –

1. To provide/ensure stack monitoring facilities in accordance with the Emission Regulation Part-III (ERP-III) latest by March 28,2026 for all the stacks attached to potential air polluting sources such as Boiler, Furnaces, Thermic Fluid Heaters, Kilns and Process Emissions.
2. To ensure that the position of port-hole should comply with Emission Regulation Part-III (ERP-III) published by CPCB. Special emphasis shall be given to the criteria of compliance of minimum 8D downstream from flow disturbance and minimum 2D from top of stack to ensure laminar flow at sampling point in the stack. For other details pertaining to location of port-hole para 2.5.0 at page 18 of ERP-III may be referred.
3. To provide a separate port hole of 0.1 m diameter for manual emission sampling. For port hole installation para 2.5.2 at page 19 of ERP-III may be referred.
4. In case, if the Online Continuous Emission Monitoring Systems (OCEMS) is mandated as per consent conditions, the plane of port hole for OCEMS should be 500 mm below (vertically) the plane of manual sampling port hole.
5. To ensure that the platform for monitoring should have capacity to bear 300–350 kg of weight, it should have a size of minimum 6 x 4 feet, 800–1000 mm of guard rail to ensure proper space for sampling team and equipment required for monitoring. For monitoring platform installation, para 2.5.3, 2.5.4 & 2.5.6 at page 19 & 20 of ERP-III may be referred.
6. To ensure that the port hole and ladder facility is safe to carry out monitoring. In place of monkey ladder, spiral type/scaffold ladder shall be provided to ensure safety of monitoring personnel.

Regional Office, Bhiwadi

- Sub: Directions under Section 31A of the Air (Prevention and Control of Pollution) Act, 1981 to provide and maintain stack emission monitoring facilities in accordance with Emission Regulation Part – III (ERP-III) published by CPCB in air polluting industry: regarding
- Ref: Directions issued by Central Pollution Control Board (CPCB) under Section 18(1)(b) of the Air Act, 1981, to RSPCB vide letter dated 12.03.2026

Sir/Madam

1. Whereas, the Water (Prevention and Control of Pollution) Act, 1974 and the Air (Prevention and Control of Pollution) Act, 1981 (hereinafter collectively referred to as the "Acts") have come into force throughout the country with effect from 23.03.1974 and 16.05.1981, respectively.
2. And whereas, the said Acts have been enacted to provide for the prevention, control, and abatement of water and air pollution and for maintaining and restoring the wholesomeness of water and air, and the Rajasthan State Pollution Control Board (hereinafter referred to as the "Board") has been vested with the powers to take such steps as may be deemed necessary for enforcement of the provisions of the aforesaid Acts.
3. And whereas, under the provisions of Section 24 of the Water Act, no person shall knowingly cause or permit any poisonous, noxious, or polluting matter, determined in accordance with the standards laid down by the Board, to enter any stream, well, sewer, or land.
4. And whereas under the provisions of section 25/26 of the Act, no person shall without the previous consent of the Board establish or take any steps to establish, any industry,

Regional Office, Bhiwadi
Rajasthan State Pollution Control Board
Plot No. GO-1, Phase-II, RIICO Industrial Area, Bhiwadi-301019
e-mail: robhiwadi@gmail.com

operation or process or any treatment and disposal system or any extension or addition thereto, which is likely to discharge sewage or trade effluent into a stream or well or sewer or on land or bring into use any new or altered outlet for the discharge or sewage or trade effluent or begin to make any new discharge of sewage or trade effluent.

5. And whereas under the provisions of section 21 of the Air Act, no person shall without the previous consent of the Board, establish or operate any industrial plant in an air pollution control area. Industrial plant, under the Air Act, has been defined to mean any plant used for any industrial or trade purposes and emitting any air pollutant into the atmosphere.
6. And whereas under the provisions of section 22 of the Air Act, no person operating any industrial plant, in any air pollution control area shall discharge or cause or permit to be discharged the emission of any air pollutant more than the prescribed standards.
7. And whereas, an industry has been established in the name & style of **M/s Federal Mogul Ignition Products (India) Ltd**(Old Name **Federal Mogul Automotive Products (India) Pvt. Ltd.**) at **SP-812/ B 1 & 2, Phase-III, RIA Bhiwadi, District Khairthal Tijara** (hereinafter referred to as 'the industry') and the process is such that it generates polluted trade/domestic effluent & air emission.
8. And whereas, the Central Pollution Control Board (CPCB), New Delhi, has published Emission Regulation Part-III (ERP-III) in December 1985, prescribing monitoring requirement for industries including provisions relating to stack monitoring facilities, equipment, and testing procedures for regulation of emissions from industrial sources.
9. And whereas, provision of proper stack monitoring facilities is essential for assessing compliance of industries with prescribed emission standards and for enabling regulatory authorities to undertake effective monitoring and enforcement actions.
10. And whereas, the CPCB vide letter dated 12.03.2026 issued directions to the RSPCB under Section 18(1)(b) of the Air Act, 1981 to ensure compliance of provisions of ERP-III published by CPCB in air polluting industries in Delhi-NCR.
11. And whereas, your industry falls within the ambit of the aforesaid directions issued by CPCB.

- a. The closure, prohibition or regulation of any industry, operation or process or
- b. Stoppage or regulation of the supply of electricity or water or any other service.

Therefore, in exercise of the powers conferred under Section 31A of the Air Act, 1981, and in discharge of the functions entrusted under the Water Act, 1974 and the Air Act, 1981, and to ensure compliance with the directions issued by the CPCB on 12.03.2026, you are hereby directed to ensure the following: –

1. To provide/ensure stack monitoring facilities in accordance with the Emission Regulation Part-III (ERP-III) latest by March 28, 2026 for all the stacks attached to potential air polluting sources such as Boiler, Furnaces, Thermic Fluid Heaters, Kilns and Process Emissions.
2. To ensure that the position of port-hole should comply with Emission Regulation Part-III (ERP-III) published by CPCB. Special emphasis shall be given to the criteria of compliance of minimum 8D downstream from flow disturbance and minimum 2D from top of stack to ensure laminar flow at sampling point in the stack. For other details pertaining to location of port-hole para 2.5.0 at page 18 of ERP-III may be referred.
3. To provide a separate port hole of 0.1 m diameter for manual emission sampling. For port hole installation para 2.5.2 at page 19 of ERP-III may be referred.
4. In case, if the Online Continuous Emission Monitoring Systems (OCEMS) is mandated as per consent conditions, the plane of port hole for OCEMS should be 500 mm below (vertically) the plane of manual sampling port hole.
5. To ensure that the platform for monitoring should have capacity to bear 300–350 kg of weight, it should have a size of minimum 6 x 4 feet, 800–1000 mm of guard rail to ensure proper space for sampling team and equipment required for monitoring. For monitoring platform installation, para 2.5.3, 2.5.4 & 2.5.6 at page 19 & 20 of ERP-III may be referred.
6. To ensure that the port hole and ladder facility is safe to carry out monitoring. In place of monkey ladder, spiral type/scaffold ladder shall be provided to ensure safety of monitoring personnel.

Regional Office, Bhiwadi
Rajasthan State Pollution Control Board

e-mail: robhiwadi@gmail.com

You are further directed to submit a compliance report to this office regarding the above directions by 28.03.2026.

In the event of failure to comply with the above directions within the stipulated time, the absence of proper stack monitoring facility as per ERP-III and as prescribed above shall be considered as violation and appropriate action shall be taken including closure of the industry, without any further notice in this matter. Further, any other action deemed appropriate under the provisions of the said Acts may also be initiated.

Yours sincerely,

- b. Stoppage or regulation of the supply of electricity or water or any other service.

Therefore, in exercise of the powers conferred under Section 31A of the Air Act, 1981, and in discharge of the functions entrusted under the Water Act, 1974 and the Air Act, 1981, and to ensure compliance with the directions issued by the CPCB on 12.03.2026, you are hereby directed to ensure the following: –

1. To provide/ensure stack monitoring facilities in accordance with the Emission Regulation Part-III (ERP-III) latest by March 28,2026 for all the stacks attached to potential air polluting sources such as Boiler, Furnaces, Thermic Fluid Heaters, Kilns and Process Emissions.
2. To ensure that the position of port-hole should comply with Emission Regulation Part-III (ERP-III) published by CPCB. Special emphasis shall be given to the criteria of compliance of minimum 8D downstream from flow disturbance and minimum 2D from top of stack to ensure laminar flow at sampling point in the stack. For other details pertaining to location of port-hole para 2.5.0 at page 18 of ERP-III may be referred.
3. To provide a separate port hole of 0.1 m diameter for manual emission sampling. For port hole installation para 2.5.2 at page 19 of ERP-III may be referred.
4. In case, if the Online Continuous Emission Monitoring Systems (OCEMS) is mandated as per consent conditions, the plane of port hole for OCEMS should be 500 mm below (vertically) the plane of manual sampling port hole.
5. To ensure that the platform for monitoring should have capacity to bear 300–350 kg of weight, it should have a size of minimum 6 x 4 feet, 800–1000 mm of guard rail to ensure proper space for sampling team and equipment required for monitoring. For monitoring platform installation, para 2.5.3, 2.5.4 & 2.5.6 at page 19 & 20 of ERP-III may be referred.
6. To ensure that the port hole and ladder facility is safe to carry out monitoring. In place of monkey ladder, spiral type/scaffold ladder shall be provided to ensure safety of monitoring personnel.

Regional Office, Bhiwadi
Rajasthan State Pollution Control Board

Therefore, in exercise of the powers conferred under Section 31A of the Air Act, 1981, and in discharge of the functions entrusted under the Water Act, 1974 and the Air Act, 1981, and to ensure compliance with the directions issued by the CPCB on 12.03.2026, you are hereby directed to ensure the following: –

1. To provide/ensure stack monitoring facilities in accordance with the Emission Regulation Part-III (ERP-III) latest by March 28,2026 for all the stacks attached to potential air polluting sources such as Boiler, Furnaces, Thermic Fluid Heaters, Kilns and Process Emissions.
2. To ensure that the position of port-hole should comply with Emission Regulation Part-III (ERP-III) published by CPCB. Special emphasis shall be given to the criteria of compliance of minimum 8D downstream from flow disturbance and minimum 2D from top of stack to ensure laminar flow at sampling point in the stack. For other details pertaining to location of port-hole para 2.5.0 at page 18 of ERP-III may be referred.
3. To provide a separate port hole of 0.1 m diameter for manual emission sampling. For port hole installation para 2.5.2 at page 19 of ERP-III may be referred.
4. In case, if the Online Continuous Emission Monitoring Systems (OCEMS) is mandated as per consent conditions, the plane of port hole for OCEMS should be 500 mm below (vertically) the plane of manual sampling port hole.
5. To ensure that the platform for monitoring should have capacity to bear 300–350 kg of weight, it should have a size of minimum 6 x 4 feet, 800–1000 mm of guard rail to ensure proper space for sampling team and equipment required for monitoring. For monitoring platform installation, para 2.5.3, 2.5.4 & 2.5.6 at page 19 & 20 of ERP-III may be referred.
6. To ensure that the port hole and ladder facility is safe to carry out monitoring. In place of monkey ladder, spiral type/scaffold ladder shall be provided to ensure safety of monitoring personnel.

Regional Office, Bhiwadi
Rajasthan State Pollution Control Board
Plot No. GO-1, Phase-II, RIICO Industrial Area, Bhiwadi-301019
e-mail: robhiwadi@gmail.com

You are further directed to submit a compliance report to this office regarding the above directions by 28.03.2026.

In the event of failure to comply with the above directions within the stipulated time, the absence of proper stack monitoring facility as per ERP-III and as prescribed above shall be considered as violation and appropriate action shall be taken including closure of the industry, without any further notice in this matter. Further, any other action deemed appropriate under the provisions of the said Acts may also be initiated.

Yours sincerely,

Sub: Directions under Section 31A of the Air (Prevention and Control of Pollution) Act, 1981 to provide and maintain stack emission monitoring facilities in accordance with Emission Regulation Part – III (ERP-III) published by CPCB in air polluting industry: regarding

Ref: Directions issued by Central Pollution Control Board (CPCB) under Section 18(1)(b) of the Air Act, 1981, to RSPCB vide letter dated 12.03.2026

Sir/Madam

1. Whereas, the Water (Prevention and Control of Pollution) Act, 1974 and the Air (Prevention and Control of Pollution) Act, 1981 (hereinafter collectively referred to as the “Acts”) have come into force throughout the country with effect from 23.03.1974 and 16.05.1981, respectively.
2. And whereas, the said Acts have been enacted to provide for the prevention, control, and abatement of water and air pollution and for maintaining and restoring the wholesomeness of water and air, and the Rajasthan State Pollution Control Board (hereinafter referred to as the “Board”) has been vested with the powers to take such steps as may be deemed necessary for enforcement of the provisions of the aforesaid Acts.
3. And whereas, under the provisions of Section 24 of the Water Act, no person shall knowingly cause or permit any poisonous, noxious, or polluting matter, determined in accordance with the standards laid down by the Board, to enter any stream, well, sewer, or land.
4. And whereas under the provisions of section 25/26 of the Act, no person shall without the previous consent of the Board establish or take any steps to establish, any industry, operation or process or any treatment and disposal system or any extension or addition

Regional Office, Bhiwadi
Rajasthan State Pollution Control Board

Therefore, in exercise of the powers conferred under Section 31A of the Air Act, 1981, and in discharge of the functions entrusted under the Water Act, 1974 and the Air Act, 1981, and to ensure compliance with the directions issued by the CPCB on 12.03.2026, you are hereby directed to ensure the following: –

1. To provide/ensure stack monitoring facilities in accordance with the Emission Regulation Part-III (ERP-III) latest by March 28, 2026 for all the stacks attached to potential air polluting sources such as Boiler, Furnaces, Thermic Fluid Heaters, Kilns and Process Emissions.
2. To ensure that the position of port-hole should comply with Emission Regulation Part-III (ERP-III) published by CPCB. Special emphasis shall be given to the criteria of compliance of minimum 8D downstream from flow disturbance and minimum 2D from top of stack to ensure laminar flow at sampling point in the stack. For other details pertaining to location of port-hole para 2.5.0 at page 18 of ERP-III may be referred.
3. To provide a separate port hole of 0.1 m diameter for manual emission sampling. For port hole installation para 2.5.2 at page 19 of ERP-III may be referred.
4. In case, if the Online Continuous Emission Monitoring Systems (OCEMS) is mandated as per consent conditions, the plane of port hole for OCEMS should be 500 mm below (vertically) the plane of manual sampling port hole.
5. To ensure that the platform for monitoring should have capacity to bear 300–350 kg of weight, it should have a size of minimum 6 x 4 feet, 800–1000 mm of guard rail to ensure proper space for sampling team and equipment required for monitoring. For monitoring platform installation, para 2.5.3, 2.5.4 & 2.5.6 at page 19 & 20 of ERP-III may be referred.
6. To ensure that the port hole and ladder facility is safe to carry out monitoring. In place of monkey ladder, spiral type/scaffold ladder shall be provided to ensure safety of monitoring personnel.

Regional Office, Bhiwadi
Rajasthan State Pollution Control Board

e-mail: robhiwadi@gmail.com

You are further directed to submit a compliance report to this office regarding the above directions by 28.03.2026.

In the event of failure to comply with the above directions within the stipulated time, the absence of proper stack monitoring facility as per ERP-III and as prescribed above shall be considered as violation and appropriate action shall be taken including closure of the industry, without any further notice in this matter. Further, any other action deemed appropriate under the provisions of the said Acts may also be initiated.

Yours sincerely,

Sub: Directions under Section 31A of the Air (Prevention and Control of Pollution) Act, 1981 to provide and maintain stack emission monitoring facilities in accordance with Emission Regulation Part – III (ERP-III) published by CPCB in air polluting industry: regarding

Ref: Directions issued by Central Pollution Control Board (CPCB) under Section 18(1)(b) of the Air Act, 1981, to RSPCB vide letter dated 12.03.2026

Sir/Madam

1. Whereas, the Water (Prevention and Control of Pollution) Act, 1974 and the Air (Prevention and Control of Pollution) Act, 1981 (hereinafter collectively referred to as the “Acts”) have come into force throughout the country with effect from 23.03.1974 and 16.05.1981, respectively.
2. And whereas, the said Acts have been enacted to provide for the prevention, control, and abatement of water and air pollution and for maintaining and restoring the wholesomeness of water and air, and the Rajasthan State Pollution Control Board (hereinafter referred to as the “Board”) has been vested with the powers to take such steps as may be deemed necessary for enforcement of the provisions of the aforesaid Acts.
3. And whereas, under the provisions of Section 24 of the Water Act, no person shall knowingly cause or permit any poisonous, noxious, or polluting matter, determined in accordance with the standards laid down by the Board, to enter any stream, well, sewer, or land.
4. And whereas under the provisions of section 25/26 of the Act, no person shall without the previous consent of the Board establish or take any steps to establish, any industry, operation or process or any treatment and disposal system or any extension or addition

Regional Office, Bhiwadi
Rajasthan State Pollution Control Board

Therefore, in exercise of the powers conferred under Section 31A of the Air Act, 1981, and in discharge of the functions entrusted under the Water Act, 1974 and the Air Act, 1981, and to ensure compliance with the directions issued by the CPCB on 12.03.2026, you are hereby directed to ensure the following: –

1. To provide/ensure stack monitoring facilities in accordance with the Emission Regulation Part-III (ERP-III) latest by March 28,2026 for all the stacks attached to potential air polluting sources such as Boiler, Furnaces, Thermic Fluid Heaters, Kilns and Process Emissions.
2. To ensure that the position of port-hole should comply with Emission Regulation Part-III (ERP-III) published by CPCB. Special emphasis shall be given to the criteria of compliance of minimum 8D downstream from flow disturbance and minimum 2D from top of stack to ensure laminar flow at sampling point in the stack. For other details pertaining to location of port-hole para 2.5.0 at page 18 of ERP-III may be referred.
3. To provide a separate port hole of 0.1 m diameter for manual emission sampling. For port hole installation para 2.5.2 at page 19 of ERP-III may be referred.
4. In case, if the Online Continuous Emission Monitoring Systems (OCEMS) is mandated as per consent conditions, the plane of port hole for OCEMS should be 500 mm below (vertically) the plane of manual sampling port hole.
5. To ensure that the platform for monitoring should have capacity to bear 300–350 kg of weight, it should have a size of minimum 6 x 4 feet, 800–1000 mm of guard rail to ensure proper space for sampling team and equipment required for monitoring. For monitoring platform installation, para 2.5.3, 2.5.4 & 2.5.6 at page 19 & 20 of ERP-III may be referred.
6. To ensure that the port hole and ladder facility is safe to carry out monitoring. In place of monkey ladder, spiral type/scaffold ladder shall be provided to ensure safety of monitoring personnel.

Regional Office, Bhiwadi
Rajasthan State Pollution Control Board

e-mail: robhiwadi@gmail.com

You are further directed to submit a compliance report to this office regarding the above directions by 28.03.2026.

In the event of failure to comply with the above directions within the stipulated time, the absence of proper stack monitoring facility as per ERP-III and as prescribed above shall be considered as violation and appropriate action shall be taken including closure of the industry, without any further notice in this matter. Further, any other action deemed appropriate under the provisions of the said Acts may also be initiated.

Yours sincerely,

Sub: Directions under Section 31A of the Air (Prevention and Control of Pollution) Act, 1981 to provide and maintain stack emission monitoring facilities in accordance with Emission Regulation Part – III (ERP-III) published by CPCB in air polluting industry: regarding

Ref: Directions issued by Central Pollution Control Board (CPCB) under Section 18(1)(b) of the Air Act, 1981, to RSPCB vide letter dated 12.03.2026

Sir/Madam

1. Whereas, the Water (Prevention and Control of Pollution) Act, 1974 and the Air (Prevention and Control of Pollution) Act, 1981 (hereinafter collectively referred to as the “Acts”) have come into force throughout the country with effect from 23.03.1974 and 16.05.1981, respectively.
2. And whereas, the said Acts have been enacted to provide for the prevention, control, and abatement of water and air pollution and for maintaining and restoring the wholesomeness of water and air, and the Rajasthan State Pollution Control Board (hereinafter referred to as the “Board”) has been vested with the powers to take such steps as may be deemed necessary for enforcement of the provisions of the aforesaid Acts.
3. And whereas, under the provisions of Section 24 of the Water Act, no person shall knowingly cause or permit any poisonous, noxious, or polluting matter, determined in accordance with the standards laid down by the Board, to enter any stream, well, sewer, or land.
4. And whereas under the provisions of section 25/26 of the Act, no person shall without the previous consent of the Board establish or take any steps to establish, any industry, operation or process or any treatment and disposal system or any extension or addition

Regional Office, Bhiwadi
Rajasthan State Pollution Control Board
Plot No. GO-1, Phase-II, RIICO Industrial Area, Bhiwadi-301019
e-mail: robhiwadi@gmail.com

thereto, which is likely to discharge sewage or trade effluent into a stream or well or sewer or on land or bring into use any new or altered outlet for the discharge of sewage or trade effluent or begin to make any new discharge of sewage or trade effluent.

5. And whereas under the provisions of section 21 of the Air Act, no person shall without the previous consent of the Board, establish or operate any industrial plant in an air pollution control area. Industrial plant, under the Air Act, has been defined to mean any plant used for any industrial or trade purposes and emitting any air pollutant into the atmosphere.
6. And whereas under the provisions of section 22 of the Air Act, no person operating any industrial plant, in any air pollution control area shall discharge or cause or permit to be discharged the emission of any air pollutant more than the prescribed standards.
7. And whereas, an industry has been established in the name & style of **M/s Insecticides (India) Limited** at **E-442, 443, 444, RIICO Industrial Area, Chopanki, District Khairthal Tijara** (hereinafter referred to as 'the industry') and the process is such that it generates polluted trade/domestic effluent & air emission.
8. And whereas, the Central Pollution Control Board (CPCB), New Delhi, has published Emission Regulation Part-III (ERP-III) in December 1985, prescribing monitoring requirement for industries including provisions relating to stack monitoring facilities, equipment, and testing procedures for regulation of emissions from industrial sources.
9. And whereas, provision of proper stack monitoring facilities is essential for assessing compliance of industries with prescribed emission standards and for enabling regulatory authorities to undertake effective monitoring and enforcement actions.
10. And whereas, the CPCB vide letter dated 12.03.2026 issued directions to the RSPCB under Section 18(1)(b) of the Air Act, 1981 to ensure compliance of provisions of ERP-III published by CPCB in air polluting industries in Delhi-NCR.
11. And whereas, your industry falls within the ambit of the aforesaid directions issued by CPCB.
12. And whereas the Board may, in exercise of the powers conferred upon it under the provisions of the section 33A of the Water Act and section 31A of the Air Act and in performance of its functions conferred under these Acts, issue directions in writing to any

- b. Stoppage or regulation of the supply of electricity or water or any other service.

Therefore, in exercise of the powers conferred under Section 31A of the Air Act, 1981, and in discharge of the functions entrusted under the Water Act, 1974 and the Air Act, 1981, and to ensure compliance with the directions issued by the CPCB on 12.03.2026, you are hereby directed to ensure the following: –

1. To provide/ensure stack monitoring facilities in accordance with the Emission Regulation Part-III (ERP-III) latest by March 28, 2026 for all the stacks attached to potential air polluting sources such as Boiler, Furnaces, Thermic Fluid Heaters, Kilns and Process Emissions.
2. To ensure that the position of port-hole should comply with Emission Regulation Part-III (ERP-III) published by CPCB. Special emphasis shall be given to the criteria of compliance of minimum 8D downstream from flow disturbance and minimum 2D from top of stack to ensure laminar flow at sampling point in the stack. For other details pertaining to location of port-hole para 2.5.0 at page 18 of ERP-III may be referred.
3. To provide a separate port hole of 0.1 m diameter for manual emission sampling. For port hole installation para 2.5.2 at page 19 of ERP-III may be referred.
4. In case, if the Online Continuous Emission Monitoring Systems (OCEMS) is mandated as per consent conditions, the plane of port hole for OCEMS should be 500 mm below (vertically) the plane of manual sampling port hole.
5. To ensure that the platform for monitoring should have capacity to bear 300–350 kg of weight, it should have a size of minimum 6 x 4 feet, 800–1000 mm of guard rail to ensure proper space for sampling team and equipment required for monitoring. For monitoring platform installation, para 2.5.3, 2.5.4 & 2.5.6 at page 19 & 20 of ERP-III may be referred.
6. To ensure that the port hole and ladder facility is safe to carry out monitoring. In place of monkey ladder, spiral type/scaffold ladder shall be provided to ensure safety of monitoring personnel.

Regional Office, Bhiwadi
Rajasthan State Pollution Control Board

- b. Stoppage or regulation of the supply of electricity or water or any other service.

Therefore, in exercise of the powers conferred under Section 31A of the Air Act, 1981, and in discharge of the functions entrusted under the Water Act, 1974 and the Air Act, 1981, and to ensure compliance with the directions issued by the CPCB on 12.03.2026, you are hereby directed to ensure the following: –

1. To provide/ensure stack monitoring facilities in accordance with the Emission Regulation Part-III (ERP-III) latest by March 28,2026 for all the stacks attached to potential air polluting sources such as Boiler, Furnaces, Thermic Fluid Heaters, Kilns and Process Emissions.
2. To ensure that the position of port-hole should comply with Emission Regulation Part-III (ERP-III) published by CPCB. Special emphasis shall be given to the criteria of compliance of minimum 8D downstream from flow disturbance and minimum 2D from top of stack to ensure laminar flow at sampling point in the stack. For other details pertaining to location of port-hole para 2.5.0 at page 18 of ERP-III may be referred.
3. To provide a separate port hole of 0.1 m diameter for manual emission sampling. For port hole installation para 2.5.2 at page 19 of ERP-III may be referred.
4. In case, if the Online Continuous Emission Monitoring Systems (OCEMS) is mandated as per consent conditions, the plane of port hole for OCEMS should be 500 mm below (vertically) the plane of manual sampling port hole.
5. To ensure that the platform for monitoring should have capacity to bear 300–350 kg of weight, it should have a size of minimum 6 x 4 feet, 800–1000 mm of guard rail to ensure proper space for sampling team and equipment required for monitoring. For monitoring platform installation, para 2.5.3, 2.5.4 & 2.5.6 at page 19 & 20 of ERP-III may be referred.
6. To ensure that the port hole and ladder facility is safe to carry out monitoring. In place of monkey ladder, spiral type/scaffold ladder shall be provided to ensure safety of monitoring personnel.

Regional Office, Bhiwadi
Rajasthan State Pollution Control Board
Plot No. GO-1, Phase-II, RIICO Industrial Area, Bhiwadi-301019
e-mail: robhiwadi@gmail.com

You are further directed to submit a compliance report to this office regarding the above directions by 28.03.2026.

In the event of failure to comply with the above directions within the stipulated time, the absence of proper stack monitoring facility as per ERP-III and as prescribed above shall be considered as violation and appropriate action shall be taken including closure of the industry, without any further notice in this matter. Further, any other action deemed appropriate under the provisions of the said Acts may also be initiated.

Yours sincerely,

- b. Stoppage or regulation of the supply of electricity or water or any other service.

Therefore, in exercise of the powers conferred under Section 31A of the Air Act, 1981, and in discharge of the functions entrusted under the Water Act, 1974 and the Air Act, 1981, and to ensure compliance with the directions issued by the CPCB on 12.03.2026, you are hereby directed to ensure the following: –

1. To provide/ensure stack monitoring facilities in accordance with the Emission Regulation Part-III (ERP-III) latest by March 28,2026 for all the stacks attached to potential air polluting sources such as Boiler, Furnaces, Thermic Fluid Heaters, Kilns and Process Emissions.
2. To ensure that the position of port-hole should comply with Emission Regulation Part-III (ERP-III) published by CPCB. Special emphasis shall be given to the criteria of compliance of minimum 8D downstream from flow disturbance and minimum 2D from top of stack to ensure laminar flow at sampling point in the stack. For other details pertaining to location of port-hole para 2.5.0 at page 18 of ERP-III may be referred.
3. To provide a separate port hole of 0.1 m diameter for manual emission sampling. For port hole installation para 2.5.2 at page 19 of ERP-III may be referred.
4. In case, if the Online Continuous Emission Monitoring Systems (OCEMS) is mandated as per consent conditions, the plane of port hole for OCEMS should be 500 mm below (vertically) the plane of manual sampling port hole.
5. To ensure that the platform for monitoring should have capacity to bear 300–350 kg of weight, it should have a size of minimum 6 x 4 feet, 800–1000 mm of guard rail to ensure proper space for sampling team and equipment required for monitoring. For monitoring platform installation, para 2.5.3, 2.5.4 & 2.5.6 at page 19 & 20 of ERP-III may be referred.

Regional Office, Bhiwadi
Rajasthan State Pollution Control Board
Plot No. GO-1, Phase-II, RIICO Industrial Area, Bhiwadi-301019
e-mail: robhiwadi@gmail.com

6. To ensure that the port hole and ladder facility is safe to carry out monitoring. In place of monkey ladder, spiral type/scaffold ladder shall be provided to ensure safety of monitoring personnel.

You are further directed to submit a compliance report to this office regarding the above directions by 28.03.2026.

In the event of failure to comply with the above directions within the stipulated time, the absence of proper stack monitoring facility as per ERP-III and as prescribed above shall be considered as violation and appropriate action shall be taken including closure of the industry, without any further notice in this matter. Further, any other action deemed appropriate under the provisions of the said Acts may also be initiated.

Therefore, in exercise of the powers conferred under Section 31A of the Air Act, 1981, and in discharge of the functions entrusted under the Water Act, 1974 and the Air Act, 1981, and to ensure compliance with the directions issued by the CPCB on 12.03.2026, you are hereby directed to ensure the following: –

1. To provide/ensure stack monitoring facilities in accordance with the Emission Regulation Part-III (ERP-III) latest by March 28, 2026 for all the stacks attached to potential air polluting sources such as Boiler, Furnaces, Thermic Fluid Heaters, Kilns and Process Emissions.
2. To ensure that the position of port-hole should comply with Emission Regulation Part-III (ERP-III) published by CPCB. Special emphasis shall be given to the criteria of compliance of minimum 8D downstream from flow disturbance and minimum 2D from top of stack to ensure laminar flow at sampling point in the stack. For other details pertaining to location of port-hole para 2.5.0 at page 18 of ERP-III may be referred.
3. To provide a separate port hole of 0.1 m diameter for manual emission sampling. For port hole installation para 2.5.2 at page 19 of ERP-III may be referred.
4. In case, if the Online Continuous Emission Monitoring Systems (OCEMS) is mandated as per consent conditions, the plane of port hole for OCEMS should be 500 mm below (vertically) the plane of manual sampling port hole.
5. To ensure that the platform for monitoring should have capacity to bear 300–350 kg of weight, it should have a size of minimum 6 x 4 feet, 800–1000 mm of guard rail to ensure proper space for sampling team and equipment required for monitoring. For monitoring platform installation, para 2.5.3, 2.5.4 & 2.5.6 at page 19 & 20 of ERP-III may be referred.
6. To ensure that the port hole and ladder facility is safe to carry out monitoring. In place of monkey ladder, spiral type/scaffold ladder shall be provided to ensure safety of monitoring personnel.

Regional Office, Bhiwadi
Rajasthan State Pollution Control Board

e-mail: robhiwadi@gmail.com

You are further directed to submit a compliance report to this office regarding the above directions by 28.03.2026.

In the event of failure to comply with the above directions within the stipulated time, the absence of proper stack monitoring facility as per ERP-III and as prescribed above shall be considered as violation and appropriate action shall be taken including closure of the industry, without any further notice in this matter. Further, any other action deemed appropriate under the provisions of the said Acts may also be initiated.

Yours sincerely,

Therefore, in exercise of the powers conferred under Section 31A of the Air Act, 1981, and in discharge of the functions entrusted under the Water Act, 1974 and the Air Act, 1981, and to ensure compliance with the directions issued by the CPCB on 12.03.2026, you are hereby directed to ensure the following: –

1. To provide/ensure stack monitoring facilities in accordance with the Emission Regulation Part-III (ERP-III) latest by March 28,2026 for all the stacks attached to potential air polluting sources such as Boiler, Furnaces, Thermic Fluid Heaters, Kilns and Process Emissions.
2. To ensure that the position of port-hole should comply with Emission Regulation Part-III (ERP-III) published by CPCB. Special emphasis shall be given to the criteria of compliance of minimum 8D downstream from flow disturbance and minimum 2D from top of stack to ensure laminar flow at sampling point in the stack. For other details pertaining to location of port-hole para 2.5.0 at page 18 of ERP-III may be referred.
3. To provide a separate port hole of 0.1 m diameter for manual emission sampling. For port hole installation para 2.5.2 at page 19 of ERP-III may be referred.
4. In case, if the Online Continuous Emission Monitoring Systems (OCEMS) is mandated as per consent conditions, the plane of port hole for OCEMS should be 500 mm below (vertically) the plane of manual sampling port hole.
5. To ensure that the platform for monitoring should have capacity to bear 300–350 kg of weight, it should have a size of minimum 6 x 4 feet, 800–1000 mm of guard rail to ensure proper space for sampling team and equipment required for monitoring. For monitoring platform installation, para 2.5.3, 2.5.4 & 2.5.6 at page 19 & 20 of ERP-III may be referred.
6. To ensure that the port hole and ladder facility is safe to carry out monitoring. In place of monkey ladder, spiral type/scaffold ladder shall be provided to ensure safety of monitoring personnel.

Regional Office, Bhiwadi
Rajasthan State Pollution Control Board

e-mail: robhiwadi@gmail.com

You are further directed to submit a compliance report to this office regarding the above directions by 28.03.2026.

In the event of failure to comply with the above directions within the stipulated time, the absence of proper stack monitoring facility as per ERP-III and as prescribed above shall be considered as violation and appropriate action shall be taken including closure of the industry, without any further notice in this matter. Further, any other action deemed appropriate under the provisions of the said Acts may also be initiated.

Yours sincerely,

- b. Stoppage or regulation of the supply of electricity or water or any other service.

Therefore, in exercise of the powers conferred under Section 31A of the Air Act, 1981, and in discharge of the functions entrusted under the Water Act, 1974 and the Air Act, 1981, and to ensure compliance with the directions issued by the CPCB on 12.03.2026, you are hereby directed to ensure the following: –

1. To provide/ensure stack monitoring facilities in accordance with the Emission Regulation Part-III (ERP-III) latest by March 28,2026 for all the stacks attached to potential air polluting sources such as Boiler, Furnaces, Thermic Fluid Heaters, Kilns and Process Emissions.
2. To ensure that the position of port-hole should comply with Emission Regulation Part-III (ERP-III) published by CPCB. Special emphasis shall be given to the criteria of compliance of minimum 8D downstream from flow disturbance and minimum 2D from top of stack to ensure laminar flow at sampling point in the stack. For other details pertaining to location of port-hole para 2.5.0 at page 18 of ERP-III may be referred.
3. To provide a separate port hole of 0.1 m diameter for manual emission sampling. For port hole installation para 2.5.2 at page 19 of ERP-III may be referred.
4. In case, if the Online Continuous Emission Monitoring Systems (OCEMS) is mandated as per consent conditions, the plane of port hole for OCEMS should be 500 mm below (vertically) the plane of manual sampling port hole.
5. To ensure that the platform for monitoring should have capacity to bear 300–350 kg of weight, it should have a size of minimum 6 x 4 feet, 800–1000 mm of guard rail to ensure proper space for sampling team and equipment required for monitoring. For monitoring platform installation, para 2.5.3, 2.5.4 & 2.5.6 at page 19 & 20 of ERP-III may be referred.
6. To ensure that the port hole and ladder facility is safe to carry out monitoring. In place of monkey ladder, spiral type/scaffold ladder shall be provided to ensure safety of monitoring personnel.

Regional Office, Bhiwadi
Rajasthan State Pollution Control Board
Plot No. GO-1, Phase-II, RIICO Industrial Area, Bhiwadi-301019
e-mail: robhiwadi@gmail.com

You are further directed to submit a compliance report to this office regarding the above directions by 28.03.2026.

In the event of failure to comply with the above directions within the stipulated time, the absence of proper stack monitoring facility as per ERP-III and as prescribed above shall be considered as violation and appropriate action shall be taken including closure of the industry, without any further notice in this matter. Further, any other action deemed appropriate under the provisions of the said Acts may also be initiated.

Yours sincerely,

Therefore, in exercise of the powers conferred under Section 31A of the Air Act, 1981, and in discharge of the functions entrusted under the Water Act, 1974 and the Air Act, 1981, and to ensure compliance with the directions issued by the CPCB on 12.03.2026, you are hereby directed to ensure the following: –

1. To provide/ensure stack monitoring facilities in accordance with the Emission Regulation Part-III (ERP-III) latest by March 28, 2026 for all the stacks attached to potential air polluting sources such as Boiler, Furnaces, Thermic Fluid Heaters, Kilns and Process Emissions.
2. To ensure that the position of port-hole should comply with Emission Regulation Part-III (ERP-III) published by CPCB. Special emphasis shall be given to the criteria of compliance of minimum 8D downstream from flow disturbance and minimum 2D from top of stack to ensure laminar flow at sampling point in the stack. For other details pertaining to location of port-hole para 2.5.0 at page 18 of ERP-III may be referred.
3. To provide a separate port hole of 0.1 m diameter for manual emission sampling. For port hole installation para 2.5.2 at page 19 of ERP-III may be referred.
4. In case, if the Online Continuous Emission Monitoring Systems (OCEMS) is mandated as per consent conditions, the plane of port hole for OCEMS should be 500 mm below (vertically) the plane of manual sampling port hole.
5. To ensure that the platform for monitoring should have capacity to bear 300–350 kg of weight, it should have a size of minimum 6 x 4 feet, 800–1000 mm of guard rail to ensure proper space for sampling team and equipment required for monitoring. For monitoring platform installation, para 2.5.3, 2.5.4 & 2.5.6 at page 19 & 20 of ERP-III may be referred.
6. To ensure that the port hole and ladder facility is safe to carry out monitoring. In place of monkey ladder, spiral type/scaffold ladder shall be provided to ensure safety of monitoring personnel.

Regional Office, Bhiwadi
Rajasthan State Pollution Control Board

Sub: Directions under Section 31A of the Air (Prevention and Control of Pollution) Act, 1981 to provide and maintain stack emission monitoring facilities in accordance with Emission Regulation Part – III (ERP-III) published by CPCB in air polluting industry: regarding

Ref: Directions issued by Central Pollution Control Board (CPCB) under Section 18(1)(b) of the Air Act, 1981, to RSPCB vide letter dated 12.03.2026

Sir/Madam

1. Whereas, the Water (Prevention and Control of Pollution) Act, 1974 and the Air (Prevention and Control of Pollution) Act, 1981 (hereinafter collectively referred to as the “Acts”) have come into force throughout the country with effect from 23.03.1974 and 16.05.1981, respectively.
2. And whereas, the said Acts have been enacted to provide for the prevention, control, and abatement of water and air pollution and for maintaining and restoring the wholesomeness of water and air, and the Rajasthan State Pollution Control Board (hereinafter referred to as the “Board”) has been vested with the powers to take such steps as may be deemed necessary for enforcement of the provisions of the aforesaid Acts.
3. And whereas, under the provisions of Section 24 of the Water Act, no person shall knowingly cause or permit any poisonous, noxious, or polluting matter, determined in accordance with the standards laid down by the Board, to enter any stream, well, sewer, or land.
4. And whereas under the provisions of section 25/26 of the Act, no person shall without the previous consent of the Board establish or take any steps to establish, any industry, operation or process or any treatment and disposal system or any extension or addition

Regional Office, Bhiwadi
Rajasthan State Pollution Control Board
Plot No. GO-1, Phase-II, RIICO Industrial Area, Bhiwadi-301019
e-mail: robhiwadi@gmail.com

thereto, which is likely to discharge sewage or trade effluent into a stream or well or sewer or on land or bring into use any new or altered outlet for the discharge or sewage or trade effluent or begin to make any new discharge of sewage or trade effluent.

5. And whereas under the provisions of section 21 of the Air Act, no person shall without the previous consent of the Board, establish or operate any industrial plant in an air pollution control area. Industrial plant, under the Air Act, has been defined to mean any plant used for any industrial or trade purposes and emitting any air pollutant into the atmosphere.
6. And whereas under the provisions of section 22 of the Air Act, no person operating any industrial plant, in any air pollution control area shall discharge or cause or permit to be discharged the emission of any air pollutant more than the prescribed standards.
7. And whereas, an industry has been established in the name & style of **M/s M.D. OVERSEAS PVT. LTD** at **.F-223, RIICO Industrial Area, Khushkhera, District Khairthal Tijara** (hereinafter referred to as 'the industry') and the process is such that it generates polluted trade/domestic effluent & air emission.
8. And whereas, the Central Pollution Control Board (CPCB), New Delhi, has published Emission Regulation Part-III (ERP-III) in December 1985, prescribing monitoring requirement for industries including provisions relating to stack monitoring facilities, equipment, and testing procedures for regulation of emissions from industrial sources.
9. And whereas, provision of proper stack monitoring facilities is essential for assessing compliance of industries with prescribed emission standards and for enabling regulatory authorities to undertake effective monitoring and enforcement actions.
10. And whereas, the CPCB vide letter dated 12.03.2026 issued directions to the RSPCB under Section 18(1)(b) of the Air Act, 1981 to ensure compliance of provisions of ERP-III published by CPCB in air polluting industries in Delhi-NCR.
11. And whereas, your industry falls within the ambit of the aforesaid directions issued by CPCB.
12. And whereas the Board may, in exercise of the powers conferred upon it under the provisions of the section 33A of the Water Act and section 31A of the Air Act and in performance of its functions conferred under these Acts, issue directions in writing to any

- b. Stoppage or regulation of the supply of electricity or water or any other service.

Therefore, in exercise of the powers conferred under Section 31A of the Air Act, 1981, and in discharge of the functions entrusted under the Water Act, 1974 and the Air Act, 1981, and to ensure compliance with the directions issued by the CPCB on 12.03.2026, you are hereby directed to ensure the following: -

1. To provide/ensure stack monitoring facilities in accordance with the Emission Regulation Part-III (ERP-III) latest by March 28,2026 for all the stacks attached to potential air polluting sources such as Boiler, Furnaces, Thermic Fluid Heaters, Kilns and Process Emissions.
2. To ensure that the position of port-hole should comply with Emission Regulation Part-III (ERP-III) published by CPCB. Special emphasis shall be given to the criteria of compliance of minimum 8D downstream from flow disturbance and minimum 2D from top of stack to ensure laminar flow at sampling point in the stack. For other details pertaining to location of port-hole para 2.5.0 at page 18 of ERP-III may be referred.
3. To provide a separate port hole of 0.1 m diameter for manual emission sampling. For port hole installation para 2.5.2 at page 19 of ERP-III may be referred.
4. In case, if the Online Continuous Emission Monitoring Systems (OCEMS) is mandated as per consent conditions, the plane of port hole for OCEMS should be 500 mm below (vertically) the plane of manual sampling port hole.
5. To ensure that the platform for monitoring should have capacity to bear 300-350 kg of weight, it should have a size of minimum 6 x 4 feet, 800-1000 mm of guard rail to ensure proper space for sampling team and equipment required for monitoring. For monitoring platform installation, para 2.5.3, 2.5.4 & 2.5.6 at page 19 & 20 of ERP-III may be referred.

Regional Office, Bhiwadi
Rajasthan State Pollution Control Board
Plot No. GO-1, Phase-II, RIICO Industrial Area, Bhiwadi-301019
e-mail: robhiwadi@gmail.com

6. To ensure that the port hole and ladder facility is safe to carry out monitoring. In place of monkey ladder, spiral type/scaffold ladder shall be provided to ensure safety of monitoring personnel.

You are further directed to submit a compliance report to this office regarding the above directions by 28.03.2026.

In the event of failure to comply with the above directions within the stipulated time, the absence of proper stack monitoring facility as per ERP-III and as prescribed above shall be considered as violation and appropriate action shall be taken including closure of the industry, without any further notice in this matter. Further, any other action deemed appropriate under the provisions of the said Acts may also be initiated.

Yours sincerely,

- b. Stoppage or regulation of the supply of electricity or water or any other service.

Therefore, in exercise of the powers conferred under Section 31A of the Air Act, 1981, and in discharge of the functions entrusted under the Water Act, 1974 and the Air Act, 1981, and to ensure compliance with the directions issued by the CPCB on 12.03.2026, you are hereby directed to ensure the following: –

1. To provide/ensure stack monitoring facilities in accordance with the Emission Regulation Part-III (ERP-III) latest by March 28,2026 for all the stacks attached to potential air polluting sources such as Boiler, Furnaces, Thermic Fluid Heaters, Kilns and Process Emissions.
2. To ensure that the position of port-hole should comply with Emission Regulation Part-III (ERP-III) published by CPCB. Special emphasis shall be given to the criteria of compliance of minimum 8D downstream from flow disturbance and minimum 2D from top of stack to ensure laminar flow at sampling point in the stack. For other details pertaining to location of port-hole para 2.5.0 at page 18 of ERP-III may be referred.
3. To provide a separate port hole of 0.1 m diameter for manual emission sampling. For port hole installation para 2.5.2 at page 19 of ERP-III may be referred.
4. In case, if the Online Continuous Emission Monitoring Systems (OCEMS) is mandated as per consent conditions, the plane of port hole for OCEMS should be 500 mm below (vertically) the plane of manual sampling port hole.
5. To ensure that the platform for monitoring should have capacity to bear 300–350 kg of weight, it should have a size of minimum 6 x 4 feet, 800–1000 mm of guard rail to ensure proper space for sampling team and equipment required for monitoring. For monitoring platform installation, para 2.5.3, 2.5.4 & 2.5.6 at page 19 & 20 of ERP-III may be referred.
6. To ensure that the port hole and ladder facility is safe to carry out monitoring. In place of monkey ladder, spiral type/scaffold ladder shall be provided to ensure safety of monitoring personnel.

You are further directed to submit a compliance report to this office regarding the above directions by 28.03.2026.

In the event of failure to comply with the above directions within the stipulated time, the absence of proper stack monitoring facility as per ERP-III and as prescribed above shall be considered as violation and appropriate action shall be taken including closure of the industry, without any further notice in this matter. Further, any other action deemed appropriate under the provisions of the said Acts may also be initiated.

Yours sincerely,

- Sub:** Directions under Section 31A of the Air (Prevention and Control of Pollution) Act, 1981 to provide and maintain stack emission monitoring facilities in accordance with Emission Regulation Part – III (ERP-III) published by CPCB in air polluting industry: regarding
- Ref:** Directions issued by Central Pollution Control Board (CPCB) under Section 18(1)(b) of the Air Act, 1981, to RSPCB vide letter dated 12.03.2026

Sir/Madam

1. Whereas, the Water (Prevention and Control of Pollution) Act, 1974 and the Air (Prevention and Control of Pollution) Act, 1981 (hereinafter collectively referred to as the “Acts”) have come into force throughout the country with effect from 23.03.1974 and 16.05.1981, respectively.
2. And whereas, the said Acts have been enacted to provide for the prevention, control, and abatement of water and air pollution and for maintaining and restoring the wholesomeness of water and air, and the Rajasthan State Pollution Control Board (hereinafter referred to as the “Board”) has been vested with the powers to take such steps as may be deemed necessary for enforcement of the provisions of the aforesaid Acts.
3. And whereas, under the provisions of Section 24 of the Water Act, no person shall knowingly cause or permit any poisonous, noxious, or polluting matter, determined in accordance with the standards laid down by the Board, to enter any stream, well, sewer, or land.
4. And whereas under the provisions of section 25/26 of the Act, no person shall without the previous consent of the Board establish or take any steps to establish, any industry, operation or process or any treatment and disposal system or any extension or addition

Regional Office, Bhiwadi

thereto, which is likely to discharge sewage or trade effluent into a stream or well or sewer or on land or bring into use any new or altered outlet for the discharge of sewage or trade effluent or begin to make any new discharge of sewage or trade effluent.

5. And whereas under the provisions of section 21 of the Air Act, no person shall without the previous consent of the Board, establish or operate any industrial plant in an air pollution control area. Industrial plant, under the Air Act, has been defined to mean any plant used for any industrial or trade purposes and emitting any air pollutant into the atmosphere.
6. And whereas under the provisions of section 22 of the Air Act, no person operating any industrial plant, in any air pollution control area shall discharge or cause or permit to be discharged the emission of any air pollutant more than the prescribed standards.
7. And whereas, an industry has been established in the name & style of **M/s MEC BEARINGS PVT. LTD. (UNIT III)** at **PLOT NO. A-15 RIICO INDUSTRIAL AREA KAHARANI, District Khairthal Tijara** (hereinafter referred to as ‘the industry’) and the process is such that it generates polluted trade/domestic effluent & air emission.
8. And whereas, the Central Pollution Control Board (CPCB), New Delhi, has published Emission Regulation Part-III (ERP-III) in December 1985, prescribing monitoring requirement for industries including provisions relating to stack monitoring facilities, equipment, and testing procedures for regulation of emissions from industrial sources.
9. And whereas, provision of proper stack monitoring facilities is essential for assessing compliance of industries with prescribed emission standards and for enabling regulatory authorities to undertake effective monitoring and enforcement actions.
10. And whereas, the CPCB vide letter dated 12.03.2026 issued directions to the RSPCB under Section 18(1)(b) of the Air Act, 1981 to ensure compliance of provisions of ERP-III published by CPCB in air polluting industries in Delhi-NCR.
11. And whereas, your industry falls within the ambit of the aforesaid directions issued by CPCB.
12. And whereas the Board may, in exercise of the powers conferred upon it under the provisions of the section 33A of the Water Act and section 31A of the Air Act and in performance of its functions conferred under these Acts, issue directions in writing to any
